Ritter, Harry van der Hulst, 2024-09-17 This handbook provides a detailed account of the phenomenon of vowel harmony a pattern according to which all vowels within a word must agree for some phonological property or properties Vowel harmony has been central in the development of phonological theories thanks to its cluster of remarkable properties notably its typically unbounded character and its non locality and because it forms part of the phonology of most world languages The five parts of this volume cover all aspects of vowel harmony from a range of theoretical and methodological perspectives Part I outlines the types of vowel harmony and some unusual cases before Part II explores structural issues such as vowel inventories the interaction of vowel harmony and morphological structure and locality The chapters in Part III provide an overview of the various theoretical accounts of the phenomenon as well as bringing in insights from language acquisition and psycholinguistics while Part IV focuses on the historical life cycle of vowel harmony looking at topics such as phonetic factors and the effect of language contact The final part contains 31 chapters that present data and analysis of vowel harmony across all major language families as well as several isolates constituting the broadest coverage of the phenomenon to date

Lawrence G. Potter, 2014-06-01 Long a taboo topic as well as one that has alarmed outside powers sectarian conflict in the Middle East is on the rise The contributors to this book examine sectarian politics in the Persian Gulf including the GCC states Yemen Iran and Iraq and consider the origins and consequences of sectarianism broadly construed as it affects ethnic tribal and religious groups They also present a theoretical and comparative framework for understanding sectarianism as well as country specific chapters based on recent research in the area Key issues that are scrutinised include the nature of sectarianism how identity moves from a passive to an active state and the mechanisms that trigger conflict The strategies of governments such as rentier economies and the invention of partisan national histories that encourage or manage sectarian differences are also highlighted as is the role of outside powers in fostering sectarian strife The volume also seeks to clarify whether movements such as the Islamic revival or the Arab Spring obscure the continued salience of religious and ethnic cleavages [Land of the Turquoise Mountains](#) Cyrus Massoudi, 2014-09-12 For Cyrus Massoudi a young Britishborn Iranian the country his parents were forced to flee thirty years ago was a place wholly unknown to him Wanting to make sense of his roots and piece together the divided divisive and deeply contradictory puzzle that is contemporary Iran he embarked on a

series of journeys that spanned hundreds of miles and thousands of years through the many ebbs and flows of Iranian history From the border with Turkey to that of Turkmenistan from the Caspian basin down to the Persian Gulf his journeys took him from the mythological first kings of Iran to the Elamite kingdom the eras of Cyrus and Darius the glory of the Sasanians the shock of the Islamic Arab conquests and the later Mongols Safavids and on to Khomeini Ahmadinejad and beyond Rich portrayals of Sufis and ageing aristocrats smugglers and underground rock bands are all woven together with history religion and mythology to form a unique portrait of contemporary Iranian society And like a fragile thread running through the heart of the narrative lies Massoudi's poignant personal quest his struggle echoing that of Iran itself as it fights to forge a cohesive modern identity With its tensions of young against old reformists against reactionaries and the computer against the Qur'an it is a battle with global implications for a future that is poised so precariously between promise and ruin Land of the Turquoise Mountains reveals a world beyond the propaganda driven media-fuelled image of fractious flag burning fundamentalism and provides a compelling glimpse both into the heart of a deeply misunderstood nation and into what it is to seek out and discover one's heritage

Tribeswomen of Iran Julia Huang, 2014-09-19 Since the revolution in 1979 the Islamic Republic of Iran has permitted very few Western scholars to conduct research in the country Foreign travellers and media persons have limited access and much Iranian scholarship tends to focus on the realms of politics and government Here Julia Huang provides a remarkable account of local tribal Iranian life offering a rare glimpse into the daily rhythms and social richness beyond the capital city of Tehran The Qashqa'i are a confederation of nomadic tribes of which the Qermezi Red Ones are one migrating semiannually between winter pastures near the Persian Gulf and summer pastures southwest of the city of Isfahan Huang has visited and traveled with the Qermezi for extended periods across fourteen years Drawing on her experiences participation and observation she offers an intimate window onto their life She focuses on a small group of women spanning four generations who are part of a large extended family and describes their ways of life their activities and interactions and their distinctive sociocultural and ecological setting Like other nomadic peoples around the world the Qashqa'i increasingly face pressures that threaten their livelihoods lifestyles and culture Huang shows us how women negotiate compromises between customary tribal values and external influences and sketches their efforts to resist the influences of an Islamizing modernizing and centralizing government With shadows and resonances that rebound across the stories of these women Huang is able to present multiple perspectives on events and contentious issues for instance the politicized issue of women's state mandated modest dress Huang also explains how the Turkic speaking Qashqa'i relate to the wider Iranian society and the Islamic Republic of Iran adapting to a rapidly changing world while retaining tribal values and a distinctive ethnolinguistic identity as one of Iran's national minorities In describing life at the local level in Iran Huang depicts a community largely beyond the scope and reach of foreign travellers and the Western media With rich ethnographic description and analysis intimate portraits of the private lives and spaces of women and children and diverse perspectives

