Sociologie Des Professions:

Sociologie des professions - 4e éd. Claude Dubar, Pierre Tripier, Valérie Boussard, 2015-07-01 Cet ouvrage retrace les grands modèles de professions qui se sont succédés en Occident et expose les principales théories sociologiques des professions. Les évolutions récentes des groupes professionnels, changements démographiques, transformation du rôle de l'état, mondialisation et internationalisation sont présentés autour de cas empiriques. L'ouvrage clarifie le vocabulaire qu'utilisent les sociologues pour décrire le travail professionnel, analyser la dynamique des groupes professionnels et des marchés du travail, interpréter l'évolution des systèmes et des identités professionnelles. Cette quatrième édition prend acte des nombreux travaux suscités en France par cette discipline.

Sociologie des professions - 3e éd. Claude Dubar, Pierre Tripier, 2011-05-04 Cet ouvrage retrace les grands modèles de professions qui se sont succédés en Occident et expose les principales théories sociologiques des professions qui continuent à affronter et parfois se combiner dans les travaux récents. Au sein d'un modèle spécifique de régulation par l'état des groupes professionnels, il rend compte de nombreuses recherches empiriques menées dans la France des années 1960-2010. Les évolutions récentes de ces groupes, changements démographiques, transformation du rôle de l'état, mondialisation et internationalisation sont présentés autour de cas empiriques. L'ouvrage tente de clarifier le vocabulaire qu'utilisent les sociologues pour décrire le travail professionnel, analyser la dynamique des groupes professionnels et des marchés du travail, interpréter l'évolution des systèmes et des identités professionnelles. Cette troisième édition revue et augmentée prend acte des nombreux travaux suscités en France par cette discipline depuis une décennie et fait le point sur les nouvelles avancées au niveau international.

Bringing Bourdieu's Theory of Fields to Critical Policy Analysis Vincent Dubois, 2024-01-18 Laying down the foundations of a critical sociological approach to the interdisciplinary domain of public policy, this insightful book presents the first systematic reflection on the use of Bourdieu's theory of social fields to analyse policy processes. Engaging with theoretical dimensions, it provides innovative methodological tools both quantitative and qualitative in nature. Bringing together an array of eminent contributors and case studies from across the globe, it presents theoretical and methodological insights as well as empirical information on national cases and policy sectors.

L'indispensable de la sociologie Thomas Gay, 2006 Synthèse de la sociologie qui explique les grands mouvements de pensée sociologique du XIXe siècle jusqu'à aujourd'hui, décrit les fondements de la démarche sociologique et propose une étude approfondie de deux thèmes : le travail et la politique.

The Engineering-Business Nexus Steen Hyldgaard Christensen, Bernard Delahousse, Christelle Didier, Martin Meganck, Mike Murphy, 2018-11-14 Fascinating and compelling in

equal measure this volume presents a critical examination of the multilayered relationships between engineering and business. In so doing the study also stimulates ethical reflection on how these relationships either enhance or inhibit strategies to address vital issues of our time. In the context of geopolitical economic and environmental tendencies the authors explore the world that we should want to create and the role of the engineer and the business manager in this endeavor. Throughout this volume the authors identify periods of alignment and periods of tension between engineering and business. They look at focal points of the engineering business nexus related to the development of capitalism. The book explores past and present movements to reshape reform or reject this nexus. The volume is informed by questions of importance for industry as well as for higher education. These are: What kinds of conflict arise for engineers in their attempts to straddle both professional and organizational commitments? How should professionals be managed to avoid a clash of managerial and professional cultures? How do engineers create value in firms and corporations? What kinds of tension exist between higher education and industry? What challenges does the neoliberal entrepreneurial university pose for management faculty students society and industry? Should engineering graduates be ready for work and can they possibly be? What kinds of business issues are reflected in engineering education curricula and for what purpose? Is there a limit to the degree of business hybridization in engineering degree programs and if so what would be the criterion for its definition? Is there a place in engineering education curricula for reflective critique of assumptions related to business and economic thinking? One ideal of management and control comes to the fore as the Anthropocene the world transformed into an engineered artefact which includes human existence. The volume raises the question as to how engineering and business together should be considered given the fact that the current engineering business nexus remains embedded within an economic model of continual growth. By addressing macro level issues such as energy policy sustainable development globalization and social justice this study will both help create awareness and stimulate development of self knowledge among practitioners educators and students thereby ultimately addressing the need for better informed citizens to safeguard planet Earth as a human life supporting system.

