The Lower to Middle Palaeolithic Transition in Northwestern Europe Ann Van Baelen, 2017-10-17 A well preserved early Middle Palaeolithic site set against a wider northwestern European context The shift from Lower to Middle Palaeolithic in northwestern Europe dated to around 300 000 250 000 years ago remains poorly understood and underexplored compared to more recent archaeological transitions During this period stone tool technologies underwent significant changes but the limited number of known sites and the general low spatio temporal resolution of the archaeological record in many cases has impeded detailed behavioural inferences Brickyard quarrying activities at Kesselt Op de Schans Limburg Belgium led to the discovery and excavation of a well preserved early Middle Palaeolithic level buried beneath a 10 m thick loess palaeosol sequence The present volume offers a comprehensive report on the site dated to around 280 000 years ago set against a wider northwestern European context An in depth study of the lithic assemblage including an extensive refitting analysis provides detailed information on the technological behaviour of prehistoric hominins in the Meuse basin during this crucial time period Contributors Jozef J Hus Royal Meteorological Institute of Belgium Frank Lehmkuhl RWTH Aachen University Erik P M Meijs ArcheoGeoLab Philipp Schulte RWTH Aachen University Ann Van Baelen KU

Leuven and University of Cambridge Philip Van Peer KU Leuven Joerg Zens RWTH Aachen University Emergence and Diversity of Modern Human Behavior in Paleolithic Asia Yousuke Kaifu, Masami Izuho, Ted Goebel, Hiroyuki Sato, Akira Ono, 2015-02-15 Despite the obvious geographic importance of eastern Asia in human migration its discussion in the context of the emergence and dispersal of modern humans has been rare Emergence and Diversity of Modern Human Behavior in Paleolithic Asia focuses long overdue scholarly attention on this under studied area of the world Arising from a 2011 symposium sponsored by the National Museum of Nature and Science in Tokyo this book gathers the work of archaeologists from the Pacific Rim of Asia Australia and North America to address the relative lack of attention given to the emergence of modern human behavior as manifested in Asia during the worldwide dispersal from Africa Osseous Projectile Weaponry Michelle C. Langley, 2017-01-27 This volume presents the current state of knowledge on the osseous projectile weaponry that was produced by Pleistocene cultures across the globe Through cross cultural and temporal comparison of manufacturing methods design use methods and associated technology chapters in this volume identify and discuss differences and similarities between these Pleistocene cultures The central research questions addressed in this volume include a how did osseous weaponry technology develop and change through time and can these changes be tied to environmental and or social influences b how did different Pleistocene cultures design and adapt their osseous weaponry technology to their environment as well as changes in that environment and c can we identify cultural interaction between neighboring groups through the analysis of osseous weapons technology and if so can we use these items to track the movement of peoples and or ideas across the landscape Through addressing these three central research questions this volume creates an integrated understanding of osseous technology during a vital period in Modern Human cultural development which will be useful for students and advanced researchers alike **A Global History of The Earlier Palaeolithic** Mark J. White, 2022-10-10 This book tells the story of both the ancient humans who made handaxes and the thoughts and ideas of scholars who have spent their lives trying to understand them Beginning with the earliest known finds this volume provides a linear and thematic account of the history of the Old Stone Age or Palaeolithic period covering major discoveries interpretations and debates worldwide a story that takes us from the embers of the Great Fire of London to the beginning of the Covid 19 pandemic It offers a comprehensive and unique history of archaeological theory and interpretation seeking to explain how we know what we know about the deep past and how ideas about it have changed over time reflecting both scientific and societal change At its heart lies the quest for an answer to a most curious and sometimes beautiful tool ever made the handaxe While focused on the Earlier Palaeolithic period the book provides a readable account of how ideas about the prehistoric past generally were formed and altered showing how the wider discipline came to be dominated by a succession of different theoretical paradigms each seeking different answers from the same data set Serving a dual purpose as a historical narrative and as a reference source this book will be of interest to all students and researchers interested in deep human prehistory and

