Index to Military Periodicals ,1997 **Blue Economy and Ocean Sustainable Development in a Globalised World: Social, Political, Economic and Environmental Issues** Ibukun J. Adewumi,Andrei Polejack,Joanna Vince,Maree E.

Fudge,2023-12-05 In the last decade the concept of a Blue Economy has ignited a deep theoretical debate Ranging from the integration of the triple bottom line of sustainability to the optimization of profit from ocean exploitation the meaning of the term blue economy differs considerably between epistemic communities and even more so among national and regional policies There is a general sense of the opportunity to realise enhanced social and economic benefits from the sustainable utilisation of their ocean and coastal resources under the umbrella framework of blue economy Blue economy is gaining traction already as a significant component of national policies even in spite of a clear conceptualization of the term Many countries are now preparing national policies towards realising their blue economy ambitions utilizing the concept as they see fit Likewise multilateral and regional organisations are developing guidelines and providing investment in new research technologies and financing tools that promote blue economy Critical challenges abound in particular in less privileged

countries These include the gap in research capabilities governments prioritizing social wellbeing and economic profit in contrast to environmental protection the identification of new and emerging areas of ocean economic activity that are both socially and ecologically sustainable and holds viable business models that can attract private investment **Journal of the House of Representatives of the United States** United States. National Aeronautics and Space Administration,1982 **Nordic Model Analyses:** S. T. Evensen,2016-05-31 The crux of this book is that it can help build Vision and processes for improvements by stances on positive development syndromes versus special interests scenarios That may even open up to serendipity In contrast there are specific econometric models and adjacent historic data which lack contact with today's

diverse events of real life i.e. behavioural aspects and the risk of changes. It is much too easy to build a scenario based on game theory and/or accepting others' algorithm based on interpretation of behaviour and risk of changes defined by so-called elasticities. By embracing the financial economy a ring of well-positioned econometricians has gained power Worldwide especially in small Nordic countries where seeking consensus based on historic data is a common practice. New insight tends to arrive too late unforeseen events will continue to surprise. Such countries are easily exploited by elite circulation and fragmentation of decision making benefiting special interests. The GAP between the financial and the real economy will grow. Hidden agendas and asymmetric information will thrive. The results are losses of resources plus disintegration for a large majority of enterprises and citizens. One may say that the demise of the old-fashioned Nordic model is embedded in the gullibility of its inmates. They look up to authorities and lack the needed oversight, agility and sense of urgency to adapt and change. To rock the boat and reinvent the Nordic model is much needed. It can be attained by focusing on the real economy and the behaviour of its inmates.
