Introduction to the Smart Court System-of-Systems Engineering Project of China Jianfeng Xu, Fuhui Sun, Qiwei Chen, 2022-06-30 This book discusses the overall development and use of smart courts from the perspective of system of systems engineering SoSE and its methodology analyzes the relationships between the components structures environments and functions of various systems and illustrates the basic approaches to system design specification integration operation and management As the general introductory book of the China Smart Court Development Series this book provides an overview of the development of Chinese people's courts in the application of information technology over the past two decades and outlines the key areas of exploration in the Smart Court SoSe project centered on the development practices during the 13th Five Year Plan period It also forecasts the future development and evolution of the smart court information system The key topics introduced in the book including the overall design of complex information systems integrated interconnection networks based system integration judicial big data quality control and analytics services various types of AI enabled judicial services quality and efficiency oriented operation and maintenance services for large scale information systems etc all came from the basic research of information science and theories as well as the systems engineering practices of the Smart Court SoSe project They not only reflect the latest findings on systems engineering and architecture methods in China and overseas but also reveal many innovative approaches to SoSE methods and paradigms which can be used for the

design and continued development of smart courts at a new and higher starting point It is believed that they can also serve as good examples and reference points for the development in IT application and complex information systems engineering in other sectors

Handbook of Research on Smart Power System Operation and Control Alhelou, Hassan Haes, Hayek, Ghassan, 2019-03-15 Because society depends greatly on electric energy power system control and protection focuses on ensuring a secure and reliable supply of power To operate the electric systems in safe mode the power system component should be equipped with intelligent controllers The Handbook of Research on Smart Power System Operation and Control is a collection of innovative research on the theoretical and practical developments in smart power system operation and control that takes into account both smart grid and micro grid systems While highlighting topics including cybersecurity smart grid and wide area monitoring this book is ideally designed for researchers students and industry professionals

A Guide for Developing Zero Energy Communities John Whitcomb, 2014-11-26 A Planning Guide for Developing Zero Energy Communities also called The ZEC Guide helps developers corporations institutions governments utility companies and communities create cities campuses and neighborhoods that by design conserve energy and incorporate electric vehicle charging using renewable energy to power those buildings and vehicles ZECs provide a net balance of the supply and demand for local energy based on the National Renewable Energy Laboratories NREL ZEC definition The ZEC Guide addresses both Greenfield and Retrofit ZECs of various project sizes and complexities The environmental impacts regulatory issues resistance and economics are described The ZEC Guide includes an extensive primer regarding renewable energy control systems energy storage and hybridization of technologies The guide provides a step by step process for evaluation and implementation and an explanation of how to create a ZEC program and align it with other sustainability and green building standards Extensive references are provided for a multitude of relevant resources The 202 page book includes forty two photos and illustrations

Smart Grid Inspired Future Technologies Jia Hu, Victor C. M. Leung, Kun Yang, Yan Zhang, Jianliang Gao, Shusen Yang, 2016-11-12 This book constitutes the post conference proceedings of the First International Conference on Smart Grid Inspired Future Technologies SmartGIFT 2016 held in May 2016 in Liverpool UK Smart grid is the next generation electric grid that enables efficient intelligent and economical power generation transmission and distribution The 25 revised full papers presented were reviewed and selected from 36 submissions The papers cover technical topics such as high level ideology and methodology concrete smart grid inspired data sensing processing and networking technologies smart grid system architecture Quality of Service QoS energy efficiency security in smart grid systems management of smart grid systems service engineering and algorithm design and real world deployment experiences

Smart Technologies for Power and Green Energy Rudra Narayan Dash, Akshay Kumar Rathore, Vinod Khadkikar, Ranjeeta Patel, Manoj Debnath, 2022-09-21 The book is a collection of best selected research papers presented at International Conference on Smart Technology for Power and Green Energy STPGE 2022 organized by School of Electrical