evolution archaeological theory and the history of archaeology *PaleoAmerican Archaeology in Virginia* Wm Jack Hranicky, 2017-10-10 This book is a full color study of over 500 pre Clovis stone artifacts of Virginia With the 22K year date of the Cinmar biface in Virginia there is ample evidence of artifact classes that are older than Clovis Over 50 tool types are illustrated and discussed Artifact single site collections are documented The book argues the differences between Holocene biface technology with the blade and core technology of the Pleistocene era The requirements for identifying Pleistocene artifacts is presented such as platforms remaining cortex and invasive retouch They are presented in a tool model Major stones namely jasper are discussed as a lithic determinism The east coast distribution is presented for various tool types Additionally as a major focus cross Atlantic flake blade identical tools from Europe are illustrated with Middle Atlantic artifacts Artifact ergonomics such as right left handed tools hypothetical tool center are argued Structural and functional axis are shown and described on how to identify them on tools Overall this book presents an initiating view of the archaeology needed to study Pleistocene era artifacts on the American east coast **Neanderthal Language** Rudolf Botha, 2020-05-21 Did Neanderthals have language and if so what was it like Scientists agree overall that the behaviour and cognition of Neanderthals resemble that of early modern humans in important ways However the existence and nature of Neanderthal language remains a controversial topic The first in depth treatment of this intriguing subject this book comes to the unique conclusion that collective hunting is a better window on Neanderthal language than other behaviours It argues that Neanderthal hunters employed linguistic signs akin to those of modern language but lacked complex grammar Rudolf Botha unpacks and appraises important inferences drawn by researchers working in relevant branches of archaeology and other prehistorical fields and uses a large range of multidisciplinary literature to bolster his arguments An important contribution to this lively field this book will become a landmark book for students and scholars alike in essence illuminating Neanderthals linguistic powers *The Oxford Handbook of Cognitive Archaeology* , 2024-03-12 Cognitive Archaeology is a relatively young though fast growing discipline The intellectual heart of cognitive archaeology is archaeology the discipline that investigates the only direct evidence of the actions and decisions of prehistoric people Its theories and methods are an eclectic mix of psychological neuroscientific paleoneurological philosophical anthropological ethnographic comparative aesthetic and experimental theories methods and models united only by their focus on cognition The Oxford Handbook of Cognitive Archaeology is a landmark publication showcasing the theories methods and accomplishments of archaeologists who investigate the human mind including its evolutionary development its ideation thoughts and beliefs and its very nature through material forms The volume encompasses the wide spectrum of the discipline showcasing contributions from more than 50 established and emerging scholars from Europe Africa Asia Australia and the Americas Prominent among these are contributions that discuss the epistemological frameworks of both the evolutionary and ideational approaches and the leading theories that ground interpretations Significantly the majority of chapters deliver substantive contributions that

analyze specific examples of material culture from the oldest known stone tools to ceramic and rock art traditions of the recent millennium. These examples include the gamut of methods and techniques including typology, replication studies, changes, operational neuroarchaeology, ethnographic comparison, and the direct historical approach. In addition, the book begins with retrospective essays by several of the pioneers of cognitive archaeology, presenting a broad range of state-of-the-art investigations into cognitive abilities, tackling thorny issues like the cognitive status of Neandertals, and concluding with speculative essays about the future of an archaeology of mind and of the mind itself.

Paleoanthropology of the Balkans and Anatolia Katerina Harvati, Mirjana Roksandic, 2017-01-18. This edited volume systematically reviews the evidence for early human presence in one of the most relevant geographic regions of Europe: the Balkans and Anatolia, an area that has been crucial in shaping the course of human evolution in Europe but whose paleoanthropological record is poorly known. The primary aim of this book is to showcase new paleoanthropological, human paleontological, and paleolithic research conducted in the region. The volume is organized into three sections. The first one deals with the human fossil record from Greece, the Central Balkans, Croatia, Romania, Bulgaria, and Turkey. The second section presents the paleolithic record of the same countries. In the third part, the authors provide a synthesis of current paleoenvironmental evidence for the Balkans. Chapters summarize and systematize the available human fossil evidence, examine their context, and place them within the framework of our understanding of human evolution in Europe and beyond, as well as present new analyses of existing human fossils. This book will be of interest to professionals, upper undergraduate and graduate students in paleoanthropology, human paleontology, and paleolithic archaeology, and in a variety of related fields including human variation and adaptation, paleontology, and biogeography. It will also be appropriate as a reference book for advanced undergraduate and graduate courses on human evolution and European paleoanthropology.

