The Routledge Handbook of Language Learning and Technology Fiona Farr, Liam Murray, 2016-02-26

The exponential growth and development of modern technologies in all sectors has made it increasingly difficult for students, teachers, and teacher educators to know which technologies to employ and how best to take advantage of them. The Routledge Handbook of Language Learning and Technology brings together experts in a number of key areas of development and change and opens the field of language learning by exploring the pedagogical importance of technological innovation. The handbook is structured around six themes: historical and conceptual contexts, core issues, interactive and collaborative technologies for language learning, corpora and data-driven learning, gaming and language learning, purpose-designed language learning resources. Led by fundamental concepts, theories, and frameworks from language learning and teaching research rather than by specific technologies, this handbook is the essential reference for all students, teachers, and researchers of Language Learning and TESOL. Those working in the areas of Applied Linguistics, Education, and Media Studies will also find this a valuable book.

Achieving the Goals, 1997

In 1994, the U.S. Congress added parental involvement to the National Education Goals. Goal 8 states that by the year 2000, every school will promote partnerships that will increase parental involvement and participation in promoting the social, emotional, and academic growth of children. The fourth in a series that seeks to inform educators and the public of the possibilities for programs and funding that exist outside the Department of Education, this book provides a compendium of educational programs across the federal government, providing a useful tool for seeking funding for activities related to achieving this National Education Goal. Following the introduction, the book provides detailed information about the various parental involvement activities of the Department of Education and the Partnership for Family Involvement in Education. The remainder of the book, which lists specific federal programs that might support parent involvement, is organized by education topics. Topics include at-risk students, bilingual education, drug abuse prevention, gifted and talented, special education, housing, safety, and recreation. The book concludes with a list of useful publications for parents from several federal resources. The appendices list state and local points of contact for various activities. HTH
