Tomlinson,2018-03-16 The Nikon D70 was Nikon's third revolution just in the digital photography age Never mind the major one in 1959 with the Nikon F that changed professional film photography The first was the Nikon D1 started pro digital photography the end of mainstream film The second was the Nikon D100 the first DSLR to reach the lofty heights of 6.1 megapixels Then there was the D70 It looks and feels like a modern DSLR and Nikon released it in 2002 It was in its own way as revolutionary as the D1 and the D100 I've taken some of my best photos with it The thing is there really is little negative to say about the Nikon D70 D70S You can come up with many reasons to spend more money on a newer DSLR but if you want a great camera for little money the Nikon D70 or D70S is a good bet     *Vol. 18: Photography: Going Semi-Pro II: Revisiting the Nikon D7000* Shawn M. Tomlinson,2018-03-14 The Nikon D7000 was aimed at the Enthusiast photographer when it was released in 2010 but it proved to be such a tough reliable camera it became the darling of semi pro photographers everywhere At 16.2 megapixels this APS-C crop frame DSLR has great resolution and handles nearly every Nikon lens ever made In this volume of Shawn M Tomlinson's Guide to Photography the Nikon D7000 proves itself to be one of the best mid range DSLRs available for the budding photographer at the Enthusiast and Semi Pro levels     **The Complete Raw Workflow Guide** Philip Andrews,2012-11-12 The must have workflow guide for the tens of thousands of photographers shooting in raw

**Vol. 31: Going Film Pro II: The Canon EOS 1N: Standard Edition** Shawn M. Tomlinson,2018-12-31 In some ways the Nikon F5 is easier to use than the Canon EOS 1N but it is not nearly as elegant There's just something about the way the Canon EOS 1N feels in my hands when I'm shooting with it that makes me never want to put it down In that way it reminds me much more of the Nikon F4S than the Nikon F5 Practically since I placed the order for the camera it was inevitable that I would need to write about it If you are seeking the perfect late model film SLR camera you need look no further than the second to last pro level Canon EOS 1N Just load a roll of film take the camera in your hands and start shooting You too will never want to let it go     **Vol. 19: Photography: Beyond Semi-Pro: The Nikon D800 & D800E** Shawn M.

Tomlinson,2018-03-14 I have been somewhat reluctant to write about the absolute best digital single lens reflex camera I have ever used the Nikon D800E The reason is that I like to write about older cameras that have become cheaper to buy and use for the frugal photographer Although some of the cameras I have written about were terribly expensive when first released by now they are reasonably cheap For example I've written books about the Canon EOS 1DS 1DS Mark II the Nikon D1 and the Nikon D2X These all are pro DSLRs and as such were released at prices ranging from 6,000 to 8,000 By now however the most you will pay is around 400 for any of them In a few years the Nikon D800E too will be much cheaper and an obvious choice for the frugal photographer No matter the price the D800 and D800E are two of the best DSLRs ever made

Either will change you as a photographer in fantastic ways

cameras the bodies themselves have little to do with image quality Lenses are far more important to image quality than camera bodies So as long as your camera has accurate shutter speeds aperture settings and metering the brand you pick doesn't really have much of an effect upon the final image So then it appears the model camera you choose is irrelevant Well no The type of film SLR camera you choose is most important to you as the photographer in features and convenience Comfort has a lot to do with how good you are as a photographer What I mean by that is that you choose a camera that feels comfortable in your hands and becomes an extension of your brain as a photographer This makes it easier to capture the types of images you want
