So You Think You're Human A Brief History Of Humankind:

So You Think You're Human? Felipe Fernández-Armesto, 2005 You think you're human But what does that mean How can humanity be defined Felipe Fernandez Armesto takes us on an enlightening and provocative journey through the history of humankind to reveal the challenges to our most fundamental belief that we are and have always been human Fernandez Armesto investigates advances in artificial intelligence and genetics and asks what these mean for the future of human values human rights and the defence of human dignity The book illustrates how our concept of humankind has changed over time and how our current understanding of this has been shaken by new challenges from science and philosophy

Before Humanity Stefan Herbrechter, 2021-12-13 Before Humanity takes up the question of the post in the posthuman from the position of ancestrality Speculating about who or what comes after the human inevitably throws us back to our very beginnings The before in Before Humanity in this context takes on two meanings 1 what happened before we apparently became human which translates into a critical reading of paleo anthropology as well as evolutionary narratives of hominization 2 living through the end of a certain humanist anthropocentric notion of humanity what tasks lie before us which provokes a critical reading of the Anthropocene and current narratives of geologization In other words Before Humanity investigates conceptualizations of humanity and asks whether we have ever been human and if not what could or maybe what should we have been

Global History, Globally Sven Beckert, Dominic Sachsenmaier, 2018-02-22 In recent years historians in many different parts of the world have sought to transnationalize and globalize their perspectives on the past Despite all these efforts to gain new global historical visions however the debates surrounding this movement have remained rather provincial in scope Global History Globally addresses this lacuna by surveying the state of global history in different world regions Divided into three distinct but tightly interweaved sections the book's chapters provide regional surveys of the practice of global history on all continents review some of the research in four core fields of global history and consider a number of problems that global historians have contended with in their work The authors hail from various world regions and are themselves leading global historians Collectively they provide an unprecedented survey of what today is the most dynamic field in the discipline of history As one of the first books to systematically discuss the international dimensions of global historical scholarship and address a wealth of questions emanating from them Global History Globally is a must read book for all students and scholars of global history

Religious Hatred Paul Hedges, 2021-03-11 Why does religion inspire hatred Why do people in one religion sometimes hate people of another religion and also why do some religions inspire hatred from others This book shows how scholarly studies of prejudice identity formation and genocide studies can shed light on global examples of religious hatred The book is divided into four parts focusing respectively on theories of prejudice and violence historical developments of antisemitism Islamophobia and race contemporary Western antisemitism and Islamophobia and prejudices beyond the West in the Islamic Buddhist and Hindu traditions Each part ends with a special

focus section Key features include A compelling synthesis of theories of prejudice identity and hatred to explain Islamophobia and antisemitism An innovative theory of human violence and genocide which explains the link to prejudice Case studies of both Western antisemitism and Islamophobia in history and today alongside global studies of Islamic antisemitism and Hindu and Buddhist Islamophobia Integrates discussion of race and racialisation as aspects of Islamophobic and antisemitic prejudice in relation to their framing in religious discourses Accessible for general readers and students it can be employed as a textbook for students or read with benefit by scholars for its novel synthesis and theories The book focuses on antisemitism and Islamophobia both in the West and beyond including examples of prejudices and hatred in the Islamic Hindu and Buddhist traditions Drawing on examples from Europe North America MENA South and Southeast Asia and Africa Paul Hedges points to common patterns while identifying the specifics of local context Religious Hatred is an essential guide for understanding the historical origins of religious hatred the manifestations of this hatred across diverse religious and cultural contexts and the strategies employed by activists and peacemakers to overcome this hatred

The Ecological Thought Timothy Morton, 2012-04-02 In this passionate lucid and surprising book Timothy Morton argues that all forms of life are connected in a vast entangling mesh This interconnectedness penetrates all dimensions of life No being construct or object can exist independently from the ecological entanglement Morton contends nor does Nature exist as an entity separate from the uglier or more synthetic elements of life

The Oxford Handbook of Philosophy and Disability Adam Cureton, David Wasserman, 2020 This Handbook introduces philosophers as well as other scholars in the humanities and social sciences to one of the most dynamic new areas of philosophical inquiry Disability raises some of the deepest conceptual and normative issues about human embodiment and well being dignity respect justice and equality and personal and social identity But it also raises pressing practical questions for educational health reproductive and technology policy and confronts controversial questions about the scope and direction of the human and civil rights movements The Handbook addresses these issues and more with contributions from some of the most prominent philosophers in the field The clarity it brings to these discussions demonstrates fully the continued centrality and importance of philosophical inquiry

Abysmal Gunnar Olsson, 2010-03-15 People rely on reason to think about and navigate the abstract world of human relations in much

the same way they rely on maps to study and traverse the physical world Starting from that simple observation renowned geographer Gunnar Olsson offers in *Abysmal* an astonishingly erudite critique of the way human thought and action have become deeply immersed in the rhetoric of cartography and how this cartographic reasoning allows the powerful to map out other people's lives A spectacular reading of Western philosophy religion and mythology that draws on early maps and atlases Plato Kant and Wittgenstein Thomas Pynchon Gilgamesh and Marcel Duchamp *Abysmal* is itself a minimalist guide to the terrain of Western culture Olsson roams widely but always returns to the problems inherent in reason to question the outdated assumptions and fixed ideas that thinking cartographically entails A work of ambition scope and sharp wit *Abysmal* will appeal to an eclectic audience to geographers and cartographers but also to anyone interested in the history of ideas culture and art

