Improving Teaching, Learning, Equity, and Success in Gateway Courses Andrew K. Koch, 2018-01-22 As long as there have been U S colleges and universities there have been entry courses that pose difficulties for students courses that have served more as weeding out rather than gearing up experiences for undergraduates This volume makes the case that the weed out dynamic is no longer acceptable if it ever was Contemporary postsecondary education is characterized by vastly expanded access for historically underserved populations of students and this new level of access is coupled with increased scrutiny of retention and graduation outcomes Chapters in this volume define and explore issues in gateway courses and provide various examples of how to improve teaching learning and outcomes in these foundational components of the undergraduate experience This is the 180th volume of the Jossey Bass quarterly report series New Directions for Higher Education Addressed to presidents vice presidents deans and other higher education decision makers on all kinds of campuses it provides timely information and authoritative advice about major issues and administrative problems confronting every institution

Reflective Reading and the Power of Narrative Karyn Sproles, 2018-07-11 Reflective Reading and the Power of Narrative Producing the

Reader is an interdisciplinary exploration into the profound power of narratives to create and recreate how we imagine ourselves. It posits that the process of producing a text also produces the reader. Written from the perspective of a psychoanalytic feminist, Sproles considers a wide array of examples from literature, popular culture, and her own experiences to illustrate what she calls reflective reading, a metacognitive reading practice that recognizes the workings of the unconscious to push the reader toward a potentially transformational engagement with narrative. This may manifest as epiphany, recovery from loss, or resolution of repressed trauma. Each chapter draws on examples of characters and authors who model a reflective reading process, from Jane Austen and Virginia Woolf to Johnny Cash and Alison Bechdel. By reclaiming the role of the unconscious, Karyn Sproles reinvigorates the theoretical work begun by reader response criticism and develops a deep understanding of identification and transference as an integral part of the reading process. For students and researchers of cultural studies, psychoanalysis, gender studies, and feminist literature and theory, *Reflective Reading and the Power of Narrative* offers innovative and accessible ideas on the relationship between reader and text. The Open Access version of this book is available at <http://www.taylorfrancis.com> and has been made available under a Creative Commons Attribution Non-Commercial No Derivatives (CC BY-NC-ND 4.0) license.

Biologically Inspired Design Ashok K. Goel, Daniel A. McAdams, Robert B. Stone, 2013-07-16. From simple cases such as hook and latch attachments found in Velcro to articulated wing flying vehicles, biology often has been used to inspire many creative design ideas. The scientific challenge now is to transform the paradigm into a repeatable and scalable methodology. *Biologically Inspired Design* explores computational techniques and tools that can help integrate the method into design practice. With an inspiring foreword from Janine Benyus, *Biologically Inspired Design* contains a dozen chapters written by some of the leading scholars in the transdisciplinary field of bioinspired design, such as Frank Fish, Julian Vincent, and Jeannette Yen from biology, and Amarendra Chakrabarti, Satyandra Gupta, and Li Shu from engineering. Based in part on discussions at two workshops sponsored by the United States National Science Foundation, this volume introduces and develops several methods and tools for bioinspired design, including information processing theories, natural language techniques, knowledge-based tools, and functional approaches and pedagogical techniques. By exploring these fundamental theories, techniques, and tools for supporting biologically inspired design, this volume provides a comprehensive resource for design practitioners wishing to explore the paradigm, an invaluable guide to design educators interested in teaching the method, and a preliminary reading for design researchers wanting to investigate bioinspired design.

Structures and Architecture Paulo J. da Sousa Cruz, 2016-10-14. Although the disciplines of architecture and structural engineering have both experienced their own historical development, their interaction has resulted in many fascinating and delightful structures. To take this interaction to a higher level, there is a need to stimulate the inventive and creative design of architectural structures and to persuade architects and structural engineers to further collaborate in this process, exploiting together new concepts, applications, and challenges. This set of book of abstracts and full

paper searchable CD ROM presents selected papers presented at the 3rd International Conference on Structures and Architecture Conference ICSA2016 organized by the School of Architecture of the University of Minho Guimarães Portugal July 2016 to promote the synergy in the collaboration between the disciplines of architecture and structural engineering The set addresses all major aspects of structures and architecture including building envelopes comprehension of complex forms computer and experimental methods concrete and masonry structures educating architects and structural engineers emerging technologies glass structures innovative architectural and structural design lightweight and membrane structures special structures steel and composite structures the borderline between architecture and structural engineering the history of the relationship between architects and structural engineers the tectonics of architectural solutions the use of new materials timber structures and more The contributions on creative and scientific aspects of the conception and construction of structures on advanced technologies and on complex architectural and structural applications represent a fine blend of scientific technical and practical novelties in both fields This set is intended for both researchers and practitioners including architects structural and construction engineers builders and building consultants constructors material suppliers and product manufacturers and other experts and professionals involved in the design and realization of architectural structural and infrastructural projects
