Working with Children's Language has been created to support practitioners who work with young children with delayed language acquisition. Rooted in a developmental theory of language learning, it covers topics such as attention control and listening, the role of play, verbal comprehension, and the acquisition of spoken expressive language. Each chapter offers a straightforward overview of current research relating to the specific language skill, before introducing a wealth of targeted games and activities that can help support the development of those skills. Key features include:

- A structured approach to language learning that can be followed as a programme or adapted for informal use by individual practitioners.
- Accessible activities, games, and ideas suitable for small group or individual intervention, linked to specific aims based on developmental norms.
- Photocopiable and downloadable resources, including a record sheet to track progress in each skill against aims and outcomes for individual children.
- Clearly linking theory and practice in an engaging and easy-to-follow format.

This is an invaluable resource to support children in early years settings and Key Stage 1 whose language is delayed but who are otherwise developing normally. It is a must-have book for early years practitioners, teachers, SEND professionals, and speech and language therapists with varying levels of experience.

Planning for the Foundation Stage Penny Tassoni, 2002
