## **Navy After Action Report:**

*David McCampbell* David Lee Russell, 2019-06-12 David McCampbell was the leader of the most successful naval air group in combat in World War II. An unequalled naval aviator, McCampbell shot down a total of 34 Japanese aircraft across numerous battles. Eventually awarded the Medal of Honor, he first served in the Atlantic as a carrier Landing Safety Officer, then as an air group leader in the Pacific theater. McCampbell's 31-year career reveals an astounding diversity of leadership roles and service assignments. McCampbell commanded ships, training centers, and aircraft squadrons and held a variety of Navy and Defense Department senior staff positions. **Naval Aviation** United States. **A Failure of Initiative: Final Report of the Select Bipartisan Committee To Investigate the Preparation for and Response to Hurricane Katrina, February 15, 2006**, *Naval Firepower* Norman Friedman, 2013-08-20. An in-depth history of naval battleship firepower from before World War I to the end of World War II by America's leading naval analyst. For more than half a century, the big gun was the arbiter of naval power, but it was useless if it could not hit the target fast and hard enough to prevent the enemy from doing the same. Because the naval gun platform was itself in motion, finding a firing solution was a significant problem, exacerbated when gun sizes increased, fighting ranges lengthened, and seemingly minor issues like wind velocity had to be considered. To speed up the process and eliminate human error, navies sought a reliable mechanical calculation. This heavily illustrated book outlines for the first time in layman's terms the complex subject of fire control as it dominated battleship and cruiser design from before World War I to the end of the dreadnought era. Covering the directors, range finders, and electro-mechanical computers invented to solve the problems, author Norman Friedman explains not only how the technology shaped and was shaped by the tactics involved, but also analyzes their effectiveness in battle. His examination of the controversy surrounding Jutland and the relative merits of competing fire control systems draws surprising conclusions. He also reassesses many other major gun actions, such as the battles between the Royal Navy and the Bismarck and the U.S. Navy actions in the Solomons and at Surigao Strait. All major navies are covered, and the story concludes at the end of World War II with the impact of radar. War in the Shallows John Darrell Sherwood, 2015. War in the Shallows, published in 2015 by the Naval History and Heritage Command, is the authoritative account of the U.S. Navy's hard-fought battle along Vietnam's rivers and coastline from 1965 to 1968. At the height of the U.S. Navy's involvement in the Vietnam War, the Navy's coastal and riverine forces included more than 30,000 sailors and over 350 patrol vessels ranging in size from riverboats to destroyers. These forces developed the most extensive maritime blockade in modern naval history and fought pitched battles against Viet Cong units in the Mekong Delta and elsewhere. War in the Shallows explores the operations of the Navy's three inshore task forces from 1965 to 1968. It also delves into other themes such as basing, technology, tactics, and command and control. Finally, using oral history interviews, it reconstructs deckplate life in South Vietnam, focusing in particular on combat waged by ordinary sailors. Vietnam was the bloodiest war in recent naval history.

Vego, 2016 A detailed study of three major naval operations of World War II These three initiated by imperial Japan took place in the Pacific and resulted in the battles of the Coral Sea Midway Aleutians and the Philippine Sea All the cases provide ample background on the geographic and strategic context of the operations as well as an account of the unfolding of the action utilizing much primary source material in especially American and Japanese archives Provided by publisher      *War in the Shallows* John Darrell Sherwood, 2015-09-16 *War in the Shallows* published in 2015 by the Naval History and Heritage Command is the authoritative account of the U S Navy's hard fought battle along Vietnam's rivers and coastline from 1965-1968 At the height of the U S Navy's involvement in the Vietnam War the Navy's coastal and riverine forces included more than 30 000 Sailors and over 350 patrol vessels ranging in size from riverboats to destroyers These forces developed the most extensive maritime blockade in modern naval history and fought pitched battles against Viet Cong units in the Mekong Delta and elsewhere *War in the Shallows* explores the operations of the Navy's three inshore task forces from 1965 to 1968 It also delves into other themes such as basing technology tactics and command and control Finally using oral history interviews it reconstructs deckplate life in South Vietnam focusing in particular on combat waged by ordinary Sailors Vietnam was the bloodiest war in recent naval history and *War in the Shallows* strives above all else to provide insight into the men who fought it and honor their service and sacrifice Illustrated throughout with photographs and maps Author John Darrell Sherwood has served as a historian with the Naval History and Heritage Command NHHC since 1997 Provided by publisher      Naval Anti-Aircraft Guns & Gunnery Norman Friedman, 2014-01-21 A winner of the Samuel Eliot Morison Award for Naval Literature gives an excellent overview of the problems involved in shooting at airplanes from ships *Coast Defense Journal* This book does for naval anti aircraft defense what the author's *Naval Firepower* did for surface gunnery it makes a highly complex but historically crucial subject accessible to the layman It chronicles the growing aerial threat from its inception in the First World War and the response of each of the major navies down to the end of the Second highlighting in particular the widely underestimated danger from dive bombing Central to this discussion is an analysis of what effective AA fire control required and how well each navy's systems actually worked It also takes in the weapons themselves how they were placed on ships and how this reflected the tactical concepts of naval AA defense Renowned military historian Norman Friedman offers striking insights he argues for example that the Royal Navy so often criticized for lack of air mindedness was actually the most alert to the threat but that its systems were inadequate not because they were too primitive but because they tried to achieve too much The book summarizes the experience of WW2 particularly in theaters where the aerial danger was greatest and a concluding chapter looks at post 1945 developments that

