## **Nicomachean Ethics Book Chapter 6:**

**What We Owe to Nonhuman Animals** Gary Steiner, 2023-09-27 This book strongly challenges the Western philosophical tradition's assertion that humans are superior to nonhuman animals. It makes a case for the full and direct moral status of nonhuman animals. The book provides the basis for a radical critique of the entire trajectory of animal studies over the past fifteen years. The key idea explored is that of felt kinship, a sense of shared fate with and obligations to all sentient life. It will help to inspire some deep rethinking on the part of leading exponents of animal studies. The book's strong outlook is expressed through an appeal for radical humility on the side of humans rather than a constant reference to the human-animal divide. Historical figures examined in depth include Aristotle, Seneca, and Kant; contemporary figures examined include Christine Korsgaard and Martha Nussbaum. This book presents an account according to which the tradition has not proceeded on the basis of impartial motivations at all but instead has made a set of pointedly self-serving assumptions about the proper criteria for assessing moral worth. Readers of this book will gain exposure to a wide variety of thinkers in the Western philosophical tradition, historical as well as contemporary. This book is suitable for professionals working in nonhuman animal studies, students, advanced undergraduates, and practitioners working in the fields of philosophy, environmental studies, law, literature, anthropology, and related fields.

**The Routledge Handbook of Contemporary Existentialism** Kevin Aho, Megan Altman, Hans Pedersen, 2024-04-18 Of the philosophical movements of the twentieth century, existentialism is one of the most powerful and thought-provoking. Its engagement with the themes of authenticity, freedom, bad faith, nihilism, and the death of God captured the imagination of millions. However, in the twenty-first century, existentialism is grappling with fresh questions and debates that move far beyond traditional existential preoccupations, ranging from the lived experience of the embodied self, intersectionality, and feminist theory to comparative philosophy, digital existentialism, disability studies, and philosophy of race. The *Routledge Handbook of Contemporary Existentialism* explores these topics and more, connecting the ideas and insights of existentialism with some of the most urgent debates and challenges in philosophy today. Eight clear sections explore the following topics: methodology and technology; social and political perspectives; environment and place; affectivity and emotion; death and freedom; value; existentialism and Asian philosophy; aging and disability. As well as chapters on key figures such as Kierkegaard, Nietzsche,

Heidegger Sartre and Beauvoir the Handbook includes chapters on topics as diverse as Chicana feminism ecophilosophy and the environment Latina existentialism Black nihilism the Kyoto school and southeast Asian existentialism and the experiences of aging disability and death Essential reading for students and researchers in the areas of existentialism and phenomenology The Routledge Handbook of Contemporary Existentialism will also be of interest to those studying ethics philosophy and gender philosophy of race the emotions and philosophical issues in health and illness as well as related disciplines such as Literature Sociology and Political Theory **Anime and Philosophy** Josef Steiff,Tristan D.

*Irrational Publics and the Fate of Democracy* Stephen J.A. Ward, 2024-10-15 Across cultures democracies struggle with intolerant groups misinformation social media conspiracies and extreme populists Egalitarian cultures cannot always withstand this swing towards the irrational In *Irrational Publics and the Fate of Democracy* Stephen Ward combines history and evolutionary psychology for a comprehensive view of the problem arguing that social irrationality is likely to occur when social tensions trigger a person's enemy stance ancient extreme traits in human nature such as aggressiveness desire for domination paranoia of the other and us versus them tribalism Analyzing eruptions of public irrationality from apocalyptic medieval crusades and Nazi doctors in extermination camps to suicidal cults Ward presents his evolutionary theory of public irrationalism demonstrating that human nature has both extreme Darwinian traits promoting competition and sociable traits of cooperation and empathy The issue is which set of traits will be activated by the social ecology Extreme traits once adaptive when humans were hunter gatherers have become maladaptive and dangerous Catalyzed by intolerant media and demagogues the swing towards the irrational weakens democracy and may lead to human extinction through nuclear holocaust *Irrational Publics and the Fate of Democracy* concludes with practical recommendations on what society should do to resist the engines of unreason within and without us

*Human Nature and the Causes of War* John David Orme, 2018-04-07 What are the causes of war Wars are generally begun by a revisionist state seeking to take territory The psychological root of revisionism is the yearning for glory honor and power Human nature is the primary cause of war but political regimes can temper or intensify these passions This book examines the effects of six types of regime on foreign policy monarchy republic and sultanistic charismatic and military and totalitarian dictatorship Dictatorships encourage and unleash human ambition and are thus the governments most likely to begin ill considered wars Classical realism modified to incorporate the impact of regimes and beliefs provides a more convincing explanation of war than neo realism Not Losing Face

Richard Michael Head, 2025-01-01 What power is may be or imagined to be through human considerations It is vital since the energy used to generate power is life's social and cultural fabric Since power is understood in many ways it shows that it is too complicated to just conveniently rationalize from a compartmental methodology However there is also a paradox here since power can be reduced to the simplicity of acting in a certain way or not acting in a certain way This acting may be self induced or from pressure applied by others and societal expectations Hence power is multifaceted but also of a binary yes or no within its potentiality and actuality It is the versatile nature of power within the space of its binary disposition that the book interweaves with When interweaving eleven faces have been selected to offer what power is and does Eight are prominent social thinkers or simply thinkers who consider what life is as it may be incorrect just to restrict or label them to the social aspect of living as being of and in existence is more than that Another is the physical evolving environment through which all living beings enjoy movement One other participates with power through religious filters of production and the remaining one is an artistic appreciation of how to power My face of power filters these faces Blindness and
