

# Qualitative Data Collection - Types of Interview Guides

## Structured interviews

**What:** Questions and their sequence are predetermined. A standardized approach to data collection ensures uniformity across all interviews and reduces the potential for interviewer bias.

**When:** Ideal when a meticulous and controlled interview process is desired.

## Semi-Structured interviews

**What:** Predetermined questions, but maintains flexibility to ask follow-up questions and explore topics in more depth. It fosters a conversational atmosphere and allows flexibility to adjust based on participant responses.

**When:** Suited for delving into topics while maintaining a certain level of standardization.

## Unstructured interviews

**What:** No predetermined set of questions, a free-flowing conversational method. Difficult to compare responses across different interviewees due to the lack of standardization.

**When:** Preferred when seeking unrestrained participant expression on a topic.

Samaratunge,2016-04-01 Many governments seek to attract skilled migrants into the top occupational groups and now have significant groups of overseas born professionals in their workforces Such groups are expected to contribute significantly to the economic and social development of their new countries There has been sustained debate between those taking the view

that skilled migrants are integrated without much difficulty and those concerned that a mismatch between aspirational government policies and actual organisational practice generates discontent and frustration among skilled immigrants. If the latter is correct it seems likely that host societies will not benefit from the injection of human capital in terms of creativity and innovation. In *Skilled Migration: Expectation and Reality* the authors report the findings of their research into the acculturation and integration issues confronting professional Chinese immigrants in the Australian labour market. Australia serves as a good example of the phenomenon under examination being a country where Chinese are one of the largest non-English speaking ethnic groups and where they are strongly concentrated in the top occupational groups. The authors' rigorous quantitative and qualitative study is one of the first systematic examinations of acculturation to focus specifically on the workplace. It reveals fascinating insights regarding the strategies that professional immigrants are compelled to adopt because they are unable to find appropriate channels through which to integrate and assimilate into the host society.

Community Health Advocacy Sana Loue, Linda S. Lloyd, Daniel J. O'Shea, 2003. This text provides a foundation for the initiation of advocacy efforts and for the evaluation of their success and includes topics such as specific strategies, grassroots advocacy efforts, formation and development of coalitions, advocacy efforts in legislatures, administrative agencies, court and the media. It is of interest to public and urban health workers, social workers, community organizers and legislators.

**Research Methods and Design Beyond a Single Discipline** Heting Chu, 2024-04-01. *Research Methods and Design Beyond a Single Discipline* presents and discusses 15 research methods after an overview of each, an illustration of the research process and an examination of related topics. The focus of this book is on data collection techniques e.g. interviewing, observation, questionnaires and research design. Research methods are named and categorized by data collection techniques in this book rather than by the quantitative and qualitative dichotomy used for data analysis techniques. Each of the 15 research methods included in the book is depicted regarding its functions, features, applications and dos and don'ts with examples and case studies from various disciplines. Research methodology development in research design starts with selection of data collection techniques which takes into consideration research questions of a study and research method features. Data analysis techniques and selection are described as part of the research methodology development to help readers choose the most appropriate methodology for their own research and put research design into practice. This book is essential for masters and doctoral students and researchers who wish to learn about research methods and design comprehensively and systematically as well as instructors delivering research methods courses across the social and behavioral sciences.
