The Loknar Class frigates were built during "The Great Awakening", a period of expansion by the Federation. During this time, many research and exploration vessels were designed and built to aid in the efforts to solidify an enlarged and growing United Federation of Planets. Also during this period, a smaller number of warships were built. The Loknar, the most noted of these warships, is still in service to this day, a tribute to the quality of the Andorian design.

Soon after the Federation Appropriations Committee granted Star Fleet the funds necessary to construct fleets to expand and patrol the limits of the UFP, Andorian factions began pushing for warship construction. The basic Andorian philosophy was that, in expanding, the Federation might come upon races as hostile as the Romulans and Klingons, leading to another protracted war broke out for which the Federation and Star Fleet were unprepared. The Andorians argued that, were this to happen or were the Klingons or Romulans to escalate hostilities, Star Fleet needed to be better prepared and would need ships to protect the new borders and colonies. The Andorian arguments were successful, and Star Fleet began a limited build-up of warships. Several ship-building facilities were constructed by Andorian firms to design and manufacture these warships, the most notable of these on Sol IV and Salazar, the largest and most productive in the Federation.

Introduced on Stardate 1/9010, the Loknar Class frigate mounted the new, but already proven, FWE-1 warp drive, in Star Fleet's inventory for only two years. The FIC-2 impulse engine was introduced on the Loknar and has since proven itself to be one of the most reliable of all production. The Loknar Mk I was considered a 'muscle' ship because of its four heavy lasers and single accelerator cannon, making it equal to all but the largest Klingon vessels and more powerful than any ship in the Romulan navy. In addition, the Loknar mounted FSH shield generators, more efficient than any used by the enemies of the Federation.

During the Four Years War, the Loknar saw more action than any other vessel in Star Fleet. Although it was considered to be successful, the Andorian designers felt a need to improve it. The FWE-2 warp drive systems, still being tested, would produce 60% more power than the FWE-1 and would increase the ship's overall performance. The Mk II was commissioned into service on Stardate 1/9801 mounting the FWE-2, even though this engine was not officially adopted by Star Fleet until Stardate 2/0002.

The most significant advance in starship technology came with the phaser and photon torpedo. The phaser delivers more firepower at longer ranges, weighs less, and requires less structural reinforcing than the laser. The newly developed photon torpedo delivered the same explosive power at 75% less power requirement, was considerably
