# Nchrp Intersection Channelization Design Guide

**Lee August Rodegerdts**

## **Nchrp Intersection Channelization Design Guide:**

**A Policy on Geometric Design of Highways and Streets, 2011** American Association of State Highway and Transportation Officials, 2011      **Intersection Safety Issue Briefs** ,2004      **Guide for the Geometric Design of Driveways** ,2010 TRB s National Cooperative Highway Research Program NCHRP Report 659 Guide for the Geometric Design of Driveways explores guidelines related to the geometric design of driveways The report includes driveway related terms and definitions an examination of basic geometric controls a summary of access spacing principles and detailed discussions of various geometric design elements Material related to and supporting the contents of NCHRP Report 659 including an extensive review of literature has been published as NCHRP Web Only Document 151 Geometric Design of Driveways      Intersection Channelization Design Guide Timothy R. Neuman, National Research Council (U.S.). Transportation Research Board, 1985      **Highway Safety Design and Operations Guide, 1997** ,1997 A replacement to the publication entitled Highway design and operational practices related to highway safety also known as The Yellow Book and most recently published in 1974      **Left-turn Accommodations at Unsignalized Intersections** Kay Fitzpatrick, 2013 TRB s National Cooperative Highway Research Program NCHRP Report 745 Left Turn Accommodations at Unsignalized Intersections presents guidance for the selection and design of left turn accommodations at unsignalized intersections The report includes 11 case studies of typical situations that illustrate the use of the guidance publisher s description

**Highway Safety Design and Operations Guide, 3rd Edition** ,      *Design, Operation, and Safety of At-grade Crossings of Exclusive Busways* Kimberly A. Eccles, Herbert S. Levinson, 2007 TRB s Transit Cooperative Research Program TCRP Report 117 Design Operation and Safety of At Grade Crossings of Exclusive Busways explores planning designing and operating various kinds of busways through roadway intersections The report examines at grade intersections along busways within arterial street medians physically separated side aligned busways busways on separate rights of way and bus only ramps The intersections highlighted include highway intersections midblock pedestrian crossings and bicycle crossings Appendixes A through I of the contractor s final report were published as TCRP Web Only Document 36 Publisher s website

**Design Guidance for Intersection Auxiliary Lanes** Kay Fitzpatrick, 2014 TRB s National Cooperative Highway Research Program NCHRP Report 780 Design Guidance For Intersection Auxiliary Lanes expands on guidance provided in A Policy on Geometric Design of Highways and Streets the Green Book published by the American Association of State Highway and Transportation Officials AASHTO This report highlights information regarding bypass lanes channelized right turn lanes deceleration and taper length design and capacity of multiple left turn lanes and alternative intersection designs Publisher description      Median Intersection Design Douglas W. Harwood, 1995      *Accident Mitigation Guide for Congested Rural Two-lane Highways* Kay Fitzpatrick, 2000      **Facilities Development Manual** Wisconsin. Department of Transportation, 1979      **Signalized Intersections** Lee August Rodegerdts, 2004 This guide provides a single comprehensive

document with methods for evaluating the safety and operations of signalized intersections and tools to remedy deficiencies. The treatments in this guide range from low cost measures such as improvements to signal timing and signage to high cost measures such as intersection reconstruction or grade separation. Topics covered include fundamental principles of user needs, geometric design and traffic design and operation, safety and operational analysis techniques, and a wide variety of treatments to address existing or projected problems, including individual movements and approaches, pedestrian and bicycle treatments and corridor techniques. It also covers alternative intersection forms that improve intersection performance through the use of indirect left turns and other treatments. Each treatment includes a discussion of safety, operational performance, multimodal issues, and physical and economic factors that the practitioner should consider. Although the guide focuses primarily on high volume signalized intersections, many treatments are applicable for lower volume intersections as well. The information contained in this guide is based on the latest research available on treatments and best practices in use by jurisdictions across the United States. Additional resources and references are highlighted for the student practitioner, researcher, or decisionmaker who wishes to learn more about a particular subject. *Flexibility in Highway Design*, 1997

**Intersection Geometric Design and Operational Guidelines for Older Drivers and Pedestrians** L. K. Staplin, 1997

A Guide for Achieving Flexibility in Highway Design, 2004. Context sensitive solutions (CSS) reflect the need to consider highway projects as more than just transportation facilities. Depending on how highway projects are integrated into the community, they can have far reaching impacts beyond their traffic or transportation function. CSS is a comprehensive process that brings stakeholders together in a positive, proactive environment to develop projects that not only meet transportation needs but also improve or enhance the community. Achieving a flexible context sensitive design solution requires designers to fully understand the reasons behind the processes, design values, and design procedures that are used. This AASHTO Guide shows highway designers how to think flexibly, how to recognize the many choices and options they have, and how to arrive at the best solution for the particular situation or context. It also strives to emphasize that flexible design does not necessarily entail a fundamentally new design process but that it can be integrated into the existing transportation culture. This publication represents a major step toward institutionalizing CSS into state transportation departments and other agencies charged with transportation project development. **Publications - Transportation Research Board**
