and mechanical fatigue of a BGA package JEDEC board level drop test and mechanisms of solder joint fatigue Emphasis is placed on accurate quantitative assessment of solder joint reliability through basic understanding of the mechanics of materials as interpreted from results of FE simulations The FE simulation methodology is readily applicable to numerous other problems in mechanics of materials and structures

*Mount Kilimanjaro* François Bart, Milline J. Mbonile, François Devenne, 2006 Mount Kilimanjaro is one of Tanzania's most consummate symbols Interest in Mount Kilimanjaro dates back to the nineteenth century when epic excursions by scientists explorers and missionaries kindled controversy envy and unquenchable desire and the mountain became a prototype of colonial exoticism Contemporary preoccupations with the mountain as an essential ingredient of national identity and of Tanzania's self image are in some senses attempts to recapture what has been stolen Moreover as part of the legacy of both Chagga farmers and Maasai shepherds it is both an image of agricultural toil and of traditional pastoral values It has become a psychic landmark for collective identity permanence heritage and memory It possesses an outstanding wealth of national resources and thus embodies the exceptional as a symbol of comparative wealth precocity and enterprise incarnate set in the heart of one of the poorest countries in the world The growth of international travel has turned Mount Kilimanjaro into one of East Africa's major tourist attractions This expansion has produced a degree of ambivalence It is a commercial and profitable undertaking but based on a reductive image of the cultural heritage It is an opportunity for economic development that may yet undermine biodiversity Developmental and environmental inequalities on the already unequal mountain are key vectors in its social and spatial reorganisation This beautiful book of essays and photographs explores the multifaceted real and imagined natures and features of the mountain from various perspectives literary historical environmental sociological geographical and regional and from three different continents Africa North America and Europe The study was a Tanzanian French collaborative project between the Geography Department at the University of Dar es Salaam an environmental research group at the University Michel de Montaigne Bordeaux and the French Institute for Research in Africa IFRA in Nairobi
