Moise, 2018-06-14 The closure of the Millennium Development Goals MDGs in 2015 prompted the need for a book of this kind An interdisciplinary group of global health scholars contribute to the understanding of the emerging and fast growing problem of the dual burden of communicable and non communicable diseases NCDs in Africa This book is timely as the international community has moved from the MDGs to adopt the Sustainable Development Goals SDGs as the blueprint for a new human development agenda Contributions and case studies are situated in the revised Epidemiologic and Nutrition Transition Model to capture the current situation referencing communicable and NCDs on the African continent The case studies encapsulated aim to help minimize negative health outcomes and improve population health well being and equity in the future This book will be significant in policy circles to assist international organizations governments and United Nations agencies It aims to chart the future for health in Africa in light of recently adopted SDGs This book is also a useful complementary reader for global public health related courses

Raising the Impact of Education Research in Africa Charl C. Wolhuter, 2018-12-01 The low demonstrable effect of education research done in South Africa in particular and Africa in general continues to be a problem in scientific records in the educational sciences This scholarly collected work addresses this obstacle and focuses on recommendations from scholars in different sectorial

categories in the field of education Scholars from a variety of sub fields within the educational sciences reflect on this particular matter revisiting the history of research and research outcomes and offering informed recommendations based on in depth investigation and analysis of aspects of the various discourses within the relevant sub fields The scope of the content of this collected work centres on the issue of the lack of scientific records concerning the scientific raising of the impact of education research The book aims at making a specific contribution to the educational sciences by stimulating scholarly discussion around how to increase the recording of the significance of educational research done in Africa and in South Africa in particular and to redirect the research agenda into the direction of making more impact Impact is conceptualised to mean both scholarly impact that is being cited and being used as foundation for theory building and for further research and practical impact that is improvement of practice teaching and learning in education institutions at all levels

(Re)Constructing Memory: Education, Identity, and Conflict Michelle J. Bellino, James H. Williams, 2017-02-08 How do schools protect young people and call on the youngest citizens to respond to violent conflict and division operating outside and sometimes within school walls What kinds of curricular representations of conflict contribute to the construction of national identity and what kinds of encounters challenge presumed boundaries between us and them Through contemporary and historical case studies drawn from Cambodia Egypt Northern Ireland Peru and Rwanda among others this collection explores how societies experiencing armed conflict and its aftermath imagine education as a space for forging collective identity peace and stability and national citizenship In some contexts the erasure of conflict and the homogenization of difference are central to shaping national identities and attitudes In other cases collective memory of conflict functions as a central organizing frame through which citizenship and national identity are re constructed with embedded messages about who belongs and how social belonging is achieved The essays in this volume illuminate varied and complex inter relationships between education conflict and national identity while accounting for ways in which policymakers teachers youth and community members replicate resist and transform conflict through everyday interactions in educational spaces

sociologists and experts the book addresses a wide range of social divisions and inequalities in novel ways with added chapters on education and age provides a framework for understanding contemporary social inequalities and diversities and how they interrelate lends itself to teaching in a range of contexts with the potential to dip into particular chapters for different modules or to use the book in a more extensive way for one particular module features signposting through the material as well as key points discussion questions and selected further readings for each chapter This clearly written volume presents a structured and critical guide to a core field that cuts across disciplines It is an invaluable introduction and source book for students taking social inequalities and diversity modules in sociology social policy social work education and health studies

Social Studies Education in East Asian Contexts Kerry J. Kennedy, 2020-07-28 The book explores the state of social studies education within selected East Asian societies and provides some insights into distinctive classroom practices In an increasingly volatile and unpredictable world the education of young people who both understand the contexts in which they are growing up and see the need for engaging with them is a top priority This task falls to social studies education which carries the responsibility for inducting young people into their social world and helping them to see the role they can play within it This is particularly important in East Asia where strong economic growth long held cultural values and diverse political systems create an environment that challenges young people on multiple fronts This book with its team of regional authors shows how different societies in the region are dealing with these challenges and what can be expected from future citizens The book will appeal to policy makers researchers and teachers interested in the current state of social studies education in East Asian societies

World Ocean Assessment Alan Simcock, 2017-04-17 This United Nations report examines the current state of knowledge of the world's oceans for policymakers and provides a reference for marine science courses

