## **Nc Science Bubble Sheet:**

**Rheology and Processing of Polymeric Materials** Chang Dae Han, 2007-06-04 Volume 2 presents the fundamental principles related to polymer processing operations including the processing of thermoplastic polymers and thermosets. The objective of this volume is not to provide recipes that necessarily guarantee better product quality. Rather, emphasis is placed on presenting a fundamental approach to effectively analyze processing operations. The specific polymer processing operations for thermoplastics include plasticating single screw extrusion, morphology evolution during compounding of polymer blends, compatibilization of immiscible polymer blends, wire coating extrusion, fiber spinning, tubular film blowing, coextrusion, and thermoplastic foam extrusion. The specific polymer processing operations for thermosets include reaction injection molding, pultrusion of fiber reinforced thermosets, and compression molding of thermoset composites.

**Connecting Primary Maths and Science: A Practical Approach** Alan Cross, Alison Borthwick, 2016-02-16 At last a unique book that explores and exploits the links between primary mathematics and science so that you can promote learning in both of these important STEM subjects. Rich in engaging ideas and activities for the classroom, this book helps you plan and teach well structured lessons in a more integrated way. The book outlines key curriculum topics in both subjects and considers why it is important and beneficial to make connections between the two. As well as covering key subject knowledge, what you need to know and teaching activities, what you need to do, the book explores learners' mathematical and scientific needs and defines the characteristics of effective teaching and learning, bringing it all together with ideas which you can use straightaway in your classroom. Key features: promotes an informed approach to integrating primary mathematics and science; teaching helps address the time constraints of delivering the primary national curriculum; presents engaging ideas which can be directly transferred to the classroom; provides a real life context to mathematics and science activities to inspire student learning; helps you combine two closely related and sometimes tricky subject areas; why teach one subject when you can teach two at the same time. Accessible, readable and engaging with a range of innovative teaching ideas, this is an invaluable book for all trainee and qualified primary teachers and other educational professionals with links to primary mathematics and science. A great go-to book for teachers and trainee teachers alike. Chapters are constructed with easy-to-read objectives and clear summaries. Many practical ideas incorporating current research as well as information on mathematicians and scientists, which is great for boosting children's aspirations and also helping with teachers' confidence on the subjects. A lovely easy-to-access book whether it is to use for reference to dip in and out of or just to use alongside planning materials. Maria McArdle, Senior Lecturer, PGCE Mathematics Lead, Primary University of Bedfordshire, UK
