Kidney Protection Vijay Lapsia,Bernard Jaar,A. Ahsan Ejaz,2019-02-15 Kidney disease affects approximately ten percent of the population worldwide with more than 2 6 million individuals estimated to be receiving renal replacement therapy Chronic kidney disease CKD is fast becoming a major public health issue with increasing incidence and death rates throughout the world Many strategies have been proposed to reduce the growing burden of kidney disease but while early identification and improved access to renal replacement therapies and transplantation are important they are unlikely to solve this enormous problem Efforts focused on primary prevention protection and slowing the progression of kidney disease are needed as well Renal protection is a vital and critical component of protecting the kidneys promoting recovery and preventing further renal loss yet observational data suggests that awareness of renal protection remains low and the concept of renal protection under recognized Kidney Protection A Practical Guide to Preserving Renal Function in Acute and Chronic Disease is a clinically focused review that aims to address this awareness and knowledge gap It assembles clinically pertinent information in a concise and lucid format with the goal of helping the clinician protect the kidneys whether in the ICU perioperative or out patient setting The authors interdisciplinary approach is inclusive of nephrology urology critical care anesthesia and emergency medicine Chapters review understanding kidney disease general concepts in protecting renal function patient selection assessment pharmacologic issues and kidney protection in systemic illness The latest evidence based practical guidelines for optimal renal outcomes are also included Paradoxes of Diversity and Inclusion: From the Lab to the Social Field Maria Popa-Roch,Smaranda Boros,Claudia Toma,2024-12-31 Contemporary societies strive for multiculturalism and tolerance To create conditions to reach this ideal there should be a continuum between what the social actors are prepared for in school practices they encounter at the workplace and the way they contribute to the wider society This continuum should be materialized in consistent conceptualizations and practices of diversity and inclusion across educational organizational and societal contexts So far research suggests that policies implemented in those settings have mixed results This is partly because policies in different fields use distinct conceptual definitions of diversity and inclusion

Thus important gaps exist between research and policy implementation and there is little dialogue between research in educational and organizational environments In education inclusive practices focus on students with special needs broader definitions of diversity being neglected In organizations the emphasis is largely on diversity inclusion being a more recent research topic and practice Research conducted at societal level addresses the comprehensive ideologies underlying diversity and inclusion To move forward a dialogue that builds bridges between the various types fundamental vs applied and fields of research educational organizational and societal is crucial Only then can this shared understanding be reached as well as the continuum of goals concepts and practices
