

Socratic Seminar Teacher Guide

What does Socratic mean?

The word "Socratic" comes from the name Socrates (470-399 B.C.), a classical Greek philosopher who developed a theory of knowledge.

What was Socrates' theory of knowledge?

Socrates believed that the answers to all human questions and problems reside within us. Unfortunately, as human beings we are often unaware of the answers and solutions we possess. Socrates was convinced that the surest way to discover these answers and obtain reliable knowledge was through the practice of discipline and conversation.

What is a Socratic seminar?

In a Socratic seminar, students seek a deeper understanding of complex ideas through thoughtful dialogue rather than by memorizing lots of information.

A Socratic seminar is not a debate. It is also not led by the teacher; it is led by the participants and merely facilitated by the teacher.

The goal of this activity is to have participants work together to construct meaning and arrive at an answer, not for one student or one group to "win the argument."

How does a Socratic seminar work?

The basic procedure for a Socratic seminar is as follows:

1. The students are introduced to a topic through a text, and a question is posed to guide their inquiry.
2. Depending on the number of students participating, the group may be divided in two or even three and/or into circles. Students in the inner circle engage in a discussion about the question(s)/text. Students in the outer circle observe the conversation and performance of the inner circle.
3. Following the inner circle's performance, the outer circle completes an assessment (either formal or informal) of the inner circle and offers feedback.
4. Students in the inner circle and outer circle now exchange roles and positions within the classroom.
5. The new inner circle begins its own discussion and is assessed by the outer circle.
