**Using ESL Students' First Language to Promote College Success** Andrea Parmegiani, 2019-01-15. Emerging from a critical analysis of the global power of English and how it relates to academic literacy and culturally responsive pedagogy, this book presents translanguaging strategies for using ESL students' mother tongue as a resource for academic literacy acquisition and college success. Parmegiani offers a strong counterpoint to the English-only movement in the United States. Grounded in a case study of a learning community linking Spanish and English academic writing courses, he demonstrates that a mother tongue-based pedagogical intervention and the strategic use of minority home languages can promote English language acquisition and academic success.

*The Beliefs and Experiences of World Language Teachers in the US* Pamela M. Wesely, 2024-06-11. This book tells the stories of 15 world language (WL) teachers in the United States at elementary and secondary levels through rich descriptions of their lived worlds and experiences. In-depth interviews, extensive observations, learner interviews, and document and environment analysis illustrate in detail how teacher beliefs relate to their practices and are mediated and moderated by their learners' institutional demands, equity, and access to WL education and other factors. The chapters provide a deep and robust explanation of individual teachers' teaching lives and a cross-contextual comparison of their experiences, shining a light on the realities and demands of modern US schools. Grounded in the research literature on language teacher beliefs and cognition, this book takes the stance that all teaching is situated and contextual and that addressing teachers' methods, practices, and knowledges in ways that are divorced from their setting and environment has serious limitations. It offers fascinating insights for researchers, language educators, and pre- and in-service teachers with reflection questions at the end of each chapter to guide readers in drawing connections with their own practice interests and contexts.

Highlights include the Basque question, indigenous rights, the Christopher Columbus controversy, bullfighting, and the war on drugs in Colombia. Each chapter concludes with a Resource Guide and useful vocabulary to facilitate expression in Spanish.

*Graduate Students Becoming Qualitative Researchers* Char

Ullman, Kate Mangelsdorf, Jair Muñoz, 2020-11-23 Through conducting an ethnographic study about doctoral students from traditionally underrepresented groups who are learning to conduct ethnographic research this volume offers unique insight into the challenges and experiences through which these students develop their skills and identities as qualitative researchers. Foregrounding the stories and perspectives of students from minority backgrounds including Latinx Black differently abled and queer students *Graduate Students Becoming Qualitative Researchers* identifies how the process of learning to conduct ethnographic research underpins doctoral students' success, confidence and persistence in the academy. Chapters follow students during a one year ethnographic research course during which they learn about ethnography and also conduct observations, write field notes, interview participants and gather artifacts. Offering important pedagogical insights into how ethnography and academic writing are communicated, the text also tackles questions of access and diversity within scholarship and highlights barriers to first generation and minoritized students' success, including impostor syndrome, stereotype vulnerability and access to time, knowledge and capital. This volume will prove valuable to doctoral students, postgraduate researchers, scholars and educators conducting qualitative research across the fields of education and rhetoric as well as the humanities and social sciences. It will also appeal to those interested in multiculturalism and diversity within the education sector.

**New to the LSP classroom? A selection of monographs on successful practices** Martina Vránová, 2023-05-23 As Languages for Specific Purposes have always been defined as student oriented, the rationale behind this volume is to use the rather neglected niche of the other necessary agent of language instruction and thus focus on the LSP practitioner. This turn towards the instructor has been motivated by the fact that a great number of LSP practitioners enter their jobs without previous expertise. They lack LSP education or they may not even have a background in applied linguistics. This motivation has proven valid as many of the volume's contributors have faced this particular situation in their professional lives. For insights into the LSP field and guidelines on the best practices they must rely on their colleagues who offer to share their experience through workshops, conferences or papers, which is what this volume provides. The primary goal of this volume is to present considerations of what challenges LSP practitioners face and should be prepared for in their jobs and to provide practice tested methodological guidelines on such demanding teaching techniques as blended and flipped learning or tandem learning. All papers have been written by LSP practitioners and researchers in higher education. Thus this volume provides both guidance and self reflection. In other words, it is written by experienced LSP practitioners for aspiring LSP practitioners about how they see themselves and what effort they make to meet the challenges of their jobs. As proof that LSP practice is a global challenge, papers have been collected from many European countries, the USA, Uruguay. Even though most papers are naturally concerned with English being the lingua franca of today, the collection also features guidelines for teaching Spanish, French and Dutch for specific purposes. Moreover, the target disciplines these languages are taught for encompass business, engineering, sociology or medicine, thus supporting the assumption of the universal character of
