Identification and Citizenship in Africa Séverine Awenengo Dalberto, Richard Banégas, 2021-05-10 In the context of a global biometric turn this book investigates processes of legal identification in Africa from below asking what this means for the relationship between citizens and the state Almost half of the population of the African continent is thought to lack a legal identity and many states see biometric technology as a reliable and efficient solution to the problem However this book shows that biometrics far from securing identities and avoiding fraud or political distrust can even participate in reinforcing exclusion and polarizing debates on citizenship and national belonging It highlights the social and political embedding of legal identities and the resilience of the documentary state Drawing on empirical research conducted across 14 countries the book documents the processes practices and meanings of legal identification in Africa from the 1950s right up to the biometric boom Beyond the classic opposition between surveillance and recognition it demonstrates how analysing the social uses of IDs and tools of identification can give a fresh account of the state at work the practices of citizenship and the role of bureaucracy in the writing of the self in African societies This book will be of an important reference for students and scholars of African studies politics human security and anthropology and the sociology of the state

Anxious Joburg Nicky Falkof, Cobus van Staden, 2020-10-01 An interdisciplinary account of the life of Johannesburg

South Africa's global south city *Anxious Joburg* focuses on Johannesburg the largest and wealthiest city in South Africa as a case study for the contemporary global South city. Global South cities are often characterised as sites of contradiction and difference that produce a range of feelings around anxiety. This is often imagined in terms of the global North's anxieties about the South: migration, crime, terrorism, disease and environmental crisis. *Anxious Joburg* invites readers to consider an intimate perspective of living inside such a city. How does it feel to live in the metropolis of Johannesburg? What are the conditions, intersections, affects and experiences that mark the contemporary urban? Scholars, visual artists and storytellers all look at unexamined aspects of Johannesburg life. From peripheral settlements to the inner city to the affluent northern suburbs, from precarious migrants and domestic workers to upwardly mobile young women and fearful elites, *Anxious Joburg* presents an absorbing engagement with this frustrating, dangerous, seductive city. It offers a rigorous critical approach to Johannesburg, revealing the way in which anxiety is a vital structuring principle of contemporary life. The approach is strongly interdisciplinary, with contributions from media studies, anthropology, religious studies, urban geography, migration studies and psychology. It will appeal to students and teachers as well as to academic researchers concerned with Johannesburg, South Africa, cities and the global South. The mix of approaches will also draw a non-academic audience.

Space and planning in secondary cities Lochner Marais, Verna Nel, 2019-09-01. Much of the urban research focuses on the large metropolitan areas in South Africa. This book assesses spatial planning in the second tier cities of the country. Secondary cities are vital as they perform essential regional and in some cases global economic roles and help to distribute the population of a country more evenly across its surface. Apartheid planning left South African cities fragmented, segregated and with low densities. Post-apartheid policies aim to reverse these realities by emphasising integration, higher densities and upgrading. Achieving these aims has been challenging and often the historical patterns continue. The evidence shows that two opposing patterns prevail: namely increased densities and continued urban sprawl. This book presents ten case studies of spatial planning and spatial transformation in secondary cities of South Africa. The book frames these case studies against complexity theory and suggests that the post-apartheid response to apartheid planning represents a linear deviation from history. The ten case studies then reveal how difficult it is for local decision makers to find appropriate responses and how current responses often result in contradictory results. Often these cities are highly vulnerable and they find it difficult to plan in the context of uncertainty. The book also highlights how these cities find it difficult to stand on their own against the influence of interest groups, property developers, mining companies, traditional authorities, other spheres of government. The main reasons include weak municipal finance statements, the dependence on national and provincial government for capital expenditure, limited investment in infrastructure maintenance, the lack of planning capacity, the inability to implement plans and the unintended and sometimes contrary outcomes of post-apartheid planning policies.

Youth and Non-Violence in Africa's Fragile Contexts Akin Iwilade, Tarila Marclint Ebiede, 2022-10-22. This book makes an important contribution to the

conflict literature and to new ways of thinking about agency and social life in fragile contexts It does this by engaging with often ignored peace infrastructures In this book the contributors highlight different ways in which non violence is deployed by Africa s youth to navigate difficult violent contexts Drawing on empirically grounded case studies from the Central African Republic to Zimbabwe this book explores how similar or indeed the same social infrastructures can be deployed for both violence and non violence and the important factors that drive many youth to take the non 1 violence option even when order appears to collapse around them The authors also explore how for instance systems of organizing survive violent disruptions to the so called rhythms of everyday life and when they do how they are then repurposed by youth to help them survive violence

Sociology in South Africa R. Sooryamoorthy, 2016-08-13 This book is the first comprehensive account of the history and current state of South African sociology Providing a holistic picture of the subject both as it is taught in universities and as a field of research it reveals the trajectories of a discipline in a challenging socio political context With the support of historical and scientometric data it demonstrates how the changing political situation from colonialism to apartheid to democracy has influenced the nature direction and foci of sociological research in the country The author shows how during the apartheid era sociology was professionally fragmented and divided along language and race lines It was however able to flourish with the advent of democracy in 1994 and has become a unique academic movement This insightful work will appeal to students and scholars of the social sciences and all those interested in the history and society of South Africa
