Uncertainty in Climate Change Research

Linda O. Mearns, Chris E. Forest, Hayley J. Fowler, Robert

Lempert, Robert L. Wilby, 2025-07-14 This edited volume with open access discusses all aspects of uncertainty in climate

change research with a unique emphasis on decision making under uncertainty and the assessment of various uncertainties

in the landscape of decision making By analyzing uncertainty through the lens of decision making the book seeks to

understand and assess the various uncertainties inherent in climate change research including uncertainties in economic

impacts human health and vulnerability fluctuations in the physical climate system changes in infrastructure and future

climate projections Very little published material exists on the uncertainties regarding vulnerability of different populations

to climate change and so the book characterizes the uncertainty in vulnerability to better formulate solutions to climate

change problems in affected populations The volume will be of interest to students post docs early career scientists and

researchers interested in all aspects of climate change After an introduction that addresses the issue of uncertainty in

general as it pertains to climate change research the book is divided into 5 main sections Section 1 focuses on uncertainty in

policy and decision making and how climate related policy choices impact risk management impact mitigation and adaptation

Section 2 discusses uncertainty in climate change impacts including impacts in agriculture water resources transportation

infrastructure and human health and vulnerability Section 3 analyzes physical climate uncertainties such as Earth system

projections emissions concentrations and sea level rise projections Section 4 details the methods for quantifying uncertainty

from a statistical perspective Section 5 concludes the volume with discussions on special topics and integrated themes on

uncertainty including ethics and uncertainty communication the economics of climate change and integrated modeling for

decision support

**Second Language and Heritage Learners in Mixed Classrooms** Patricia Bayona, Elena

García-Martín, 2022-11-29 This book addresses the complexity of mixed language classroom learning environments in which

heritage learners HL and second language L2 learners are concurrently exposed to language learning in the same physical

space Heritage speakers defined widely as those exposed to the target language at home from an early age tend to display

higher oral proficiency and increased intercultural proficiency but lesser metalinguistic and grammatical awareness than L2

learners The theoretical and pedagogical challenges of engaging both types of learners simultaneously without polarizing the

classroom community dictates the need for well defined differentiated learning strategies in response this book offers best

practices and reproducible pedagogical initiatives and methodologies for different levels of instruction The chapters address

themes including translanguageing linguistic identity metalinguistic awareness and intercultural competence with

contributions from Europe Africa and the United States
