theaters in 1956 and ever since then Japanese trends and cultural products have had a major impact on children's popular culture in America. This can be seen in the Hello Kitty paraphernalia phenomenon, the popularity of anime television programs like Pokemon and Dragon Ball Z, computer games, and Hayao Miyazaki's award-winning films such as Spirited Away and Princess Mononoke. The Japanification of Children's Popular Culture brings together contributors from different backgrounds, each exploring a particular aspect of this phenomenon from different angles, from scholarly examinations to recounting personal experiences. The book explains the interconnections among the various aspects of Japanese influence and discusses American responses to anime and other forms of Japanese popular culture.

**America's First Network TV Censor** Robert Pondillo, 2010-04-23. America's First Network TV Censor: The Work of NBC's Stockton Helffrich is a unique examination of early television censorship centered around the papers of Stockton Helffrich, the first manager of the censorship department at NBC. Set against the backdrop of postwar America and contextualized by myriad primary sources, including original interviews and unpublished material, Helffrich's reports illustrate how early censorship of advertising language and depictions of sex, violence, and race shaped the new medium. While other books have cited Helffrich's reports, none have considered them as a body of work complemented by the details of Helffrich's life and the era in which he lived. America's First Network TV Censor explores the ways in which Helffrich's personal history and social class influenced his perception of his role as NBC TV censor and his tendency to ignore certain political and cultural taboos while embracing others. Author Robert Pondillo considers Helffrich's life in broadcasting before and after the Second World War and his censorial work in the context of 1950s American culture and emerging network television. Pondillo discusses the ways that cultural phenomena, including the arrival of the mid-twentieth-century religious boom, McCarthyism, the dawn of the Civil Rights era, and the social upheaval over sex, music, and youth, contributed to a general sense that the country was morally adrift and ripe for communist takeover. Five often-censored subjects—advertising language and depictions of sex, violence, and race—are explored in detail, exposing the surprising complexity and nuance of early media censorship. Questions of whether too many sadistic westerns would coarsen America's children, how to talk about homosexuality without using the word homosexuality, and how best to advertise toilet paper without offending people were on Helffrich's mind; his answers to these questions helped shape the broadcast media we know today.
