

The QD Series of click-type Torque Instruments features an innovative design that provides consistently accurate readings and rugged, trouble free performance.

Features:

- **Certificate of Calibration.** A Certificate of Calibration (right) is packed with every QD series torque instrument. Actual certification readings and individual instrument serial number are included. Each torque instrument, as calibrated at the factory, is certified to meet the accuracy specified in ASME[®] and was calibrated on a torque standard traceable to the National Institute of Standards Technology (NIST[™])
- **Accuracy.** All QD series torque instruments are accurate to $\pm 4\%$ clockwise and $\pm 6\%$ counterclockwise from 20% of full scale to full scale
- **Long Life Ratchet Head.** QD series torque instruments feature the Snap-on[®] high strength sealed ratchet head. Sealed ratchet heads keep out dirt and moisture while being virtually maintenance free. Applies to all QD series ratchet head models. (U.S. Patent 6,125,722) applies to 1/4, 3/8 and 1/2" drive ratchet head models only
- **Minimal Friction Hour Glass Cam.** Unique cam design minimizes friction due to reduced contact area between the cam and internal tube wall. Cam retains and releases lubricant where needed. Reduces friction results in more accurate and repeatable torque values
