Shanker is renowned for using cutting-edge neuroscience to help children feel happy and think clearly by better regulating themselves. In his new book *Reframed*, Shanker explores self-regulation in wider social terms. Whereas his two previous books *Calm Alert* and *Learning and Self-Reg* were written for educators and parents, *Reframed* the final book in the trilogy unpacks the unique science and conceptual practices that are the very lifeblood of *Self-Reg*, making it an accessible read for new *Self-Reggers*. *Reframed* is grounded in the three basic principles of Shanker's *Self-Reg*. There is no such thing as a bad, lazy or stupid kid. All people can learn to self-regulate in ways that promote rather than constrict growth. There is no such thing as a fixed outcome; trajectories can always be changed at any point in the lifespan if only we have the right knowledge and tools. Only a society that embraces these principles and strives to practice them, argues Shanker, can become a truly just society. The paradigm revolution presented in *Reframed* not only helps us understand the harrowing time we are living through but inspires a profound sense of hope for the future. Shanker shows us how to build a compassionate society, one mind at a time. *Caring for Caring* Jane Edwards, 2016-07-15 No one wants to relegate our wisdom-rich elders to the demeaning borders of our society.
