Pwani University Fee Structure:

Multicampus University Systems Ishmael I. Munene, 2014-08-27 In the face of increasing social demand and cutbacks in state budgetary support universities in African countries are now turning towards a multicampus system strategy As African governments have adopted neoliberal education policies that place premium on entrepreneurialism profit making privatization and markets as drivers of university development a reshaping of the academic work and organizational framework have taken place However little is known about the impact of this paradigm shift on access quality and governance in higher education This book fills the void in research and academic knowledge about the impact of the emerging university configurations in Africa It analyzes the paradox surrounding the performance of multicampus university systems as avenues of broadening university access but whose structural success may be qualitatively contested This book offers a refreshing examination of the African multicampus university system from both an African and global perspective It makes use of empirical data from Kenya collected during extensive fieldwork along with substantive library and documentary resources on the rest of the continents to fortify arguments and demonstrate important conclusions This allows for a comparative analysis of policies and strategies used in the establishment of campuses both within and beyond national boundaries in the continent and will be a welcome contribution to the existing repertoire on African universities Kenya's Past as Prologue Fouere, Marie-Aude, Mwangi, Susan, 2015-06-16 During the run up to Kenya's 2013 general elections crucial political and civic questions were raised Could past mistakes especially political and ethnic related violence be avoided this time round Would the spectre of the 2007 post electoral violence positively or negatively affect debates and voting How would politicians electoral bodies such as the IEBC the Kenyan civil society and the international community weigh in on the elections More generally would the 2013 elections bear witness to the building up of an electoral culture in Kenya characterized by free and fair elections or would it show that voting is still weakened by political malpractices partisan opinions and emotional reactions Would Kenya's past be inescapable or would it prepare the scene for a new political order Kenya's Past as Prologue adopts a multidisciplinary perspective mainly built upon field based ethnography and a selection of case studies to answer these questions Under the leadership of the French Institute for Research in Africa Institut francais de recherche en Afrique IFRA political scientists historians and anthropologists explore various aspects of the electoral process to contribute in depth analyses of the last elections They highlight the structural factors underlying election and voting in Kenya including the political system culture and political transition They also interrogate the short term trends and issues that influence the new political order The book provides insight into specific case studies situations and contexts thus bringing nuances and diversity into focus to better assess Kenya's evolving electoral democracy **Diversity in African languages** Doris L. Payne, Sara Pacchiarotti, Mokaya Bosire, 2016-12-31 Diversity in African Languages contains a selection of revised papers from the 46th Annual Conference on African Linguistics held at the University of Oregon Most chapters

focus on single languages addressing diverse aspects of their phonology morphology semantics syntax information structure or historical development These chapters represent nine different genera Mande Gur Kwa Edoid Bantu Nilotic Gumuzic Cushitic and Omotic Other chapters investigate a mix of languages and families moving from typological issues to sociolinguistic and inter ethnic factors that affect language and accent switching Some chapters are primarily descriptive while others push forward the theoretical understanding of tone semantic problems discourse related structures and other linguistic systems The papers on Bantu languages reflect something of the internal richness and continued fascination of the family for linguists as well as maturation of research on the family The distribution of other papers highlights the need for intensified research into all the language families of Africa including basic documentation in order to comprehend linguistic diversities and convergences across the continent In this regard the chapter on Daats i in Gumuzic stands out as the first ever published article on this hitherto unknown and endangered language found in the Ethiopian Sudanese border lands