Gustafson, 2025-02-20 Why did the place of formerly powerful Eurasian land empires like that of Iran change so dramatically in global affairs over the course of the eighteenth and nineteenth centuries This book explores this critical transitional period in Iranian history from an environmental perspective It argues that severe ecological challenges dating to the late seventeenth century and deepening during the post Safavid crisis of the eighteenth century drove a decline in the population and resource base of the Iranian plateau This in turn shaped ongoing environmental challenges in the Qajar period and on into the 20th century Presenting a new set of perspectives on key sources with new questions in mind The Lion and the Sun relies upon scientific evidence such as Geographic Information System data and tree ring analysis as well as a careful re engagement with existing sources Re interpreting court chronicles administrative orders local histories geographical texts and endowment deeds the book reveals the way in which the relationship between imperial systems and the rest of nature formed the modern state of Iran An important and original contribution it will be essential reading for scholars and students of global environmental history and the modern Middle East **Nomads in Postrevolutionary Iran** Lois Beck, 2014-09-19 Examining the rapid transition in Iran from a modernizing westernizing secularizing monarchy 1941 79 to a hard line conservative clergy run Islamic republic 1979 this book focuses on the ways this process has impacted the Qashqa i a rural nomadic tribally organized Turkish speaking ethnic minority of a million and a half people who are dispersed across the southern Zagros Mountains Analysing the relationship between the tribal polity and each of the two regimes the book goes on to explain the resilience of the people s tribal organizations kinship networks and politicized ethnolinguistic

Graffiti and Street Art Konstantinos Avramidis, Myrto Tsilimpounidi, 2016-12-08 Graffiti and street art images are ubiquitous and they enjoy a very special place in collective imaginary due to their ambiguous nature Sometimes enigmatic in meaning often stylistically crude and aesthetically aggressive yet always visually arresting they fill our field of vision with texts and images that no one can escape As they take place on surfaces and travel through various channels they provide viewers an entry point to the subtext of the cities we live in while questioning how we read write and represent them This book is structured around these three distinct albeit by definition interwoven key frames The contributors of this volume critically investigate underexplored urban contexts in which graffiti and street art appear shed light on previously unexamined aspects of these practices and introduce innovative methodologies regarding the treatment of these images Throughout the focus is on the relationship of graffiti and street art with urban space and the various manifestations of these idiosyncratic meetings In this book the emphasis is shifted from what the physical texts say to what these practices and their produced images do in different contexts All chapters are original and come from experts in various fields such as Architecture Urban Studies Sociology Criminology Anthropology and Visual Cultures as well as scholars that transcend traditional disciplinary frameworks This exciting new collection is essential reading for advanced undergraduates as well as postgraduates and academics interested in the subject matter It is also accessible to a non academic audience such as art practitioners and policymakers alike or anyone keen on deepening their knowledge on how graffiti and street art affect the ways urban environments are experienced understood and envisioned

Petersen,2024-02-02 The definitive work on the course conduct and aftermath of the Iraq war In *Death Dominance and State Building* the eminent scholar of conflict Roger D Petersen provides the first comprehensive analytic history of post invasion Iraq Although the war is almost universally derided as one of the biggest foreign policy blunders of the post Cold War era Petersen argues that the course and conduct of the conflict is poorly understood He begins by outlining an accessible framework for analyzing complex fluid and violent internal conflicts He then applies that framework to a variety of diverse case studies to break down the strategic interplay among the US military forces and Shia and Sunni insurgent organizations as it played out in Baghdad Anbar and Hawija Highlighting the struggle for dominance between Shia and Sunni in Baghdad Petersen offers a reconsideration of the Surge He also addresses failures of state building in Iraqi Kurdistan Critically he shows how the legacy of the US occupation and presence from 2003 2011 shaped Iraq s political and security contours from 2011 2023 Comprehensive analytically sophisticated and subtle this book draws lessons relevant to future American military interventions from what most regard as the US s most disastrous foreign policy adventure since Vietnam The US cannot simply wish away insurgencies which are always going to occur The question is what the US and other great powers might do about them in the future *Crime, Poverty and Survival in the Middle East and North Africa* Stephanie Cronin,2019-11-28 The concept of the dangerous classes was born in a rapidly urbanizing and industrializing nineteenth century Europe It described all those who had fallen out of the working classes into the lower depths of the new societies surviving by their wits or various amoral disreputable or criminal strategies This included beggars and vagrants swindlers pickpockets and
