Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office, 1976 **Principles of Electrical Engineering** Peyton Z. Peebles, Tayeb A. Giuma, 1991 **Electric Circuits Fundamentals** Sergio Franco, 1995 This exciting new text teaches the foundations of electric circuits and develops a thinking style and a problem solving methodology that is based on physical insight Designed for the first course or sequence in circuits in electrical engineering the approach imparts not only an appreciation for the elegance of the mathematics of circuit theory but a genuine feel for a circuit's physical operation This will benefit students not only in the rest of the curriculum but in being able to cope with the rapidly changing technology they will face on the job The text covers all the traditional topics in a way that holds students interest The presentation is only as mathematically rigorous as is needed and theory is always related to real life situations Franco introduces ideal transformers and amplifiers early on to stimulate student interest by giving a taste of actual engineering practice This is followed by extensive coverage of the operational amplifier to provide a practical illustration of abstract but fundamental concepts such as impedance transformation and root location control always with a vigilant eye on the underlying physical basis SPICE is referred to throughout the text as a means for checking the results of hand calculations and in separate end of chapter sections which introduce the most important SPICE features at the specific points in the presentation at which students will find them most useful Over 350 worked examples 400 plus exercises and 1000 end of chapter problems help students develop an engineering approach to problem solving based on conceptual understanding and physical intuition rather than on rote procedures **Catalog of Copyright Entries, Third Series** Library of Congress. First Words, Last Words Yigal Bronner, Lawrence McCrea, 2021-08-06 First Words Last Words charts an intense pamphlet war that took place in sixteenth century South India Yigal Bronner and Lawrence McCrea explore this controversy as a case study in the dynamics of innovation in early modern India a time of great intellectual innovation This debate took place within the traditional discourses of Vedic Hermeneutics or Mīmāṃsā and its increasingly influential sibling discipline of Vedānta and its proponents among the leading intellectuals and public figures of the period Bronner and McCrea examine the nature of theoretical innovation in scholastic traditions by focusing on a specific controversy regarding scriptural interpretation and the role of sequence what comes first and what follows later in determining our interpretation of a scriptural passage Vyāsatīrtha and his grand pupil Vijayandratī writers belonging to the camp of Dualist Vedānta purported to uphold the radical view of their founding father Madhva who believed against a long tradition of Mīmāṃsā interpreters that the closing portion of a scriptural passage should govern the interpretation of its opening By contrast the Nondualist Appayya Dīkita ostensibly defended his tradition's preference for the opening But as this volume shows the debaters gradually converged on a profoundly novel hermeneutic cognitive theory in which sequence played little role if any First Words Last Words traces both the issue of sequence and the question of innovation through an in depth study of this debate and through a comparative survey of similar problems in Judaism Christianity and Islam revealing that the disputants in this controversy often pretended to uphold traditional views when they were in fact radically innovative
