## Nickel Metal Hydride (NiMH) Batteries

Observe the following guidelines when using Nikon EN-ELH1 and EN-ELH2 Nikon batteries.

- Quick recharging battery service charges at electronics stores that do charge in the EN-ELH1 or EN-ELH2 battery-charger battery box.

**⚠ Battery may become hot when charged.** Observe this caution after handling batteries during or after charging. Batteries may become hot after being used in other portable electronic applications or after charging. This is normal and does not indicate a problem.

- New batteries and batteries that have been left unused for an extended period tend to lose their charge rapidly. This is normal for NiMH batteries and the batteries will reach a charge after being used and recharged several times.

Batteries will benefit from recharging to reach a higher state of charge.

- The battery and charger terminals are covered thoroughly with a protective film. Before charging, remove the protective film and other debris that can damage or reduce battery performance.
- They are charged at an ambient temperature of 10–30°C (50–86°F).
- They are fully recharged until fully extended (just until the orange light turns green) and then charged in the case of a recharge battery or charging.

Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and thrilling novel that will keep you wondering until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
