water clocks at our disposal Against time as measure and against time as inner temporal phenomenon comes time as total instability Can revisiting the few fragments that Pyrrho and his disciple left us help once again articulate our relation to time and give us a renewed sense of reality and who we are within it This monograph focuses on early Pyrrhonism as distinguished from the sceptical work of Sextus Empiricus Pali Buddhism as well as contemporary interpretations of time and reality in both science and philosophy **Perspective, Projections and Design** Mario Carpo,Frédérique

Lemerle,2013-04-15 The essays selected for this book presented in chronological order discuss various aspects of image making technologies geometrical knowledge and tools for architectural design focusing in particular on two historical periods marked by comparable patterns of technological and cultural change The first is the Renaissance characterized by the rediscovery of linear perspectives and the simultaneous rise of new formats for architectural drawing and design on paper the second the contemporary rise of digital technologies and the simultaneous rise of virtual reality and computer based design and manufacturing Many of the contributing authors explore the parallel between the invention of the perspectival paradigm in early modern Europe and the recent development of digitized virtual reality This issue in turn bears on the specific purposes of architectural design where various representational tools and devices are used to visualize bi dimensional aspects of objects that must be measured and eventually built in three dimensional space **Skepticism: From**

more like memory than a permanent substance this original work draws on Derrida and Malabou to suggest a picture of the world as an assemblage of spectral resonances and disseminations In Memory Assemblages Hilan Bensusan combines elements of continental and analytic philosophy to advance a theory of realism which insists on the reality of spectres an ultrametaphysical approach departing from metaphysics while attending to the problems that triggered metaphysical

investigation In doing so Bensusan builds on the reception of Derrida's hauntology particularly by Latin American scholars in disciplines such as media studies history and political theory and engages with currents of speculative realism as well as contemporary work on idealism and logic Challenging the correlationist view in which being and time cannot be considered independently of subjectivity Bensusan gives an account of exteriority where thought and reality share a common logic of addition Central to the book is this philosophy of addition where addition structures the insufficiency and incompleteness of whatever seems to be present it is an operation that dismantles what has been before in a way that depends on that past consigned to memory Addition is explored in light of the Derridian supplement the Epicurean Swerve Jean Luc Nancy's notion of struction and the Marxist notion of forces of production A coda further elaborates the notion of production in this context arguing for a spectral Marxism and drawing on Deleuze and Guattari's *Anti-Oedipus* **The Art of Solitude**

Modern European Thought Vicente Raga Rosaleny, Plínio Junqueira Smith, 2020-10-19 This volume examines modern scepticism in all main philosophical areas epistemology science metaphysics morals and religion It features sixteen essays that explore its importance for modern thought The contributions present diverse mutually enriching interpretations of key thinkers from Montaigne to Nietzsche The book includes a look both at the relationship between Montaigne and Pascal and at Montaigne's criticism of religious rationalism It turns its attention to an investigation into the links between ancient scepticism and Bacon's Doctrine of the Idols as well as into the ancient problem of the criterion in Cartesian philosophy Next three essays focus on more general topics like modern sceptical disturbances clandestine literature and irreligion Two essays investigate the role of scepticism in Bayle's moral thinking and his theory of religious toleration Hume's sceptical philosophy is the subject of two papers by distinguished scholars In addition many contributors address the presence of scepticism in

Kant and in the German Idealism such as the role of Schulze's scepticism in the works of the young Hegel. The book closes with a paper on Nietzsche and scepticism and an essay on the role of Popkin's and Schmitt's works on modern scepticism. This collection continues along a rich fruitful path opened by Richard H. Popkin and pursued by many important scholars like Gianni Paganini, John Christian Laursen and Jos Raimundo Maia Neto. It re-establishes that necessary dialogue between researchers of scepticism from all over the Americas which began with Popkin, Oswaldo Porchat and Ezequiel de Olaso long ago. This insightful reflection on modern European scepticism will also serve as an important resource in the history of modern philosophy.

Curating As Ethics Jean-Paul Martinon, 2020-01-28. A new ethics for the global practice of curating. Today everyone is a curator. What was once considered a hallowed expertise is now a commonplace and global activity. Can this new worldwide activity be ethical and if yes how? This book argues that curating can be more than just selecting, organizing and presenting information in galleries or online. Curating can also constitute an ethics, one of acquiring, arranging and distributing an always conjectural knowledge about the world. Curating as Ethics is primarily philosophical in scope, evading normative approaches to ethics in favor of an intuitive ethics that operates at the threshold of thought and action. It explores the work of authors as diverse as Heidegger, Spinoza, Meillassoux, Mudimbe, Chaliel and Kofman. Jean-Paul Martinon begins with the fabric of these ethics, how it stems from matter, how it addresses death, how it apprehends interhuman relationships. In the second part, he establishes the ground on which the ethics is based, the things that make up the curatorial, for example, the textual and visual evidence or the digital medium. The final part focuses on the activity of curating as such, sharing, caring, preparing, dispensing and so on. With its invigorating new approach to curatorial studies, Curating as Ethics moves beyond the field of museum and exhibition studies to provide an ethics for anyone engaged in this highly visible activity, including those using social media as a curatorial endeavor and shows how philosophy and curating can work together to articulate the world today.

