### **President's Policy and Authorization of Quality Control**

The management system for the Steel Structural Fabrication, Erection & Doors of Leo Steel Construction Co. entrusted through furnishing high quality and reliable products that comply with the requirements of the customer and applicable standards of the LEO STEEL CONSTRUCTION CO. (ex Rashid Trading & Cont. Est.) products.

I now declare that this Quality control program has been authorized and approved by myself and will be strictly enforced.

All company personnel will strictly adhere to the procedures in this manual. No exceptions will be tolerated or allowed.

The Quality Assurance Department Manager is given authority over the administration and application of the Quality Control system and has the organizational freedom to identify quality problems; initiate, recommend or provide solutions to those problems and verify that the required action has been properly carried out. The Quality Assurance Manager also has the authority to reject and stop work at any moment if they deem it necessary.

In the case of a possible conflict between the Quality Assurance Manager and any related Department, the matter shall be referred to the undersigned for resolution. All resolutions shall meet the requirements of the applicable standards and/or codes & specification requirements.

No formats or procedures other than those prescribed in this Quality Manual shall be issued for inspection purposes.

It is emphasized that all planned and systematic activities toward the achievements of Quality Assurance should be focused on good plant performance, high quality and reliability and should not be prejudicial to the achievements of the projects schedule.

ISO 9000 compliance is rapidly becoming a prerequisite for companies seeking international construction contracts and this may soon be true for firms operating solely within North America. Until now, however, no book has approached ISO 9000 from the unique point of view of the construction industry and related fields. This indispensable handbook offers a comprehensive step-by-step interpretation of ISO 9000 quality standards and their implementation in the construction industry. This remarkably useful guide introduces ISO 9000 concepts and explains how they apply to all players in the construction industry, from architects to contractors to suppliers. It explains how each of the standard's 20 elements is implemented in the various construction-related manufacturing and service companies. It describes the development of quality manuals, general quality procedures, work instructions, and forms needed to implement a quality assurance system. It provides case studies that demonstrate the effectiveness of ISO 9000 standards. It supplies numerous forms, checklists, tables, and illustrations to help readers understand and apply the requirements. For architects, engineers, contractors, specifications writers, hardware managers, and other professionals in construction-related industries, ISO 9000 in Construction is the key to achieving more consistent performance levels, improved efficiency and productivity, a solid reputation for quality, and a sharper competitive edge.

Quality Assurance in Construction Brian Thorpe, Peter Sumner, 2017-03-02. The need for quality assurance in construction is now widely accepted. As a result, pressure is currently being applied to contractors and those offering professional services to demonstrate QA capability prior to commission. This book, written by experts in the field of quality management, shows how construction companies can effectively apply QA within their own organization. It pinpoints the real benefits to be gained from developing well-structured systems and offers practical guidance on implementation techniques. Inevitably, quality management standards play an important role in helping to define the requirements of any QA system. With this in mind, the authors provide a detailed analysis of ISO 9000:1994 and its implementation. The text is complemented by numerous diagrams and examples and is essential reading for all construction professionals concerned with quality.