Engineering KIIT Deemed to be University Bhubaneswar India during February 12-13, 2022. The book discusses recent developments and contemporary research in power electronics and energy. **Smart Grid Handbook, 3 Volume Set**, 2016-08-01. Alles Wissenswerte rund um Smart Grids umfassend und interdisziplinär beschrieben von internationalen Experten aus Forschung und Praxis. Dieses Buch trägt dem Wunsch nach einem hochkarätigen Referenzwerk zur Smart Grid Technologie Rechnung. Eine Technologie, die bei der Entwicklung einer umweltfreundlichen Energieinfrastruktur eine zentrale Rolle spielt. Das dreibändige Smart Grid Handbook mit insgesamt 83 Artikeln ist in sechs Abschnitte unterteilt: Vision and Drivers, Vision und Einflussgrößen, Transmission, Übertragung, Distribution, Verteilung, Smart Meters and Customers, intelligente Zähler und Kunden, Information and Communications Technology, Informations- und Kommunikationstechnik, Socio Economic Issues, sozial ökonomische Aspekte, Wichtige Merkmale. Geschrieben von einem Team, das sich mit Smart Grids auskennt und seine Erfahrung aus den folgenden Bereichen einbringt: Forschung, Entwicklung, Technikeinsatz, Standards, Branchenpraxis und sozial ökonomische Aspekte. Der Abschnitt Vision and Drivers beschäftigt sich mit Vision, Definitionen der Weiterentwicklung und globalen Entwicklung von Smart Grids sowie mit neuen Technologien und Standards. Der Abschnitt Transmission erläutert Branchenpraxis, Erfahrung im operativen Bereich, Standards, Cybersicherheit und Grid Codes. Im Abschnitt Distribution werden Verteilungssysteme und Systemkonfigurationen in verschiedenen Ländern sowie verschiedene Lasten, die über das Netz bedient werden, vorgestellt. Der Abschnitt Smart Meters and Customers untersucht, wie Kunden über Smart Meter mit dem Stromnetz interagieren können. **Proceedings of PIANC Smart Rivers 2022** Yun Li, Yaan Hu, Philippe Rigo, Francisco Esteban Lefler, Gensheng Zhao, 2023-02-25. This book is a compilation of selected papers from the 10th PIANC Smart Rivers Conference. Smart Rivers 2022. The work focuses on novel techniques for inland waterways and navigation structures. The contents make valuable contributions to academic researchers, engineers in the industry and regulators of aviation authorities. As well, readers will encounter new ideas for realizing Green Waterways and Sustainable Navigations. This is an open access book. **Green and Smart Technologies for Smart Cities** Pradeep Tomar, Gurjit Kaur, 2019-12-06. The book starts with an overview of the role of cities in climate change and environmental pollution worldwide, followed by the concept description of smart cities and their expected features focusing on green technology innovation. This book explores the energy management strategies required to minimize the need for huge investments in high capacity transmission lines from distant power plants. A new range of renewable energy technologies modified for installation in cities like small wind turbines, micro CHP and heat pumps are described. The overall objective of this book is to explore all the green and smart technologies for designing green smart cities. **Smart Agriculture for Developing Nations** Kandiah Pakeerathan, 2023-03-08. This book in its eighteen chapters provides sustainable and smart technology based solutions to developing nations. Smart farming is growing in importance due to the increasing demand for higher crop yield, the need for using natural resources efficiently, the rising use and sophistication of information and communication technology and the

increasing need for climate smart agriculture Some of these chapters deal with the applications of smart agriculture to address the special challenges of the Small Island Developing States for sustainable agriculture The book brings together scientific communities from India Indonesia Iraq Malaysia Mauritius Myanmar Palestine Sri Lanka and South Africa to share their expertise to make the farming system more connected and intelligent The smart farming techniques shared in different chapters not only help to reduce the overall cost and improve the quality and quantity of products but altogether help improve the sustainability of agriculture in the developing world Smart Farming is a management concept focused on providing the agricultural industry with the infrastructure to leverage advanced technologies including artificial intelligence AI big data robotics drones and Internet of Things IoT for tracking monitoring automating and analyzing operations Sometimes known as precision agriculture smart farming is software managed and sensor monitored

Smart Data and Computational Intelligence Faddoul Khoukhi, Mohamed Bahaj, Mostafa Ezziyyani, 2019-02-28 This book gathers the proceedings of the International Conference on Advanced Information Technology Services and Systems AIT2S 18 which was held in Mohammedia Morocco on October 17 18 2018 Presenting the latest research in the fields of Modern Information Engineering Concepts and Communication Systems the book will also be of interest to those working in emerging fields such as Advances in Networking and Sensor Networks Advances in Software Engineering Multimedia Systems E learning Big Data Intelligent Information Systems and Advances in Natural Language Processing [Essbase for Mere Mortals: An Insider's Guide](#) , [Smart Grid Initiatives and Technologies](#) United States. Geospatial Science for Smart Land Management Walter Timo de Vries,Iwan Rudiarto,N.M.P. Milinda