Conflicts of Interest and the Future of Medicine Marc A. Rodwin, 2011-02-16 As most Americans know

conflicts of interest riddle the US health care system. They result from physicians practicing medicine as entrepreneurs from physicians ties to pharma and from investor owned firms and insurers influence over physicians medical choices. These conflicts raise questions about physicians loyalty to their patients and their professional and economic independence. The consequences of such conflicts of interest are often devastating for the patients and society stuck in the middle. In *Conflicts of Interest and the Future of Medicine* Marc Rodwin examines the development of these conflicts in the US France and Japan. He shows that national differences in the organization of medical practice and the interplay of organized medicine the market and the state give rise to variations in the type and prevalence of such conflicts. He then analyzes the strategies that each nation employs to cope with them. Unfortunately many proposals to address physicians conflicts of interest do not offer

solutions that stick But drawing on the experiences of these three nations Rodwin demonstrates that we can mitigate these problems with carefully planned reform and regulation He examines a range of measures that can be taken in the private and public sector to preserve medical professionalism and concludes that there just might be more than one prescription to this seemingly incurable malady *Cultural Policy, Work and Identity* Jonathan Paquette, 2016-05-13 How have cultural policies created new occupations and shaped professions This book explores an often unacknowledged dimension of cultural policy analysis the professional identity of cultural agents It analyses the relationship between cultural policy identity and professionalism and draws from a variety of cultural policies around the world to provide insights on the identity construction processes that are at play in cultural institutions This book reappraises the important question of professional identities in cultural policy studies museum studies and heritage studies The authors address the relationship between cultural policy work and identity by focusing on three levels of analysis The first considers the state the creativity of the power relationship established in cultural policies and the power which structures the symbolic order of cultural work The second presents community in the cultural policy process society and collective action whether it is through the creation of institutions for arts and heritage profession or through resistance to state cultural policies The third examines the experience of cultural policy by the professional It illustrates how cultural policy is both a set of contingencies that shape possibilities for professionals as much as it is a basis for identification and identity construction The eleven authors in this unique book draw on their experience as artists and researchers from a range of countries including France Canada United Kingdom United States and Sweden **International Perspectives on Language and Work** Stéphanie Cassilde, Adeline Gilson, 2025-07-02 This volume expands the definitions of language and work in researching their mutual influences It considers language as a working tool a vector of occupational identity and so on and work as the needed daily interrelation tasks communication constraints and so on The volume covers various national contexts India France Argentina Morocco Portugal Palestine Brazil Singapore and Canada The diversity of countries and linguistic spaces presented here enriches the perspectives in terms of transferring the insights from one situation to another The specific cases discuss among others how an occupation may be structured by language use how language embeds occupations within certain social contexts challenges of teaching in multilingual classrooms and how language affects therapeutic discourse and communication between patients and doctors The chapters provide detailed contexts and backgrounds so that readers can enjoy entering into each context and seeing similarities and differences with their own research field to incorporate the findings into their own research This volume is intended for sociologists interested in professionalisation industrial and occupational sociology sociology of work public health and management research *The System of Professions* Andrew Abbott, 2014-02-07 In *The System of Professions* Andrew Abbott explores central questions about the role of professions in modern life Why should there be occupational groups controlling expert knowledge Where and why did groups such as law and medicine achieve their power Will

professionalism spread throughout the occupational world While most inquiries in this field study one profession at a time Abbott here considers the system of professions as a whole Through comparative and historical study of the professions in nineteenth and twentieth century England France and America Abbott builds a general theory of how and why professionals evolve

Care Staff Mobilisation in the Hospital Ivan Sainsaulieu, 2023-03-14 This book offers a novel examination of the relations actions and practices of healthcare workers analysed in terms of collective mobilisation Based on successive surveys conducted over a twenty year period in public and private hospitals it brings a rich new conceptualisation of both social movements and care work We've all witnessed the collective mobilisation at play in hospitals during the Covid 19 pandemic In such a structured hierarchical environment the parallel with social movements highlights the ethical and collective dimensions of care work as well as the bonds of solidarity and identification with the collective Yet healthcare workers are often caught in a dilemma between fighting against underfunding and deteriorating working conditions on the one hand and cooperating to keep the system standing and provide the best care possible for patients on the other The author's approach in terms of consensual and conflictual mobilisations brings a fresh theoretical and empirical contribution to the literature on social movements medical sociology public health and the sociology of labour whilst in depth case studies bring to light the experiences of healthcare workers and enrich the narrative throughout

