

EXAMPLES OF SOAP NOTES FOR ACUTE PROBLEMS

EXAMPLE #1

Complete HPI

S: MS is a 77 y/o woman who presents with a rash. The rash began one week ago and first appeared on her back and extended to her abdomen on the left side. She first noticed the rash after working in her garden. For the first 3 days she had no associated symptoms, however on the 4th day, she began to experience severe pain "like being stung by a bee". The pain is worse in the evenings and she is having difficulty sleeping. She has been taking Tylenol every 4-6 hours and using Vitamin E lotion with minimal relief. She is worried she may have poison ivy.

One paragraph summary of medical history & medications

She has a history of hypertension. Her medications include: Nifedipine XL 30mg daily and Metoprolol 50mg BID.

One sentence summary of the problem

O: MS is an elderly woman who appears energetic and in no distress. VS: BP 130/80, P 60, RR 12, T 37°. Skin exam reveals an erythematous rash of grouped vesicles with clear fluid, approximately half of which are crusted over. The rash extends from the midline of the back anterior to the left side of the T12/L1 dermatome region.

Differential diagnosis and clinical reasoning for an acute problem

A: A new onset painful rash in a dermatomal distribution. This is most likely secondary to herpes zoster because of the location, distribution and associated pain. A less likely possibility is contact dermatitis, given her recent gardening. She may also have a cellulitis, but the lack of temperature doesn't support this.

P: #1 MS will continue to use Tylenol for pain relief.
#2 MS was informed that she may continue to experience pain after the rash resolves.
#3 MS should return to clinic if the pain becomes more severe or if she develops warm, redness or a fever.

EXAMPLE #2

HPI with pertinent ROS

S: Ms. Z is a 58 y/o woman who comes into clinic with a 10 day h/o a cough. It seemed to start as a "chest cold" but has not gotten any better. The cough is productive of clear sputum and seems to be worse at night when lying down. She has tried cough medicine without relief. She has also noticed some wheezing and that her chest feels tight. She has had a low-grade fever to 100°, with no chills. She is worried she has pneumonia. She denies PND and LE edema, but does report shortness of breath with exertion after walking 1 block on level ground. She has had no hemoptysis.

One sentence summary of problem

She has no h/o pulmonary problems. She has type 2 diabetes controlled on metformin 500mg BID. She smokes 1 ppd and has done so for 40 years.

O: Ms. Z looks tired and her breathing is somewhat labored.
VS: T 99.8, P 92 reg, R 28, BP 110/70
Lungs: Diffuse wheezes are present bilaterally with expiration. No crackles or rhonchi.
CV: JVP is 6cm above the right atrium, PMI non-displaced. RRR, no murmurs, normal S1 and S2.
EXT: No edema.
CXR: No pneumonia or effusion. No cardiomegaly.

Chief Complaints Ralph G. DePalma,2009-07-27 PROLOGUE IDEAL HEALTH Experience is the oracle of truth where its responses are unequivocal they ought to be conclusive and sacred James Madison Federalist 18 20 Twenty first century medicine offers better outcomes than at any other time in history yet many if not most people are unhappy with health care The World Health Organization defines health as A state of complete physical mental and social well being and not merely the absence of disease or infirmity a statement suggesting an ideal state of complete well being that lies within society s grasp This ideal might be achieved within the context of an altruistic society inhabited by intelligent individuals possessing high moral and ethical values abundant resources access to advanced technology and effective equitable governance The concept promises a paradise on earth yet formidable challenges confound its realization this is one of several dilemmas confronting health care People living in the third world victimized by lack of education unremitting poverty and corrupt governments suffer widespread ill health due to readily correctible causes undernutrition lack of sanitation contaminated food and water and ethnic violence These unfortunate conditions relate to political cultural issues and some might say moral issues Inner city dwellers or those living in other deprived areas within the United States are also victimized while more privileged inhabitants of advanced societies sooner or later develop lethal diseases many due to unknown or obscure causes The treatment of these illnesses to which the poor are not necessarily immune requires specialized skills focusing upon individuals This is also a part of the health care dilemma Specialized approaches differ from world and public health centered views of Health Care Generalizations about health and prevention in the minds of policy makers have become conflated with treatment of

advanced disease a confusion that potentially threatens specialists who are the custodians of unique skills required to treat serious illnesses Clearly effective Health Care requires both preventive and advanced treatment services part of the dilemma is that each needs more detailed definition This book describes surgical care some it involving general surgical problems and some of it within the specialty of vascular surgery Each story or complaint highlights dilemmas facing doctors and patients alike Surgical interventions are life saving life enhancing processes that carry with them important societal implications Surgical efforts are costly time intensive and come into play individually one case at a time Illnesses often present with a dominant symptom a Chief Complaint The patient s Chief Complaint is key to effective diagnosis and treatment The words manner and circumstances of patient s complaints express specific truths Complaints require action sometimes immediate sometimes measured and deliberate and sometimes with judicious restraint Deciding how and at what rate to react to complaints are also dilemmas facing patients doctors and health care systems Modern medicine paradoxically tends to overlook and marginalize individual concerns and cultural sensitivities in favor of cost benefit or public policy analyses leading to rigid policy decisions that conflict with individual needs and sensitivities Laboratory testing and imaging increasingly uncover the silent beginnings of serious disease before symptoms develop this is usually a good thing sometimes it is not currently enhanced diagnostic prowess poses yet another dilemma facing doctors and health care policy makers Abnormal test results ideally should be considered as Chief Complaints Abnormal test results can become sources of anxiety prompting ill advised and premature actions or conversely may be ignored with disastrous results Controversies about which tests how man

New Dynamics of Preventive Medicine ,1975 Consists of selected papers from the 5th meeting of the International Academy of Preventive Medicine
