Crime and Criminology (Routledge Revivals) Carol Smart, 2013-10-14 First published in 1977 *Women Crime and Criminology* presents a feminist critique of classical and contemporary theories of female criminality. It addresses the issue that criminology literature has throughout history been predominantly male oriented always treating female criminality as marginal to the proper study of crime in society. Carol Smart explores a new direction in criminology and the sociology of deviance by investigating female crime from a committed feminist position. Examining the types of offences committed by female offenders, Smart points to the fallacies inherent in a reliance on official statistics and shows the deficiencies of the popular argument that female emancipation has caused an increase in female crime rates. She deals with studies of prostitution and rape and considers the treatment of women as offenders and victims by the criminal law, the police and courts and the penal system. Particular attention is given to the question of lenient treatment for female offenders with the conclusion that women and girls are in some important instances actually discriminated against in our legal and penal systems. The relationship between female criminality and mental illness is discussed and the author concludes by dealing with some of the problems inherent in developing a feminist criminology.

The Delinquent Solution (Routledge Revivals) David Downes, 2013-10-30 First published in 1966 *The Delinquent Solution* presents a study of crime associated with the nature of subcultures. It also takes an in-depth look at the Stepney and Poplar survey on crime from 1960 analysing both statistical data and more informal observations. Although the book was written over forty years ago, the issues discussed remain relevant and strong areas of interest.

The Sociology of Youth Culture and Youth Subcultures (Routledge Revivals) Michael Brake, 2013-10-08 First published in 1980, this book argues that subcultures are formed in defence of collectively experienced problems that arise from defects and contradictions in social structures. Mike Brake looks at the development of post-war youth culture in a sociological context and considers the class base of youth subcultures, showing that they generate a form of collective identity from which an individual identity can be achieved outside that ascribed by class, education or occupation. Black youth and young females are two groups given special attention here since Brake notes they are prone to particular problems resulting from the racism and sexism inherent in much youth culture.

the law alongside a detailed introduction This title will be of particular value to students and scholars with an interest in criminology and the sociology and psychology of deviancy *Crime, Drugs and Social Theory* Chris Allen, 2007 Do criminal cultures generate drug use Crime Drugs and Social Theory critiques conventional academic and policy thinking concerning the relationship between urban deprivation crime and drug use and outlines an innovative constructionist phenomenologic

Alternative Economic Indicators (Routledge Revivals) Victor Anderson, 2014-02-04 The main objective of politicians is to maximise economic growth which heavily drives political policy and decision making Critics of the maximisation of growth as the central aim of economic policy have argued that growth in itself is not necessarily a good thing particularly for the environment however what would replace the system and how it would be measured are questions that have been rarely answered satisfactorily First published in 1991 this book was the first to lay out an entirely new set of practical proposals for developing new economic measurement tools with the aim of being sustainable green and human centred Victor Anderson proposes that a whole set of indicators rather than a single one should play all the roles that GNP Gross National Product is responsible for With a detailed overview of the central debates between the advocates and opponents of continued economic growth and an analysis of the various proposals for modification this title will be of particular value to students interested in the diversity of measurement tools and the notion that economies should also be evaluated by their social and environmental consequences
