Accelerating Your Development as a Leader Robert Barner, 2011-09-14 An invaluable resource for HR professionals and executive coaches this book focuses on how to reduce

the time needed to prepare high potential HIPO leaders for next level positions Providing the leading trends tools and techniques in the industry the book demystifies the process of HIPO development It includes a powerful five step process for increasing leaders readiness as well as a complete set of tools for running workshops on developmental planning and coaching This text also serves as a core text for the author s Executive Coaching Certificate Programs *Failed Evidence* David A. Harris,2012-09-03 With the popularity of crime dramas like CSI focusing on forensic science and increasing numbers of police and prosecutors making wide spread use of DNA high tech science seems to have become the handmaiden of law enforcement But this is a myth asserts law professor and nationally known expert on police profiling David A Harris In fact most of law enforcement does not embrace science it rejects it instead resisting it vigorously The question at the heart of this book is why Eyewitness identifications procedures using simultaneous lineups showing the witness six persons together as police have traditionally done produces a significant number of incorrect identifications Interrogations that include threats of harsh penalties and untruths about the existence of evidence proving the suspect s guilt significantly increase the prospect of an innocent person confessing falsely Fingerprint matching does not use probability calculations based on collected and standardized data to generate conclusions but rather human interpretation and judgment Examiners generally claim a zero rate of error an untenable claim in the face of publicly known errors by the best examiners in the U S *Failed Evidence* explores the real reasons that police and prosecutors resist scientific change and it lays out a concrete plan to bring law enforcement into the scientific present Written in a crisp and engaging style free of legal and scientific jargon *Failed Evidence* will explain to police and prosecutors political leaders and policy makers as well as other experts and anyone else who cares about how law enforcement does its job where we should go from here Because only if we understand why law enforcement resists science will we be able to break through this resistance and convince police and prosecutors to rely on the best that science has to offer Justice demands no less *Paperbound Books in Print* ,1991 Character Deborah L. Rhode,2019-08-02 Americans claim to care about character Over four fifths want it taught in public schools and 95 percent think that a president s character is important And historically philosophers educators politicians religious leaders judges and the general public have agreed that character should be valued and reinforced Yet in the United States the institutions charged with that mission have consistently fallen short Simply put too little effort has been made to understand the importance of character and the strategies that can best develop and support it After first exploring the history of the concept over time Deborah Rhode turns her focus to the institutions that have traditionally fostered good character families schools youth organizations civic groups and political organizations However as we have increasingly de emphasized the subject a trend that is most evident in our politics our awareness of its shaping influence has waned Indeed we often focus on the wrong things when it comes to fostering good character For instance almost a third of the workforce is covered by licensing laws requiring good moral character even occupations where the need for screening is not self evident florist

fortune teller and frog farmers Character also plays a pivotal role in the criminal justice system in defining guilt punishment and eligibility for parole All too often these legal requirements are idiosyncratic inequitable and subject to race and class bias Millions of Americans who have convictions for minor offenses are excluded from a vast range of occupations and benefits without evidence that such exclusion serves the public interest We can do better she stresses and outlines a powerful program for reform Rhode punctuates the book through a series of portraits of exemplary individuals whose good character made them who they were Ida B Wells Jane Addams Martin Luther King Mother Teresa Nelson Mandela Albert Schweitzer and Thurgood Marshall All of these individuals had flaws but through their commitments to both social justice and helping the less fortunate they all demonstrate the power and importance of strong character