Vision and Visual Perception Duco A. Schreuder, 2014-12-03 Vision is about insight and visual perception is about cognition and they form the foundation of how we see the world Duco A. Schreuder a physicist and psychologist explores the finer details of each in this groundbreaking book that explores human consciousness and perception Sharing virtually everything he's learned over a varied career spanning more than sixty years he examines a wide array of topics including how we understand what we visually process how we store and retrieve information the role that neurons play in how what we see and much more While Schreuder isn't afraid to disagree with other leading thinkers he relies on science and focuses on the facts behind it so you can understand lighting visual perception engineering design and applied and experimental physics Looking is about insight whereas seeing is about knowledge and you need to know how each one works to truly understand how humanity views the world Whether you're an illuminating engineer considering the fundamentals of the trade or a student or professional in an allied discipline you'll be well served by taking a closer look at *Vision and Visual Perception*

Race and the Crisis of Humanism Kay Anderson, 2012-12-06 The idea that humankind constituted a unity albeit at different stages of development was in the 19th century challenged with a new way of thinking The savagery of certain races was no longer regarded as a stage in their progress towards civilisation but as their permanent state What caused this shift In Kay Anderson's provocative new account she argues that British colonial encounters in Australia from the late 1700s with the apparently unimproved condition of the Australian Aborigine viewed against an understanding of humanity of the time that is as characterised by separation from nature precipitated a crisis in existing ideas of what it meant to be human This lucid intelligent and persuasive argument will be necessary reading for all scholars and upper level students interested in the history and theories of race critical human geography anthropology and Australian and environmental studies

African Queen Rachel Holmes,2009-03-25 Saartjie Baartman was twenty one years old when she was taken from her native South Africa and shipped to London Within weeks the striking African beauty was the talk of the social season of 1810 hailed as the Hottentot Venus for her exquisite physique and suggestive semi nude dance As her fame spread to Paris Saartjie became a lightning rod for late Georgian and Napoleonic attitudes toward sex and race exploitation and colonialism prurience and science In African Queen Rachel Holmes recounts the luminous heartbreaking story of one woman s journey from slavery to stardom Born into a herding tribe known as the Eastern Cape Khoisan Saartjie was barely out of her teens when she was orphaned and widowed by colonial war and forced aboard a ship bound for England A pair of clever unscrupulous showmen dressed her up in a body stocking with a suggestive fringe and put her on the London stage as a specimen of African beauty and sexuality The Hottentot Venus was an overnight sensation But celebrity brought unexpected consequences Abolitionists initiated a lawsuit to win Saartjie s freedom a case that electrified the English public In Paris a team of scientists subjected her to a humiliating public inspection as they probed the mystery of her sexual allure Stared at stripped pinched painted worshipped and ridiculed Saartjie came to symbolize the erotic obsession at the heart of colonialism But beneath the costumes and the glare of publicity this young Khoisan woman was a person who had been torn from her own culture and sacrificed to the whims of fashionable Europe Nearly two centuries after her death Saartjie made headlines once again when Nelson Mandela launched a campaign to have her remains returned to the land of her birth In this brilliant vividly written book Rachel Holmes traces the full arc of Saartjie s extraordinary story a story of race eros oppression and fame that resonates powerfully today

Radical Evolution Joel Garreau,2006-05-09 Taking us behind the scenes with today s foremost researchers and pioneers bestselling author Joel Garreau shows that we are at a turning point in history At this moment we are engineering the next stage of human evolution Through advances in genetic robotic information and nanotechnologies we are altering our minds our memories our metabolisms our personalities our progeny and perhaps our very souls Radical Evolution reveals that the powers of our comic book superheroes already exist or are in development in hospitals labs and research facilities around the country from the revved up reflexes and speed of Spider Man and Superman to the enhanced mental acuity and memory capabilities of an advanced species Over the next fifteen years Garreau makes clear in this New York Times Book Club premiere selection these enhancements will become part of our everyday lives Where will they lead us To heaven where technology s promise to make us smarter vanquish illness and extend our lives is the answer to our prayers Or as some argue to hell where unrestrained technology brings about the ultimate destruction of our species

Humanity's End Nicholas Agar,2013-08-16 An argument that achieving millennial life spans or monumental intellects will destroy values that give meaning to human lives Proposals to make us smarter than the greatest geniuses or to add thousands of years to

our life spans seem fit only for the spam folder or trash can And yet this is what contemporary advocates of radical enhancement offer in all seriousness They present a variety of technologies and therapies that will expand our capacities far beyond what is currently possible for human beings In *Humanity's End* Nicholas Agar argues against radical enhancement describing its destructive consequences Agar examines the proposals of four prominent radical enhancers Ray Kurzweil who argues that technology will enable our escape from human biology Aubrey de Grey who calls for anti aging therapies that will achieve longevity escape velocity Nick Bostrom who defends the morality and rationality of enhancement and James Hughes who envisions a harmonious democracy of the enhanced and the unenhanced Agar argues that the outcomes of radical enhancement could be darker than the rosy futures described by these thinkers The most dramatic means of enhancing our cognitive powers could in fact kill us the radical extension of our life span could eliminate experiences of great value from our lives and a situation in which some humans are radically enhanced and others are not could lead to tyranny of posthumans over humans

Nature Sir Norman Lockyer, 2004 *The Oxford Handbook of Animal Studies* Linda Kalof, 2017 The Oxford Handbook of Animal Studies tackles the infamous animal question how can humans rethink and reconfigure their relationships with other animals Over the course of five sections and thirty chapters the contributors investigate issues and concepts central to understanding our current relationship with other animals and the potential for coexistence in an ecological community of living beings
