Sociologie Des Quartiers Sensibles:

Sociologie des "quartiers sensibles" Cyprien Avenel, 2007 Ces quartiers que l'on dit sensibles et qui tendent à finir comme des ghettos constituent le problème social et politique par excellence de la société française. Exclusion, violences urbaines et délinquance des jeunes inscrites dans la mission des familles, autant de thèmes qui alimentent le discours ambiant. Sur le sujet, les témoignages de valeurs diverses abondent, les polémiques foisonnent et les pouvoirs publics tentent de cibler leur intervention. La deuxième édition actualisée de cet ouvrage fait notamment le point sur la question des meutes de banlieues de 2005 ou encore de la rénovation urbaine et de la politique de la ville. Elle propose un bilan critique et incisif des travaux sociologiques sur le sujet et invite à se prémunir contre les jugements rapides et les idées trop simples. L'auteur montre comment la sociologie et ses outils aident mieux à comprendre ce qu'il en est aujourd'hui du problème des banlieues.

Sociologie des quartiers sensibles Cyprien Avenel, 2010-09-15 Etude des mécanismes de construction sociopolitique du problème des banlieues. Le point sur les modes de vie et les sociabilités dans les quartiers, les violences urbaines et les délinquances. Analyse des réponses institutionnelles et politiques au problème des banlieues. Cette nouvelle édition traite des meutes de 2005 de la rénovation urbaine et de la politique de la ville.

Enjeux de la sociologie urbaine Michel Bassand, Vincent Kaufmann, Dominique Joye, 2007-01-01 C'est autour des problèmes soulevés par la sociologie urbaine contemporaine que sont réunis quelques uns des meilleurs spécialistes francophones en la matière. Il s'agit d'une deuxième édition profondément remaniée, augmentée et actualisée. Sont traités au fil des 18 chapitres de cet ouvrage les dynamiques métropolitaines, les mobilités et les réseaux, les inégalités sociales et fragmentations urbaines, les notions de temps et de quartier, ainsi que les imbrications entre l'économie et le politique dans la production des formes urbaines. Après une ouverture consacrée à l'état de l'art, chaque chapitre fait le bilan d'une abondante bibliographie, introduit des recherches originales et conclut en mettant en exergue les apports des résultats présentés pour la compréhension du phénomène urbain. Soucieux de s'approprier les apports d'autres disciplines, cet ouvrage renouvelle les théories et méthodes de la recherche urbaine. L'ouvrage se termine par un chapitre conclusif qui prend la forme d'une ouverture sur les grands débats qui animent la sociologie contemporaine.

La crise des banlieues Jean-Marc Stébé, 1999 Montre qu'il n'existe pas une banlieue unique mais plutôt des territoires périurbains qui agglomèrent une grande diversité de lieux d'activités et de populations. Présente les processus de ségrégation sociale et spatiale auxquels sont confrontés les banlieues sensibles ainsi que la spirale d'exclusion et de précarisation dans laquelle les populations sont engagées.

Young People from Lower-income Neighborhoods Council of Europe Publishing,2007-01-01 The question of young people from lower income neighbourhoods is often on the political agenda and the responses proposed vary according to circumstances and the social visibility of a problem which sometimes translates into violence Nonetheless this problem is far from being resolved nor is it approached via a long term strategy aimed at devising alternatives This guide proposes food for thought and instruments aimed at bringing to light the stigmatisation and stereotypical ideas that are often the starting point for so called youth integration initiatives targeting young people from these neighbourhoods

Integrated Urban Environment Management and Resilience Luc Adolphe,2022-10-11 The city appears as an artefact a more or less homogeneous technical ensemble but also as a production of space the privileged place where social relations in all historical forms take place The city which is crossed by all socialities and their contradictions is directly influenced by them and is even their privileged vector Introducing the technical developments that are expressed in a multidisciplinary approach into the lived social world facilitates the understanding of the city and the way in which it adapts to the difficulties it faces We propose the morpho sociological approach which gives a representation of the state of the contemporary city and the conditions of its production the geographical approach with the problems of development and the sharing of these areas the economic approach with the modalities specific to a development model making urban composition the answer to the problems of the sustainable city and the sociological approach when it comes up against the effects of the now dominant digital world

Unequal Europe James Wickham,2016-03-02 This wide ranging and comparative text reviews the major theoretical and substantive debates on social inequality in Europe It provides a valuable dual focus on European society and individual societies while placing Europe in its wider global context Demonstrating the continued importance of national difference within Europe the author argues that nonetheless the European Social Model has softened social inequalities such as those of wealth and income distribution social class gender and possibly even ethnicity However these achievements are now being undermined partially by the European Union itself The book also challenges conventional