The Oxford Handbook of Human Symbolic Evolution Nathalie Gontier, Andy Lock, Chris Sinha, 2024-01-17. The biological and neurological capacity to symbolize and the products of behavioral, cognitive, sociocultural, linguistic, and technological uses of symbols: symbolism are fundamental to every aspect of human life. The Oxford Handbook of Human Symbolic Evolution explores the origins of our characteristically human abilities: our ability to speak, create images, play music, and read and write. The book investigates how symbolization evolved in human evolution and how symbolism is expressed across the various areas of human life. The field is intrinsically interdisciplinary, considering findings from fossil studies, scientific research from primatology, developmental psychology, and of course linguistics. Written by world-leading experts, thirty-eight topical chapters are grouped into six thematic parts that respectively focus on epistemological, psychological, anthropological, ethological, linguistic, and social/technological aspects of human symbolic evolution. The handbook presents an in-depth but comprehensive and interdisciplinary overview of the state-of-the-art in the science of human symbolic evolution. This work will be of interest to academics and students active in all fields contributing to the study of human evolution.

Pleistocene Archaeology Rintaro Ono,Alfred Pawlik,2020-12 This book presents an overview of recent research in the field of Pleistocene Archaeology around the world The main topics of this book are 1 human migrations particularly by Homo sapiens who have migrated into most regions of the world and settled in different environments 2 the development of human technology from early to archaic hominins and Homo sapiens and 3 human adaptation to new environments and responses to environmental changes caused by climate changes during the Pleistocene With such perspectives in mind this book contains a total of nine insightful and stimulating chapters on these topics in which human history during the time of the Pleistocene is reviewed and discussed

The History of Experience Wolfgang Leidhold,2022-10-14 In a wide arc from the Paleolithic to the present day this book explores the changing structure of human experience and its impact on the dynamics of cultures civilizations and political ideas The main thesis is a paradigm shift the structure of human experience is not a universal constant but changes over time Looking at the entire range of human history there are a total of nine transformations beginning with conscious perception and imagination in the Paleolithic and ending for the time being in modern times with the discovery of the unconscious In between this book explores six more transformations that took place in different regions

and at different times which include a sense of order self reflection the eye of reason spiritual experience as well as the experience of creativity and of consciousness As such The History of Experience presents both a cross cultural and comparative theory of experience and cultural dynamics and an exploration of rich materials from East and West This book is of great use to upper level undergraduates postgraduates and scholars interested in the relationship between history human experience culture and political order **How the Brain Got Language** Michael A. Arbib, 2012-04-11 Unlike any other species humans can learn and use language This book explains how the brain evolved to make language possible through what Michael Arbib calls the Mirror System Hypothesis Because of mirror neurons monkeys chimps and humans can learn by imitation but only complex imitation which humans exhibit is powerful enough to support the breakthrough to language This theory provides a path from the openness of manual gesture which we share with nonhuman primates through the complex imitation of manual skills pantomime protosign communication based on conventionalized manual gestures and finally to protospeech The theory explains why we humans are as capable of learning sign languages as we are of learning to speak This fascinating book shows how cultural evolution took over from biological evolution for the transition from protolanguage to fully fledged languages The author explains how the brain mechanisms that made the original emergence of languages possible perhaps 100 000 years ago are still operative today in the way children acquire language in the way that new sign languages have emerged in recent decades and in the historical processes of language change on a time scale from decades to centuries Though the subject is complex this book is highly readable providing all the necessary background in primatology neuroscience and linguistics to make the book accessible to a general audience **The ^AOxford Handbook of Ancient Nubia** Geoff Emberling, Bruce Williams, 2021-01-15 The cultures of Nubia built the earliest cities states and empires of inner Africa but they remain relatively poorly known outside their modern descendants and the community researching them The Oxford Handbook of Ancient Nubia brings together chapters by an international group of scholars on the history and archaeology of Nubia
