

Using the STP8000 series with the car kit

All of the controls on the radio function as normal. Calls can be initiated, answered and ended by using the controls on the radio. Refer to the STP8000 user guide for further details. Receive audio is amplified and fed to the car kit loudspeaker. The user's voice is picked up by the hands-free remote microphone, which should, ideally, be facing towards the user.

Volume Control

Set the loudspeaker volume with the radio's volume control.

Half-Duplex Calls using Remote Microphone & PTT

Press the external PTT button and speak in a normal conversational manner; release to listen.

Full-Duplex Calls using the Remote Microphone

Both parties can speak and listen at the same time with hands free. Ensure that the radio volume is set to the minimum comfortable level.

Calls using Optional Accessories

A fist microphone may be used with the car kit. The car kit automatically senses which is in use and functions as appropriate.

Fist Microphone

When the fist microphone is lifted, the remote microphone is automatically muted, but the loudspeaker remains in use. Press the PTT button on the fist microphone to talk and release to listen. Any alert tones produced by the radio during transmit will override the loudspeaker muting and be audible.

Fist Microphone soft key

The soft key of the fist microphone, invokes the assigned function programmed in the STP8000 being used.

Private/Public Mode Key (on radio, if programmed)

During calls, this key switches between accessories (e.g., transfer from handset to handsfree).

Alarm Foot-switch

Press the foot-switch to initiate an emergency call.

Data Communication

An RS232 serial data port and an USB serial port is provided in the interface unit. Connect a PC or data terminal (with appropriate application software) to the socket labelled "DATA" via a standard 9-way serial lead (not null modem). Follow the instructions supplied with the application software. Disconnect lead from interface unit when not in use.

Optional Functions

The following functions are provided as standard and will be connected if specified prior to installation.

Ignition Sense

If connected, the radio will sense the state of the ignition switch. When the ignition is turned off, a configurable timer is started. If the timer is set to zero, turning off the ignition switch switches off the radio. If the timer is not set to zero, the following message is displayed and the timer started.

Press any key to stop switch off.

Pressing any key will reset the timer. When the timer period expires, the radio will switch off and any unread messages will be lost.

If the ignition switch is turned on before the timer expires, normal operation will resume.

The timer parameters are set in the radio configuration. Charging is not halted by switching off the radio.

External Mute

If connected, the vehicle entertainment system will be muted during calls.

External Alert

If connected, the vehicle's horn, or other external sounder, repeats incoming call alerts for audibility outside the vehicle in noisy environments. *Note: This function must not be used if local regulations do not permit its use.*

Battery Charging

The battery charges whether the STP8000 is switched on or off and terminates automatically. The indicator LED on the radio glows orange during charging, green when charged and red under fault conditions — see STP8000 radio user guide for further information.

Problems and Hints

If the car kit or radio fails to function, check the following.

- The radio is properly engaged in the cradle.
- If ignition sensing is enabled, check ignition is switched on.
- The battery may be discharged (the radio requires battery power to transmit). Allow the battery to charge.
- The radio functions correctly when removed from the car kit.
- The in-line fuses to the vehicle battery have not failed.
- The vehicle battery is not discharged.
- The antenna and its connections are functional.

If the problem persists, refer to your supplier.