The Return of Scepticism Gianni Paganini, 2013-03-14. This collection of articles, the Vercelli conference proceedings, places the theme of scepticism within its philosophical tradition. It explores the English philosophical thinkers, the French context as well as major Italian figures and Spanish culture. It pays special attention to the relationships between history of philosophical ideas and the problems arising from the history of sciences, medicine, physics, linguistics, historical scholarship in the 17th and the 18th centuries.

Why We Are Not Nietzscheans Luc Ferry, Alain Renaut, 1997-06-09. To think with Nietzsche against Nietzsche. Thus the editors describe the strategy adopted in this volume to soften the destructive effects of Nietzsche's philosophy with a hammer on French philosophy since the 1960s. Frustrated by the infinite inclusiveness of deconstructionism, the contributors to this volume seek to renew the Enlightenment quest for rationality. Though linked by no common dogma, these essays all argue that the French Nietzsche transmitted through the deconstructionists must be reexamined in light of the original context in which Nietzsche worked. Each essay questions the viability of Nietzsche's thought in the modern world, variously critiquing his philosophy of history as obsessed with hierarchy.

his views on religion and art as myopic and irrational and his stance on science as hopelessly reactionary Contending that we must abandon the Nietzsche propped up as patron saint by French deconstructionists in order to return to reason these essays will stimulate debate not just among Nietzscheans but among all with a stake in modern French philosophy Contributors are Alain Boyer Andr Comte Sponville Vincent Descombes Luc Ferry Robert Legros Philippe Raynaud Alain Renault and Pierre Andr Taguieff Guía Comares de Montaigne Joan Lluís Llinàs Begon,2020-02-19 **A Philosophy of Emptiness** Gay Watson,2014-03-15 We often view emptiness as a negative condition a symptom of depression despair or grief an assessment furthered by authors like Franz Kafka or the existentialists Jean Paul Sartre and Albert Camus Offering an alternative view A Philosophy of Emptiness reclaims these hollow feelings as a positive and even empowering state an antidote to the modern obsession with substance and foundation Digging through early and non Western philosophy Gay Watson uncovers a rich history of emptiness She travels from Buddhism Taoism and religious mysticism to the contemporary world of philosophy science and art practice Though most Western philosophies are concerned with substance and foundation she finds that the twentieth century has seen a resurgence of emptiness and offers reasons why such an apparently unappealing concept has attracted modern musicians artists and scientists as well as preeminent thinkers throughout the ages Probing the idea of how a life without foundation might be lived and why a person might choose this path A Philosophy of Emptiness links these concepts to contemporary ideas of meditation and the mind presenting a rich and intriguing take on the concept of emptiness and the history of thought *Dictionnaire des philosophes antiques* Richard Goulet,1989 Ce volume contient entre autres les notices consacrées Parménide Philon d'Alexandrie Philostrate Photios Platon et analyse la survie de leurs oeuvres dans la littérature du christianisme et de l'islam Pyrrhon et le Pyrrhoïsme Charles Tzantzas Waddington,1876 **The Cambridge Companion to Ancient Scepticism** Richard Aron Home Bett,2010-01-28 A comprehensive survey of the main periods schools and individual proponents of scepticism in the ancient Greek and Roman world *La philosophie comme mode de vie* Daniel Desroches,2014-04-15T00:00:00-04:00 Dans ce premier ouvrage qui doit consacrer la philosophie comme mode de vie l'auteur retrouve les grandes écoles antiques Le socratisme le cynisme le scepticisme l'épicurisme le stoïcisme et la vie contemplative sont les étapes obligées de son odyssée Accessible un large public puisque le matériau qui le constitue a d'abord été présenté l'occasion de cours et de conférences publiques cet ouvrage approfondit galement plusieurs thèmes de la philosophie grecque romaine qui ont déjà fait l'objet de travaux rudimentaires par Pierre Hadot Michel Foucault et André Jean Voelke Diccionario Akal de El saber griego Jacques Brunschwig,Geoffrey Lloyd,2000-03-22 La obra abarca temáticamente el amplio conjunto de conocimientos que conforman el saber y la cultura de la Grecia antigua unos saberes que han sido y aún son determinantes del conjunto de la historia y el presente de nuestra civilización y cultura Se reúne de este modo el pensamiento filosófico científico y cultural de la Grecia antigua presentado por un conjunto de 47 especialistas internacionales
