Effect size (Cohen's d) was calculated for each of the 10 outcomes. It is defined as the difference between the means of the two groups, divided by the standard deviation of the control group. Effect sizes of 0.2, 0.5, and 0.8 are considered small, medium, and large, respectively. The present study found small to medium effect sizes for most outcomes, with the largest effect sizes for the outcomes of self-efficacy and self-management skills. The present study also found small to medium effect sizes for the outcomes of self-efficacy and self-management skills.
