*2012 GCSE English results* Great Britain: Parliament: House of Commons: Education Committee, 2013-06-11 The 2012 GCSE English results prompted significant controversy which ultimately resulted in an application for judicial review This report sets out the background to these events and identifies lessons to be learned The problems with GCSE English can be traced back to the 2007/09 development phase of the qualification in particular the turbulence which resulted from the shift away from a mostly linear to a modular system combined with a high proportion of controlled assessment and generous marking tolerances Exam board experts raised concerns at the time but these were not acted upon by the regulator the then interim Ofqual Further difficulties arose because of pressures from the school accountability system The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening with consequences for grade awarding The current status of Ofqual as an independent regulator accountable to Parliament is the right one However the Coalition Government is bringing in wholesale changes to

GCSEs and A levels to a tight timetable and at the same time Ofqual must have systems in place The Committee is also concerned that there is a rush towards separate exam systems for England Wales and Northern Ireland without careful reflection on what might be lost or consensus that this is the right thing to do

*The Strong Sylow Theorem for the Prime  $p$  in Projective Special Linear Locally Finite Groups - Part 3 of a Trilogy* Dipl.-Math. Felix F. Flemisch, 2023-03-30 In Part 3 of the Trilogy Characterising Locally Finite Groups Satisfying the Strong Sylow Theorem for the Prime  $p$  About the Strong Sylow Theorem for the Prime  $p$  in Simple Locally Finite Groups The Strong Sylow Theorem for the Prime  $p$  in Projective Special Linear Locally Finite Groups we continue the program begun in 10 to optimise along the way 1 its beautiful Theorem about the first type  $A_n$  of infinite families of finite simple groups step by step to further types by proving it for the second type  $A$   $PSL_n$  We start with proving the Conjecture 2 of 10 about the General Linear Groups over commutative locally finite fields stating that their rank is bounded in terms of their  $p$  uniqueness and then break down this insight to the Special Linear Groups and the Projective Special Linear  $PSL$  Groups over locally finite fields We close with suggestions for future research regarding the remaining five rank unbounded types the Classical Groups and the way 2 regarding the locally finite and  $p$  soluble groups and regarding Augustin Louis Cauchy's and variste Galois contributions to Sylow theory in finite groups
