Hong Kong Public Housing Miles Glendinning,2024-11-28 Hong Kong Public Housing provides the first comprehensive history of one of the most dramatic episodes in the global history of the modern built environment the vast public housing programme sponsored by successive Hong Kong governments from the 1950s in a quest to build up the territory into a lasting people s home And unlike many of its counterparts elsewhere this is a programme still ongoing today a case of history in progress as Hong Kong now boasts one of the world s longest lasting public housing programmes During that time it has been not just a mirror of the cultural and economic values of Hong Kong society but also a reflection of more nebulous fast changing perceptions of identity and a testament to the community building achievements of Hongkongers over these years This authoritative study combines architectural history with the broader social political and cultural aspects of housing production particularly the geo political issues of sovereignty and decolonisation that uniquely and fundamentally structured the trajectory of Hong Kong public housing and territory development Exploring the relationship between built form ideology and administrative governance it shows how massive state intervention interacted at times uneasily with Hong Kong s dominant laissez faire ethos to help maintain the legitimacy of successive administrations during an era of auto decolonisation and support an interstitial society suspended between two sovereignties Following more recent political changes Hong Kong s public housing heritage has also become a focus of nostalgic community pride a monumental achievement of home building which

this book documents and celebrates for posterity The Report: Saudi Arabia 2020 Oliver Cornock, Saudi Arabia's decision to weaken the link between hydrocarbons and economic growth and pursue a policy of diversification has seen projects across a range of sectors come to fruition in the last several years. While at present the twin crises presented by the Covid 19 pandemic and the unprecedented plunge in oil prices are causing significant short term uncertainty, the reforms that have been put in place in recent years should stand the Kingdom in good stead over the longer term Monthly Catalogue, United States Public Documents, 1985 **Rise of the North East** Research and Information System for Developing Countries (RIS), 2022-10-31 This book gives a detailed assessment of the scope for strengthening economic capacities across sectors ensuring economic prosperity through connectivity and discusses the resource gaps. It comprehensively captures the wide range of economic possibilities existing in the north eastern region of India in terms of sectors, local resources and expertise. Further, the book identifies gaps in supply chains and host of other factors around limited economic capacities and continued connectivity deficiencies that hold the region back. Key indicators like poverty and social sectors like health and education are presented in detail to cover the context in terms of the development parameters aligned with the SDGs. The wide variation in state specific contexts has been captured based on full utilization of available data and information. In this book, India's north east comprising of eight states have been looked at from the perspectives of India's Act East policy, development cooperation with the neighbouring countries, promotion of trade including border trade, connectivity and economic corridors, infrastructure and industrialization. In this direction, it makes several recommendations on drivers of economic growth and enablers of social sector development Archive Wars Rosie Bsheer, 2020-09-22 A study of the Saudi Arabian monarchy's efforts to construct and disseminate a historical narrative to legitimize its rule. The production of history is premised on the selective erasure of certain pasts and the artifacts that stand witness to them. From the elision of archival documents to the demolition of sacred and secular spaces, each act of destruction is also an act of state building. Following the 1991 Gulf War, political elites in Saudi Arabia pursued these dual projects of historical commemoration and state formation with greater fervor to enforce their postwar vision for state, nation and economy. Seeing Islamist movements as the leading threat to state power, they sought to de-center religion from educational, cultural and spatial policies. With this book, Rosie Bsheer explores the increasing secularization of the postwar Saudi state and how it manifested in assembling a national archive and reordering urban space in Riyadh and Mecca. The elites' project was rife with ironies: in Riyadh, they employed world renowned experts to fashion an imagined history while at the same time in Mecca, they were overseeing the obliteration of a thousand year old topography and its replacement with commercial megaprojects. Archive Wars shows how the Saudi state's response to the challenges of the Gulf War served to historicize a national space, territorialize a national history and ultimately refract both through new modes of capital accumulation. Praise for Archive Wars: An instant classic. With incredible insight, creativity and courage, Rosie Bsheer peels away the political and institutional barriers that have so
