

LabelSystem DC-M

Stand-alone die-cutter for high-quality small and medium runs, with manual loading

Description LabelSystem DC-M

POLAR's stand-alone die-cutter DC-M is extremely flexible, easy to operate and provides maximum die-cutting accuracy and a variety of shapes and sizes.

The workflow:

First of all the material to be die-cut is cut into label stacks by a high-speed cutter. The printed label stack is manually deposited in the feeder tray, then automatically moved in front of the stamping punch which presses it through the cutting die (punch-and-die principle). This gives the label its intended shape. A delivery chute takes the die-cut final products to the exact position on the packing table.

Customer benefits

- Easy set-up of the cutting die off the machine, thanks to the alternate-frame system
- OnePunchRegister permits to adjust the cutting die to the printed image with only one pack
- Motorized precision adjustment of the cutting die allows to work at the machine without any tools
- Maximum die-cutting precision and high lifts are ensured, because the die-cutting material is aligned on four sides
- Large format range
