language started gaining momentum and today it is set to overtake the only language that stands before it to claim the
prestigious spot of being the world s most favored language This language was the brainchild of Guido Van Rossum Created
in the year 1991 Python has become a byword for efficient and user friendly programming This language is what connected
the dots and gave programmers the much needed ease of coding that they have since been yearning for Naturally the
language was received well by the programming community Today it is one of the most important languages for both
professionals and students who aim to excel in fields like Machine Learning automation artificial intelligence and so much
