Directions

Do not open this booklet until you have read all the directions and answered all the questions.

Your answers to these questions will help show you how you like to look at things and how you like to go about deciding things. There are no "right" or "wrong" answers. Knowing your own preferences and learning about other people's can help you understand what your strengths are, what kinds of work you might enjoy, and how people with different preferences can relate to one another and contribute to society.

Read each question carefully and indicate your answer by making an "X" in the appropriate box next to the response you select. Use a ballpoint pen and press firmly. Do not spend too much time thinking about any one question. If you cannot decide on an answer, skip that question and return to it later. If you make a mistake, do not erase but blacken in the box marked in error.

Now, unless you have been instructed otherwise, turn the booklet over and begin answering the questions.

Sumaya Laher, Kate Cockcroft, 2013-01-01 This book provides an overview of the research related to psychological assessment across South Africa. The thirty six chapters provide a combination of psychometric theory and practical assessment applications in order to combine the currently disparate research that has been conducted locally in this field. Existing South African texts on psychological assessment are predominantly academic textbooks that explain psychometric theory and provide brief descriptions of a few testing instruments. Psychological Assessment in South Africa provides in depth coverage of a range of areas within the broad field of psychological assessment including research conducted with various psychological instruments. The chapters critically interrogate the current Eurocentric and Western cultural hegemonic practices that dominate the field of psychological assessment. The book therefore has the potential to function both as an academic text for graduate students as well as a specialist resource for professionals including psychologists, psychometrists, remedial teachers and human resource practitioners.

The Value of Intellectual Styles Li-fang Zhang, 2017-09-21 Intellectual styles are individuals' preferred ways of using their abilities. This book provides the first comprehensive and systematic review of existing research on the value and desirability of different intellectual styles. By critically analyzing findings from hundreds of international studies undertaken over eight decades, Li-fang Zhang demonstrates that the creativity generating Type I styles are generally superior to the norm conforming Type II styles in relation to a wide range of learning processes and developmental outcomes, work performance, physical and mental health, and many other domains of people's lives. She further demonstrates that people explicitly and implicitly express their preference for Type I styles over Type II styles. Professor Zhang elucidates the practical value of cultivating diverse intellectual styles, especially Type I styles, in both academic and nonacademic settings and lays the groundwork for future research to advance the field of intellectual styles and to inform scholarly work in other academic disciplines.