The UK Regional-National Economic Problem Philip McCann, 2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been In a landmark analysis of the current state of Britain's regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK's economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although

this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government *Reinventing Detroit* Michael Peter Smith, 2017-09-29 This book addresses the questions of what went wrong with Detroit and what can be done to reinvent the Motor City Various answers to the former deindustrialization white flight and a disappearing tax base are now well understood Less discussed are potential paths forward stemming from alternative explanations of Detroit's long term decline and reconsideration of the challenges the city currently faces Urban crisis socioeconomic fiscal and political has seemingly narrowed the range of possible interventions Growth oriented redevelopment strategies have not reversed Detroit's decline but in the wake of crisis officials have increasingly funnelled limited public resources into the city's commercial core via an implicit policy of urban triage The crisis has also led to the emergency management of the city by extra democratic entities As a disruptive historical event Detroit's crisis is a moment teeming with political possibilities The critical rethinking of Detroit's past present and future is essential reading for both urban studies scholars and the general public **Conceptualizing Mass Violence** Navras J.

Aafreedi, Priya Singh, 2021-05-13 *Conceptualizing Mass Violence* draws attention to the conspicuous inability to inhibit mass violence in myriads of forms and considers the plausible reasons for doing so Focusing on a postcolonial perspective the volume seeks to popularize and institutionalize the study of mass violence in South Asia The essays explore and deliberate upon the varied aspects of mass violence namely revisionism reconstruction atrocities trauma memorialization and literature the need for Holocaust education and the criticality of dialogue and reconciliation The language content and characteristics of mass violence genocide explicitly reinforce its aggressive transmuting and multifaceted character and the consequent necessity to understand the same in a nuanced manner The book is an attempt to do so as it takes episodes of mass violence for case study from all inhabited continents from the twentieth century to the present The volume studies consciously enforced mass violence through an interdisciplinary approach and suggests that dialogue aimed at reconciliation is perhaps the singular agency via which a solution could be achieved from mass violence in the global context The volume is essential reading for postgraduate students and scholars from the interdisciplinary fields of Holocaust and Genocide Studies History Political Science Sociology World History Human Rights and Global Studies *Drones and Unmanned Aerial Systems* Aleš Završnik, 2015-12-23 This book tackles the regulatory issues of Unmanned Aerial Systems UAS or Remotely Piloted Aerial Systems RPAS which have profound consequences for privacy security and other fundamental liberties Collectively known as drones they were initially deployed for military purposes reconnaissance surveillance and extrajudicial executions Today we are witnessing a growth of their use into the civilian and humanitarian domain They are increasingly used for goals as diverse as news gathering aerial inspection of oil refinery flare stacks mapping of the Amazonian rain forest crop spraying and search and rescue operations The civil use of drones is becoming a reality in the European Union and in the US The

drone revolution may be a new technological revolution Proliferation of the next generation of recreational drones show how drones will be sold as any other consumer item The cultural perception of the technology is shifting as drones are increasingly being used for humanitarian activities on one hand but they can also firmly be situated in the prevailing modes of postmodern governance on the other hand This work will be of interest to researchers in Criminology and Criminal Justice interested in issues related to surveillance security privacy and technology It will also provide a criminological background for related legal issues such as privacy law aviation law international criminal law and comparative law **Africa-EU**

Today many states have proposed so called Don t Say Gay bills that prohibit public school teachers from mentioning LGBTQ topics in the classroom But a few states like California have taken decisive steps in the other direction They mandate inclusive education that treats LGBTQ history as essential to the curriculum At once a history of an evolving movement and an activist handbook Contested Curriculum navigates the rocky path to LGBTQ inclusive K 12 history education in the United States and recounts the fight for a curriculum that recognizes the value of queer and trans lives What began in fits and starts in activism and educational materials across the late twentieth century led to the passage of California s landmark FAIR Education Act in 2011 ensuring that LGBTQ history has a place in the K 12 classroom Historian Don Romesburg the lead scholar who worked with advocacy organizations to pass the act recounts the decades long struggle to integrate LGBTQ content into history education policy textbooks and classrooms Looking at California and states that followed its lead he assesses the challenges and opportunities presented by this new way of teaching history Romesburg s powerful case for LGBTQ inclusive education is all the more urgent in this era of anti gay book bans regressive legislation and attempts to diminish the vital role that inclusive and honest history education should play in a democratic nation *Washington Administrative Code* ,2009 **The**
