MARKS: 150

MARKING PRINCIPLES:

1. Penalties for foreign items are applied only if the candidate is not losing marks elsewhere in the question for that item. No double penalty applied.
2. Penalties for placement or poor presentation (e.g. details) are applied only if the candidate is earning marks on the figures for that item.
3. Full marks for correct answer. If answer incorrect, mark the workings provided.
4. If a pre-adjustment figure is shown as the final figure, award one mark. Not the method mark for the answer. Note: if figures are stipulated in memo for components of workings, these do not carry the method for final answer.
5. Unless otherwise indicated, the positive or negative effect of any figure must be considered to award the mark. If no + or - sign or bracket is provided, assume that the figure is positive.
6. Where indicated, part-marks may be awarded to differentiate between differing qualities of answers from candidates.
7. This memorandum is not for public distribution, as certain items might imply incorrect treatment. The adjustment made are due to nuances in a certain question.
8. Where penalties are applied, the marks for that section of the question cannot be a final negative.
9. Where method marks are awarded for operation, the marker must inspect the reasonableness of the answer before awarding the mark.
10. Operation means 'Check operation'. 'One part correct' means 'Operation & one part correct'. Note: check operation must be +, x, -, or per candidates operation.
11. In awarding method marks, ensure that candidates do not get full marks for any item that is incorrect, indicate with a ☒. Note: do not award marks for workings if numerator and denominator are swapped-this also applies to ratios.
12. Be aware of candidates who provide valid alternatives beyond the marking guideline.
13. Codes: f=foreign item; p=placement.

After Saigon's Fall Amanda C. Demmer, 2021-04-08 A new understanding of US policy toward Vietnam after the end of the Vietnam War based on fresh archival discoveries

Leap of Faith Michael J. Mazarr, 2019-03-19 The dramatic insider account of why we invaded Iraq the motivations that drove it and the frustrations of those who tried and failed to stop it leading to the most costly misadventure in US history A single disastrous choice in the wake of 9 11 the decision to use force to remove Saddam Hussein from power did enormous damage to the wealth well being and reputation of the United States Few errors in U S foreign policy have had longer lasting or more harmful consequences Yet how the decision came to be made remains shrouded in mystery and mythology To this day even the principal architects of the war cannot agree on it Michael Mazarr has interviewed dozens of players involved in the deliberations about the invasion of Iraq and has reviewed all the documents so far declassified He paints a devastating portrait of an administration fueled by righteous conviction yet undercut by chaotic processes rivalrous agencies and competing egos But more than the product of one bungling administration the invasion of Iraq emerges here as a tragically typical example of modern U S foreign policy fiascos Leap of Faith asks profound questions about the limits of US power and the accountability for its use It offers lessons urgently relevant to stave off similar disasters today and in the future

Weapons in Space Aaron Bateman, 2024-05-07 A new and provocative take on the formerly classified history of accelerating superpower military competition in space in the late Cold War and beyond In March 1983 President Ronald Reagan shocked the world when he established the Strategic Defense Initiative SDI derisively known as Star Wars a space based missile defense program that aimed to protect the US from nuclear attack In Weapons in Space Aaron Bateman draws from recently declassified American European and Soviet documents to give an insightful account of SDI situating it within a new phase in the militarization of space after the superpower détente fell apart in the 1970s In doing so Bateman reveals the largely secret role of military space technologies in late Cold War US defense strategy and foreign relations In contrast to existing narratives Weapons in Space shows how tension over the role of military space technologies in American statecraft was a central source of SDI's controversy even more so than questions of technical feasibility By detailing the participation of Western European countries in SDI research and development Bateman reframes space militarization in the 1970s and 1980s as an international phenomenon He further reveals that even though SDI did not come to fruition it obstructed diplomatic efforts to create new arms control limits in space Consequently Weapons in Space carries the legacy of SDI into the post Cold War era and shows how this controversial program continues to shape the global discourse about instability in space and the growing anxieties about a twenty first century space arms race

Jimmy Carter presidential administration From U S Department of State Office of the Historian website **The Emergency State** David C. Unger, 2013-08-27 From the New York Times s veteran foreign policy editorialist a lucid analysis of the harm caused by America s increasingly misdirected national security state America is trapped in a state of war that has consumed our national life since before Pearl Harbor Over seven decades and several bloody wars Democratic and Republican politicians alike have assembled an increasingly complicated ineffective and outdated network of security services Yet this pursuit has not only damaged our democratic institutions and undermined our economic strengths it has fundamentally failed to make us safer In The Emergency State senior New York Times writer David C Unger reveals the hidden costs of America s bipartisan obsession with achieving absolute national security and traces a series of missed opportunities from the end of World War II through the presidency of Barack Obama when we could have rethought our defense strategy but did not Provocative insightful and refreshingly nonpartisan this is the definitive untold story of how America became so vulnerable and how it can build real security again *Discussion Memorandum* Financial Accounting Standards Board, 1983
