American Conquest Andrew A. Szarejko, 2025-09-30 The first war of America's existence as an independent state was fought against the Shawnee, the Miami and other Ohio River Valley tribes in the Northwest Indian War of 1790-95. The war provides a window into how US conquest of the continent would proceed through the next century and comprise a central element of US foreign policy.

into the future Szarejko examines why the United States first engaged in this war to secure its claim to the Old Northwest and how the reverberations of the war extend far beyond the process of settlement In focusing on US strategy during the war its reliance on military bases to project power and a nascent counterinsurgency doctrine Szarejko expertly traces the patterns established by this conflict throughout American political history and demonstrates how that military victory continues to be legitimized today through local commemorations of the war This innovative book argues forcefully against the conventional claim that early US foreign policy was isolationist brings Indigenous politics more fully into the realm of international relations and allows researchers in several scholarly fields to better understand the nature of American conquest

The role of evidence in developing effective educational inclusion Joseph Mintz, Brahm Norwich, 2023-12-13 There has been considerable interest internationally in how research can be effectively translated to have an impact on practice in schools The application of evidence informed approaches in the field of education is contested and debated Such debates are intensified in relation to the issue of how best to include children with diverse learning needs in the classroom The role of knowledge science and evidence in how we both conceptualize and best support children with special educational needs and other forms of diversity in the classroom remains an open question in terms of both policy and practice Although there is a considerable and growing body of literature on evidence informed practice in education in general there has been less attention paid to its implications for the domain of educational inclusion specifically However tensions between differing conceptualisations of difference and the role of categorisation present questions as yet not fully answered as to the ways in which evidence can and should articulate with practice in this specific domain For example issues of what is inclusion the place of norms and values that define inclusion how we conceptualize and think about difference across culture language and cognition are raised when we think about the application of evidence to practice in the area of educational inclusion

Anti-Zionism and Antisemitism Alvin H. Rosenfeld, 2019-01-09 Seventeen essays by scholars examining the links between anti-Semitism and attitudes toward Israel in the current political climate How and why have anti-Zionism and antisemitism become so radical and widespread This timely and important volume argues convincingly that today's inflamed rhetoric exceeds the boundaries of legitimate criticism of the policies and actions of the state of Israel and conflates anti-Zionism with antisemitism The contributors give the dynamics of this process full theoretical political legal and educational treatment and demonstrate how these forces operate in formal and informal political spheres as well as domestic and transnational spaces They offer significant historical and global perspectives of the problem including how Holocaust memory and meaning have been reconfigured and how a singular and distinct project of delegitimization of the Jewish state and its people has solidified This intensive but extraordinarily rich contribution to the study of antisemitism stands out for its comprehensive overview of an issue that is both historical and strikingly timely