Piyasena,2023-12-22 Responsible land distribution in Asia with ever increasing limitations in space requires the use of smart technologies sophisticated models intelligent algorithms and big data repositories This book presents new land management perspectives and fit for purpose flexible dynamic and effective solutions for land management and land administration problems Written by global experts from different Asian countries including China India Indonesia Iran Japan South Korea Thailand Vietnam etc all these cases demonstrate how and why the uptake of geospatial technologies is booming and how to handle land scarcity and competing spatial interests in both urban and rural areas in Asia FEATURES Summarizes trends of geospatial technologies in Asia Describes and applies leading edge geospatial models Explains fit for purpose digital land administration Provides case studies and examples that include the use of smart land management tools Helps readers advance their understanding of geospatial and land management science Truly an interdisciplinary book this text is a practical guide for an array of readers such as practitioners in public and private companies involved in both geospatial and land management applications as well as graduate students researchers academics and professionals working in land administration land management spatial planning real estate studies geosciences geoinformatics and geodesy *Handbook of Research on Natural Language Processing and Smart Service Systems* Pazos-Rangel, Rodolfo Abraham, Florencia-Juarez, Rogelio, Paredes-Valverde, Mario Andrés, Rivera, Gilberto, 2020-10-02 Natural language processing NLP is a branch of artificial intelligence that has emerged as a prevalent method of practice for a sizeable amount of companies NLP enables software to understand human language and process complex data that is generated within businesses In a competitive market leading organizations are showing an increased interest in implementing this technology to improve user experience and establish smarter decision making methods Research on the application of intelligent analytics is crucial for professionals and companies who wish to gain an edge on the opposition The Handbook of Research on Natural Language Processing and Smart Service Systems is a collection of innovative research on the integration and development of intelligent software tools and their various applications within professional environments While highlighting topics including discourse analysis information retrieval and advanced dialog systems this book is ideally designed for developers practitioners researchers managers engineers academicians business professionals scholars policymakers and students seeking current research on the improvement of competitive practices through the use of NLP and smart service systems The The macOS User Administration Guide Herta Nava, 2021-04-26 Explore macOS tools and architecture for executing support tasks and system administration and prepare for the Apple Certified Support Professional ACSP certification exam Key Features Delve into macOS Big Sur from installation to managing apps and optimizing your environment Become an Apple Certified Support Professional ACSP with this comprehensive macOS support guide The book is not intended to be a user guide it covers concepts pertinent for a user acting as an administrator Book Description Apple is pushing the capabilities of its technologies to help users achieve high performance including improvements in its OS running across all Mac systems macOS and new

technologies such as M1 Silicon chips This book walks you through macOS from a system administration and support point of view exploring its latest features The book starts by explaining macOS architecture installation and startup processes to enable you to get started with the OS You ll learn how to manage users and discover techniques for user security and privacy Moving on you ll get to grips with the macOS file system and learn to manage disks volumes and partitions for effective file management Most of the examples covered in this book are from an administrator s perspective however when relevant a standard user s perspective is also presented You ll find illustrations for Mac systems running macOS 11 Big Sur and when necessary for macOS 10 15 macOS Catalina Finally you ll explore advanced topics such as networking and using command line tools for administration tasks By the end of this macOS book you ll be well versed with macOS features administration tasks and best practices You ll also be able to apply the concepts to increase your chances of success in obtaining Apple certifications such as Apple Certified Support Professional ACSP What you will learn

Understand the fundamentals of the macOS system and architecture
Configure key services and perform essential troubleshooting in your Mac system
Install update and configure your local macOS system and identify the stages of the startup process
Create and manage a local user account and set up your customized macOS environment
Manage your file systems storage and permissions
Explore practices and techniques to work with apps networks and security for your Mac system
Delve into administration tasks such as managing service resources and peripherals

Who this book is for If you are a Mac system administrator support and help desk technician or engineer or Mac power user looking to explore macOS architecture and tooling then this book is for you The book assumes beginner level knowledge of the macOS environment and system administration
