Snow and Water

Water

Water is a substance in our world. First, it is a liquid. Which means it can flow. Water is also a lot of fun. You can splash in puddles or make snow. When you drink it, or it falls from the sky, it can change its state. It can be ice, or steam when it freezes, or rain when it melts.

Water is important for life. Every living thing needs water to survive. It is the only liquid on Earth that can exist in all three states. Which means we can find it in the sky, on the ground, and in the water. Interestingly, water cannot be compressed. It takes up space that doesn't change. Sometimes it's warm. See in a flash, it can be cold. One more fun thing about water is that it can be clear or blue. Can you see through it?