Institution & Innovation K. Beekman, 1994 Innovation in art cannot be studied without analyzing the cultural area from which it arises This book explores the role of art committees literary art and film critics art collectors museum directors academic writers and other gatekeepers with regard to different forms of art in the interbellum period as well as after World War II

Farms and Territory Philippe Martin, Solène Pissonnier, 2025-10-07 What are the new relationships between territories and farms Farms and Territory addresses this question by exploring a range of landscapes from mountains to cereal plains forged by different actors who exploit and protect resources such as land and wild or domestic biodiversity These territories are also the site of renewed interactions between farms for the use of biomass whether for methanization or herd feeding This book focuses on the various methods and tools used to diagnose design or evaluate agricultural dynamics in territories database matching material and energy flow calculations codesign approaches etc In short this book illustrates the diversity of work carried out at the farm territory interface by research teams to understand changes in the agricultural world and the ecological economic and societal impacts

Industrial Relations in International Perspective Peter B Doeringer, 1981-07-30 *The Palgrave Handbook of the Sociology of Work in Europe* Paul Stewart, Jean-Pierre Durand, Maria-Magdalena

Richea, 2018-11-02 This book explores the key conceptual features of the development of the Sociology of Work SoW in Europe since 1945 using eleven country case studies An original contribution to our understanding of the trajectory of the SoW the chapters map the current state of the theoretical background of the sub discipline's development to broader socio political and economic changes traced across a heterogeneous set of national contexts Different definitions of the SoW in

each country often reflect variations in the focus of analysis and these chapters link the subject definition and focus to other social science disciplines the state as well as social class interests and ideologies The book contends that the ways in which the sub discipline makes sense of changes in work is itself a response to the type of society in which the sub discipline is practiced whether in the post war social democratic West the Soviet East or today s societies dominated by variant forms of neo liberalism It will be of use to scholars and students interested in the transnational history of the discipline of sociology with a specific focus on the nexus between the sociology of labour ideology economics and politics Finance at Work

Valérie Boussard,2017-07-06 In the collective psyche a financier is a capitalist In managerial capitalism the notion of the manager emerged and the role of the manager was distinct from the role of the owner Financial capitalism is similarly underpinned by financiers who are not the holders of the financial assets they buy sell trade or advise upon Finance at Work explores the world of financiers be they finance oriented CEOs CFOs financial journalists mergers and acquisitions advisors or wealth managers Part I investigates the professional trajectories of members of corporate boards and financialisation as the dissemination of financial logic outside its primary iron cage Part II responds by studying financiers at work within financial occupations or financial operations involving external actors while Part III pursues the issue of financial boundaries by seeking out the way financial logic crosses these boundaries Part IV takes back the hypothesis of differentiations within finance presented in Part I and analyses the internal boundaries of asset management wealth management and leveraged buyout LBO acquisitions This book is essential reading for researchers and academics within the field of finance who aim to understand the spread of finance in contemporary societies Nostalgic Cooks ,2006-01-01

Why is it that in France a country renowned for its gastronomy chefs tend to develop a nostalgia syndrome Having been taught how to work in the most prestigious restaurants they soon discover another reality in everyday restaurants or cafeterias chefs have to cope with family constraints and are often forced to accept positions in standardized organizations that leave little room for daily inspiration Feeling the burden of their professional commitments these chefs are considered as having made an egotistic professional choice both by society and the French educational system With this in mind their identity is distorted regardless of possible improvements in working conditions This book analyses vocational identities in French foodservices in their different stages and diversity using international and inter industry comparisons in the sociological field of professional groups Encyclopedia of Professionalization Didier Demaziere,Richard Wittorski,2024-12-12

Professionalization has become a given in the worlds of work and education For a wide variety of professions public and private organizations and training and further education courses professionalization is an inescapable reality However it takes on diverse even contradictory meanings according to what it represents a managerial imperative imposed by public or managerial policies or a set of goals defined by an ideal of service or quality of work The purpose of Encyclopedia of Professionalization is to discuss the current challenges facing professionalization and by exploring major research traditions to clarify the meanings

associated with this concept and the various phenomena it encompasses Three major notions of professionalization are examined the manufacturing of professions in pursuit of autonomy the rise of professionalisms embodying notions of a job well done and the construction of renewed professionalities at the very heart of work situations and training systems
