Sustainable Land Management Floor Brouwer, 2008-10-31 In large parts of the world the reduction in the viability of agriculture and rural areas is an escalating problem Sustainable Land Management offers a contemporary overview of the strategies employed to cope with the marginalisation of agriculture through analyses of case studies and regional trends in marginalisation The authors argue that complexities and driving forces governing marginalisation are not always the same across nations and regions due to climate geography economics legislation and political status This book illustrates in what form these complexities exist and how these unravel at the national and regional levels As the need to understand and cope with marginalisation processes has

developed the concept of multi functionality has also gained a vital place in the string of coping strategies This work contributes essential knowledge for the development of marginalisation mitigation policy actions across the globe Informative and well documented this book will appeal to those researching and working in the fields of agricultural and resource economics rural geography environmental governance and sustainable development The German Spa in the Long Eighteenth Century Ute Lotz-Heumann,2021-07-25 Shifting the focus from the medical use of spas to their cultural and social functions this study shows that eighteenth and early nineteenth century German spas served a vital role as spaces where new ways of perceiving the natural environment and conceptualizing society were disseminated Although spas continued to be places of health and healing their function and perception in central Europe changed fundamentally around the middle of the eighteenth century This transformation of the role of the spa occurred in two ways First the spa popularized a new perception of the landscape with a preference for mountains and the seacoast forming the basis for the cultural assumptions underlying modern tourism Second contemporaries perceived spas as meeting places comparable to institutions of Enlightenment sociability like coffeehouses salons and Masonic lodges Spas were conceived as spaces where the nobility and the bourgeoisie could interact on an equal footing thereby overcoming the constraints of early modern social boundaries These changes were negotiated through both personal interactions at spas and an increasingly sophisticated published spa discourse The late eighteenth and early nineteenth century German spa thus helped to bring about social and cultural modernity *Regular Guests* Danielle Spera,2024-09-02 Jewish Presence on Semmering The Semmering the popular summer and winter holiday destination has a long association with Jewish guests This history dates back to the Jewish trade routes in the Middle Ages when merchants passed through the area and it continues to the present day With the expansion of the railway elegant hotels were constructed kosher infrastructure was offered Jewish doctors opened facilities for treatments and cures and sports and leisure culture developed The Semmering became a destination for health tourism as well as the center of vibrant social life Celebrities like Sigmund Freud Arthur Schnitzler Berta Zuckerkandl and others turned into regular guests Some even purchased property built lavish villas and dressed in local costumes as a sign of their affiliation However the rise of National Socialism marked the end of carefree vacations leading to the expulsion and expropriation of many After the Second World War the Semmering attracted a new range of visitors survivors of the Holocaust from neighboring countries and their children who longed to forget their painful past as quickly as possible For the first time this book takes a detailed look at Jewish life in the Semmering region Exploring the Boundaries of Landscape Architecture Simon Bell,Ingrid Herlin,Richard Stiles,2011-02-20 What have cultural anthropologists historical geographers landscape ecologists and environmental artists got in common Along with eight other disciplines from domains as diverse as planning and design the arts and humanities as well as the social and natural sciences they are all fields of importance to the theory and practice of landscape architecture In the context of the EU funded LE NOTRE Project carried out under the auspices of

ECLAS the European Council of Landscape Architecture Schools international experts from a wide range of related fields were asked to reflect each from their own perspective on the interface between their discipline and landscape architecture The resulting insights presented in this book represent an important contribution to the development the discipline of landscape architecture as well as suggesting new ways in which future collaboration can help to create a greater interdisciplinary richness at a time when the awareness of the importance of the landscape is growing across a wide range of disciplines Exploring the Boundaries of Landscape Architecture is the first systematic attempt to explore the territory at the boundaries of landscape architecture It addresses academics professionals and students not just from landscape architecture but also from its neighbouring discipline all of whom will benefit from a better understanding their areas of shared interest and the chance to develop a common language with which to converse Wien und Umgebung (mit Ausflügen in das Rax- und Semmering-gebiet und in die Wachau) Grieben-Verlag,1927 **The Rough Guide to Austria** Jonathan Bousfield,Rob Humphreys,2001 Venture across every inch of this prosperous and stable central European country from the cosmopolitan capital of Vienna packed with cultural offerings and late night musikcafes to the awesome Alpine backwaters of the Tyrol or winemaking villages Learn how to stretch your budget in what can be an expensive country to visit 40 maps color photos

