simulations is to reflect the processes events and phenomena expressed in a variety of real life domains They engage students in these reflections of real life meaningfully as active agents who have the power to make decisions that impact the direction of events and that lead to both intended and unintended consequences Because of the nature of simulations students who participate in them are able to build their capacities to think in complex and critical ways Today despite the growing evidence that simulations have an important role to play in the teaching of social studies they remain an underutilized and undervalued approach to the discipline One of the key obstacles to their widespread adoption is the limited availability of training resources available to social studies teachers Teachers need support to develop a new vision of social studies teaching and learning coupled with practical guidance necessary to implement simulations effectively This volume provides teachers with both When teachers are able to weave simulations effectively into the fabric of social studies teaching and learning they help to promote social studies experiences that are both powerful and purposeful They offer students an experience of the discipline that is indeed More Like Life Itself