wisdom on Europe's alleged need for immigration and highlights the UK's distinctiveness within Europe explaining the country's uneasy relation to the European project This book will be of great interest to students and scholars of Politics European Societies Social Policy and Comparative Studies Handbook of Environmental Psychology and Quality of Life Research Ghazlane Fleury-Bahi, Enric Pol, Oscar Navarro, 2016-08-12 This Handbook presents a broad overview of the current research carried out in environmental psychology which puts into perspective quality of life and relationships with living spaces and shows how this original analytical framework can be used to understand different environmental and societal issues Adopting an original approach this Handbook focuses on the links with other specialties in psychology especially social and health psychology together with other disciplines such as geography architecture sociology anthropology urbanism and engineering Faced with the problems of society which involve the quality of life of individuals and communities it is fundamental to consider the relationships an individual has with his different living spaces This issue of the links between quality of life and environment is becoming increasingly significant with at a local level problems resulting from different types of annoyances such as pollution and noise while at a global level there is the central question of climate change with its harmful consequences for humans and the planet How can the impact on well being of environmental nuisances and threats for example natural risks pollution and noise be reduced How can the quality of life within daily living spaces home cities work environments be improved Why is it important to understand the psychological issues of our relationship with the global environment climatic warming ecological behaviours This Handbook is intended not only for students of various disciplines geography architecture psychology town planning etc but also for social decision makers and players who will find in it both theoretical and methodological perspectives so that psychological and environmental dimensions can be better taken into account in their working practices **Situating Children of Migrants across Borders and Origins** Claudio Bolzman, Laura Bernardi, Jean-Marie Le Goff, 2017-10-25 This open access wide ranging collation of papers examines a host of issues in studying second generation immigrants their life courses and their relations with older generations Tightly focused on methodological aspects both quantitative and qualitative the volume features the work of authors from numerous countries from differing disciplines and approaches A key addition in a corpus of literature which has until now been restricted to studying the childhood adolescence and youth of the children of immigrants the material includes analysis of longitudinal and transnational efforts to address challenges such as defining the population to be studied and the difficulties of follow up research that spans both time and geographic space In addition to perceptive reviews of extant literature chapters also detail work in surveying the children of immigrants in Europe the USA and elsewhere Authors address key questions such as the complexities of surveying each generation in families where parents have migrated and left children in their country of origin and the epistemological advances in methodology which now challenge assumptions based on the Westphalian nation state paradigm The book is in part an outgrowth of temporal factors immigrants children are now

reaching adulthood in more significant numbers but also reflects the added sophistication and sensitivity of social science surveys In linking theoretical and methodological factors it shows just how much the study of these second generations and their families can be enriched by evolving methodologies This book is open access under a CC BY license

The Paris Zone James Cannon, 2016-02-24 Since the mid 1970s the colloquial term zone has often been associated with the troubled post war housing estates on the outskirts of large French cities However it once referred to a more circumscribed space the zone non aedificandi non building zone which encircled Paris from the 1840s to the 1940s This unusual territory although marginal in a social and geographical sense came to occupy a central place in Parisian culture Previous studies have focused on its urban and social history or on particular ways in which it was represented during particular periods By bringing together and analysing a wider range of sources from the duration of the zone s existence this study offers a rich and nuanced account of how the area was perceived and used by successive generations of Parisian novelists including Zola and Flaubert poets songwriters artists photographers film makers politicians and town planners More generally it aims to raise awareness of a neglected aspect of Parisian cultural history while pointing to links between current and past perceptions of the city s periphery

City Life from Jakarta to Dakar Abdou Maliq Simone, 2010-01-27 *City Life from Jakarta to Dakar* focuses on the politics incumbent to this process an anticipatory politics that encompasses a wide range of practices calculations and economies As such the book is not a collection of case studies on a specific theme not a review of developmental problems nor does it marshal the focal cities as evidence of particular urban trends Rather it examines how possibilities perhaps inherent in these cities all along are materialized through the everyday projects of residents situated in the city and the larger world in very different ways

Empire on the Seine Amit Prakash, 2022-03-03 Why are relations between minorities and the police in France so fraught Stripping away the myth that this tension is a sudden and recent disruption of its universalist republican tradition brought on by the presence of North African immigrants Amit Prakash locates the origins of contemporary conflicts in race and empire in France s history In

Empire on the Seine Prakash argues that the metropole and the colony dynamically co developed a policing regime over the course of the nineteenth and twentieth centuries to manage colonial and racial difference With the North African community emerging as a sizable and durable presence in Paris after World War I this policing became a key state practice in imagining and administering the immigrant population Prakash shows that despite the French state's current reluctance to use race as an official category racial thought and racial targets animated police services social services and urban planning schemes from the 1920s until the 1970s Using police archival records reports from colonial officials urban planning and housing studies and the records of French social workers and immigrant associations Prakash shows that colonial racism was integrated into the policing of Paris and that architecture urbanism and social housing assumed police functions for colonial and postcolonial migrants In light of this history contemporary social and racial segregation periodic protests and rioting against police violence and the aggressive posture of the Parisian police emerge as the material traces of French colonialism in the metropole The city of Paris was the capital of an empire and its imperial shadows are long

Deviant Landscapes

Fivos Papadimitriou, Olaf Kühne, 2025-04-11 Deviant landscapes can be physical or digital or outright fictitious Whatever their nature or context they do not conform to normality Deviant landscapes can be encountered on the face of the earth on computer screens in people's minds This anthology presents varying perspectives on deviant landscapes widening the theoretical framework of spatial and landscape research by delving into the hitherto almost uncharted realm of deviant landscapes in a way that is missing in the academic literature It exposes a variety of perspectives on deviant landscapes from disparate scientific domains i.e. geography literary studies sociology game studies cultural studies and delivers useful insights into the diverse theoretical approaches that can be adopted to examine such landscapes neopragmatist social constructivist scientometric art theoretical etc

Rites et rituels contemporains Martine Segalen, 2009-09-09 Par contraste avec les sociétés traditionnelles on a souvent dit aux sociétés modernes la capacité de ritualiser Cet ouvrage souligne au contraire la force des rituels contemporains et les décrypte la lumière des théories classiques de l'anthropologie Puisant dans le stock limité des références symboliques et munis d'une structure relativement fixe les rituels ne sont jamais nouveaux ils sont réinventés sans cesse partant d'un terreau mythique et social C'est notamment ce que montre dans cette nouvelle édition l'analyse des enterrements de vie de jeune fille ou des rites qui relèvent d'une idéologie New Age Créateurs d'effervescence collective ils peuvent également ne pas prendre comme exemple le choc de Halloween dont la célébration en France fut phare
