## Semptember Trials Economics Paper 2 Memo For 2014:

*Market and Competition Authorities* Annetje Ottow,2015-03-26 Market and competition authorities operate in a complex environment with conflicting stakeholder demands Balancing the various interests of the authority and stakeholder in an objective and impartial manner is strategic to achieving the goals of the legislation imposed In a fresh approach examining the actions of an authority when a regulation is applied Annetje Ottow argues the vital importance of the behaviour of authorities focusing on five fundamental good agency principles legality independence transparency effectiveness and responsibility or LITER These principles provide agencies and those reviewing their actions with a framework for agency design and action Combining theory and practice to provide insight into agencies organization and behaviour this book outlines and analyses behavioural issues using an ecosystemic method addressing how independent agencies should be assessed and which principles should apply Using cases from the Netherlands and the UK Ottow examines the key processes of authorities against the LITER principles and opens the debate on how to regulate the agency

**We Never Expected That** Avner Barnea,2021-08-30 The disciplines of strategic intelligence at the governmental level and competitive business intelligence constitute accepted methods of decision supporting to prevent mistakes and strategic surprise This research discovered that many researchers in the intelligence field feel that intelligence methodology in both contexts has reached a glass ceiling Thus far research has focused separately on national intelligence and intelligence in business without any attempt to benchmark from one field to the other This book shows that it is possible to use experience gained in the business field to improve intelligence practices in national security and vice versa through mutual learning The book's main innovation is its proposition that mutual learning can be employed in the context of a model distinguishes between concentrated and diffused surprises to provide a breakthrough in the intelligence field thereby facilitating better prediction of the surprise development We Never Expected That A Comparative Study of Failures in National and Business Intelligence focuses on a comparison between how states through their intelligence organizations cope with strategic surprises and how business organizations deal with unexpected movement in their field Based on this comparison the author proposes a new model which can better address the challenge of avoiding strategic surprises This book can contribute significantly to the study of intelligence which will become more influential in the coming years

**Intellectual Property Excesses** Enrico Bonadio,Aislinn O'Connell,2022-06-30 This collection of essays highlights the sometimes absurd outcomes which an unjustified overprotection of intellectual property IP may lead to It collects and comments on a series of IP disputes which have taken the notion of IP protection to extremes From individuals being sued for hundreds of thousands of dollars for sharing a playlist to sports spectators being arrested for wearing the wrong dresses passing through granting patents for inventions obtained by misappropriating traditional knowledge and trademark protection of merely descriptive signs this book brings together a broad range of examples from across the IP spectrum where protection and enforcement have been used or threatened on

unreasonable and or untenable grounds The aim of the book is to criticise these excesses precisely because they harm IP and because they contribute to creating an environment where more and more people are led to hate IP and view it as a protectionist regime which discourages creativity in innovation and ends up safeguarding the owners of monopolistic rights which restrict trade competition and people's freedom This is not therefore a book against IP it is instead a call for change and an attempt to save IP through critiquing its excesses and preventing such a fascinating area of law from continuing to be an easy target for criticism The book includes a foreword by Jason Mazzone Albert E Jenner Jr Professor of Law at the University of Illinois USA *China and Its Small Neighbors* Sung Chull Kim,2023-03-01 In *China and Its Small Neighbors* Sung Chull Kim examines the political implications of the economic asymmetry between China and its small neighbors part of wider changes in international relations brought about by the rise of China While being critical of the current trend that focuses on the China U S rivalry alone Kim argues that a microanalysis of China's advances toward its neighbors is a guide to understanding the trajectory of China's expanding influence and transitions in world politics more broadly Economic asymmetry as seen in trade concentration non transparency and reliance on bilateral aid has made China's small neighbors vulnerable on the political front thus generating potential threats to their sovereignty and independence Because China has the upper hand in the bilateral relationships these weak states practice dual core hedging as a strategy for survival They hedge on China for expected economic benefits and at the same time hedge against their powerful neighbor to mitigate the risks involved in that hedging on Each small state's mode of hedging depends on its degree of vulnerability and its availability of policy instruments such as multilateral institutions and bilateral partnerships with extra regional powers

**Trade Makes States** Tobias Hagmann,Finn Stepputat,2023-05-01 *Trade Makes States* highlights how trade and the circulation of goods are central to Somali societies economies and politics Drawing on multi site research from across East Africa's Somali inhabited economic space which includes areas of Kenya Djibouti Uganda and Ethiopia this volume highlights the interconnection between trade and state building after state collapse It scrutinises the politics of circulation between competing public administrations which seek to generate revenue and to control infrastructures along major trade corridors Connecting classic debates on state formation with recent scholarship on logistics and cross border trading *Trade Makes States* argues that the facilitation and capture of commodity flows have been instrumental in making and unmaking states across the Somali territories Aspiring state builders are thus confronted with the challenge of governing the flow of goods in order to rule over lands and peoples The contributors to this volume draw attention to the ingenuities of transnational Somali markets which often appear to be self governed Their dynamism and everyday administration by a host of actors provide important insights into contemporary state formation on the margins of global supply chain capitalism **US Foreign Policy Decision-Making from Truman to Kennedy** A. Hybel,2014-03-12 The book has three objectives to expose students to the ways different US presidents handled major foreign policy making problems to test the explanatory value of alternative

decision making models And to reintroduce students to a wide range of critical US foreign policy issues     *Congressional Record* United States.
