**The Encyclopedia of Sustainable Tourism** Carl I Cater, Brian Garrod, Tiffany Low, 2015-10-01 Tourism is the world's fastest growing industry and impacts globally upon ecology, economies, peoples, cultures and the built environment. Development therefore must be sustainable and sympathetic in order to preserve the environment and culture it exploits. Despite sustainable tourism being an area of considerable recent interest, there has been no synthesis of the diverse considerations of sustainable tourism and the language and terms particular to this subject. An important resource for researchers of tourism, this reference work defines and explains terms associated with considering and preserving the environment, host peoples, communities, cultures, customs, lifestyles and social and economic systems. **Tourism,**

**Hospitality and Digital Transformation** Kayhan Tajeddini, Vanessa Ratten, Thorsten Merkle, 2019-10-08 Innovation and technological advancements can be disruptive forces, especially for conventional business in the hospitality and tourism industries. This book is timely with its critical examination of such forces and how the two industries should strategize and respond to changes effectively. It examines a wide scope of topics from environmental scanning, formulation, implementation and evaluation to the way managers make strategy choices for better organizational performance. The book illustrates how companies can re-orient their strategies and appraise the effectiveness of the business, its key competitors and how they should set business goals through various cases, i.e. different types of hospitality and tourism business from traditional hotels to Airbnb and endeavors to provide strategic conceptual theories with real-world application through such case studies.

Tourism as a Resource-based Industry Anna Lydia Svalastog, Dieter K. Müller, Ian Jenkins, 2022-08-16 Tourism as a Resource-based Industry presents the conceptual framework of the Norwegian economic geographer Sondre Svalastog and functions as a practical tool for analyzing and identifying resources when working towards a more sustainable tourism industry. Tourism resources and their sustainability are analysed through the lens of a multidisciplinary approach which includes social, economic, cultural and natural dimensions. Contextual awareness is achieved by combining research-based knowledge with local know-how and information on local conditions. The book facilitates a way forward that examines both productivity and sustainability. The usefulness and value of Svalastog's conceptual work is demonstrated by a selection of new case studies by experts in the field from different countries including Sweden, Norway, Slovenia and the UK. Tourism researchers and students will find this book helpful for understanding the development of tourism and how it can contribute to the UN Agenda 2030, which reflects the urgency for change to secure cultural and natural resources, health and social resilience and the stability of a socially constructed economy. Thus, tourism research needs to include a constant review and if required, renewal of processes that manage how society, culture and natural resources are used to achieve a balanced sustainable tourism process. Philosophies of Hospitality and Tourism Prokopis A. Christou, 2020-11-05 This book introduces readers to philosophies of hospitality and tourism.