The Alps Jon Mathieu,2019-02-25 Stretching 1 200 kilometres across six countries the colossal mountains of the Alps dominate Europe geographically and historically Enlightenment thinkers felt the sublime and magisterial peaks were the very embodiment of nature Romantic poets looked to them for divine inspiration and Victorian explorers tested their ingenuity and courage against them Located at the crossroads between powerful states the Alps have played a crucial role in the formation of European history a place of intense cultural fusion as well as fierce conflict between warring nations A diverse range of flora and fauna have made themselves at home in this harsh environment which today welcomes over 100 million tourists a year Leading Alpine scholar Jon Mathieu tells the story of the people who have lived in and been inspired by these mountains and valleys from the ancient peasants of the Neolithic to the cyclists of the Tour de France Far from being a remote and backward corner of Europe the Alps are shown by Mathieu to have been a crucible of new ideas and technologies at the heart of the European story **Driving Germany** Thomas Zeller,2007 Published in Association with the German Historical Institute Washington D C Hitler s autobahn was more than just the pet project of an infrastructure friendly dictator It was supposed to revolutionize the transportation sector in Germany connect the metropolises with the countryside and encourage motorization The propaganda machinery of the Third Reich turned the autobahn into a hyped up icon of the dictatorship One of the claims was that the roads would reconcile nature and technology Rather than destroying the environment they would embellish the landscape Many historians have taken this claim at face value and concluded that the Nazi regime harbored an inbred love of nature In this book the author argues that such conclusions are misleading Based on rich archival research the book provides the first scholarly account of the landscape of the autobahn Semmering Josef Wagner,Irene

coined the term Promenadology or the science of Strollology and developed this into a complex and far sighted planning and design discipline Given that the landscape as an idea only exists in our heads Burckhardt s writings and drawings are not so much concerned with beautiful vistas but focus instead on the multi faceted interaction a simple walk taker has with his environment To those who observe the environment with their eyes wide open interesting questions will arise again and again for example why city and country can no longer be separated so easily in the face of progressive urbanization Or why we consider a viaduct to be beautiful but a nuclear power station an intrusion And also why gardens are works of art and should therefore be appraised as such This book contains 28 texts by the design and planning critic for the first time in English with the focus on landscapes gardens as an art form and the science of strollology **Spiritual Vegetation** Guita Lamsechi, Beatrice Trînca, 2022-04-11 This volume concerns premodern understandings of vegetal nature that encompass multiple semantics and perspectives Scholars from the disparate fields of art history literature and religious studies present tantalizing studies of trees and plants in sacred and secular thought Some discuss the concept of the Book of Nature and its implications Others explore narratives of symbiosis between humans and vegetal material tree dwelling hermits spirits metamorphosing into wood flowers or trees that sprout from bodies or the dissolution of the self into the natural world Complementary to these approaches are studies that suggest a collapsing of time and space in spiritually charged yet ambiguous natural motifs or topographies where forests or groves are spaces of transformative experience **Fodor's Austria** Fodor's, Inc. Fodor's Travel Publications, 2009 Examines the cultural attractions of Vienna Salzburg and other areas of Austria and offers tips on accommodations restaurants walking and driving tours sightseeing shopping and seasonal festivals and events **Leisure cultures in urban Europe, c.1700-1870** Peter Borsay, Jan Hein Furnee, 2015-12-01 This collection of essays examines the history of urban leisure cultures in Europe in the transition from the early modern to the modern period The volume brings together research on a wide variety of leisure activities which are usually studied in isolation from theatre and music culture art exhibitions spas and seaside resorts to sports and games walking and cafes and restaurants The book develops a new research agenda for the history of leisure by focusing on the complex processes of cultural transfer that were fundamental in transforming urban leisure culture from the British Isles to France Spain Italy Sweden Austria and the Ottoman Empire How did new models of organising and experiencing urban leisure pastimes travel from one European region to another Who were the main agents of cultural innovation and appropriation How did entrepreneurs citizens and urban authorities mediate and adapt foreign influences to local contexts How did the increasingly entangled character of European urban leisure culture impact upon the ways men and women from various classes identified with their social cultural or proto national communities Accessible and wide ranging this volume offers students and scholars a broad overview of the history of urban leisure culture in eighteenth and nineteenth century Europe The agenda setting focus on transnational cultural transfer will stimulate new questions and contribute to a more integrated study of the rise of