drew on wartime lessons All important guns directors and electronics are represented in close up photos and drawings and lengthy appendices detail their technical data It is simply another superb contribution to naval technical history by its leading exponent **The Naval Institute Guide to Naval Writing, 4th Edition** Christopher E Crane, Estate of Robert E Shenk, 2024-06-01 With updates to every chapter this new fourth edition serves as the premier guide to professional writing for the naval services Authored by a naval officer who taught English at two service academies the book is widely used by officers enlisted men and women and civilians in both the Navy and Marine Corps Shenk provides sound practical advice on all common naval writing assignments across digital and print platforms Fully revised the book reflects the changing landscape of professional communication in general and changes in naval culture in the last decade across the fleet making it an essential guide

**Seizure of the Gilberts and Marshalls** Philip Axtell Crowl, Edmund G. Love, 1955 A study in amphibious warfare that describes how the imperfections of American amphibious doctrine first revealed at Tarawa and Makin were corrected in the highly successful landings on Kwajalein and Roi Namur United States Army in World War II. United States. Dept. of the Army. Office of Military History, 1947 Hawaii Range Complex, 2008 Theodore Roosevelt's Naval Diplomacy Jerry Hendrix, 2014-07-15 This book examines President Theodore Roosevelt's use of the United States naval services as supporting components of his diplomatic efforts to facilitate the emergence of the United States as a Great Power at the dawn of the 20th century After reviewing the development of Roosevelt's personal philosophy with regard to naval power the book traverses four chapters that reveal Roosevelt's use of the Navy and Marine Corps to support American

interests during the historically controversial Venezuelan Crisis 1902-03 Panama's independence movement 1903 the Morocco Perciaris Incident 1904 and the choice of a navy yard as the sight for the negotiations that ended the Russo Japanese War The voyage of the Great White Fleet and Roosevelt's actions to technologically transform the American Navy are also covered In the end the book details how Roosevelt's actions combined to thrust the United States forward onto the world's stage as a major player and cemented T R's place in American history as a great president despite the fact that he did not serve during a time of war or major domestic disturbance This history provides new information that finally lays to rest the controversy of whether Theodore Roosevelt did or did not issue an ultimatum to the German and British governments in December 1902 bringing the United States to the brink of war with two of the world's great powers It also reveals a secret war plan developed during Panama's independence movement which envisioned the United States Marine Corps invading Colombia to defend the sovereignty of the new Panamanian republic **Sighted Sub, Sank Same** Alan C.

**Vietnam** Robin L. Rielly, 2024-02-19 America's entrance into the wars in Vietnam came as a result of several factors Among them was the necessity of bolstering French influence in the area in the face of mounting communist expansion This expansion was intensified by the outbreak of the Korean War making it necessary for the United States to revamp its Southeast Asian policy During the French era control of Vietnam's rivers streams and canals became necessary This led various factions to develop specialized military units heavily dependent on new types of river craft that could traverse the myriad waterways in Vietnam The focal point of this study is a new assessment of the conduct of river warfare Drawing on

little known French Vietnamese and American sources and materials it sheds light on an important aspect of the Vietnam War Chapters also detail numerous aspects of river warfare not generally covered in other books on the subject     **Morning Star, Midnight Sun** Jeffrey Cox,2018-02-22 Following the disastrous Java Sea campaign the Allies stopped the Japanese advance at Coral Sea and Midway But the Japanese still threatened to build a network of bases in the South Pacific and threatened to cut off Australia In response Allies made a desperate move by starting their first offensive of the Pacific War Their first target a new Japanese airfield in a relatively unknown place in the Solomon Islands called Guadalcanal Hamstrung by obsolete pre war thinking and a bureaucratic mind set the US Navy had to adapt on the fly in order to compete with the mighty Imperial Japanese Navy Starting with the amphibious assaults on Guadalcanal and Tulagi and continuing with the worst defeat in US Navy history the campaign quickly turned into a see saw struggle where the evenly matched foes struggled to gain the upper hand and grind out a victory Following on from his hugely successful book Rising Sun Falling Skies Jeffrey R Cox tells the gripping story of the first Allied offensive of the Pacific War as they sought to regain dominance in the Pacific     *Fort Fisher, December 1864-January 1865* David W.
