## C857 Software Quality Assurance - Study Guide Correct 100%

- Detect defects.
  - Remove defects as close to the point of insertion as possible.
  - Determine product progress/status.
  - Identify potential improvements.
  - Produce technical work of a more uniform and predictable quality.
  - Assist employees with cross-training.
  - Reduce costs to build and maintain better products.
  - Reduce development time.
  - Reduce testing cost and time.
  - Reduce total system maintenance cost dramatically (as much as 10 to 1 according to recent statistics).
- ANSWER Why should we conduct reviews?

A buddy check is normally thought of as an informal verification technique in which the life-cycle work product is examined by the author and one other person. The objectives of buddy checks include:

- Improve the life-cycle work product;
  - Consider alternative implementations;
  - Exchange techniques and style variations;
  - Point out problems with clarity and understandability;
  - Allow the author to look at the life-cycle work product from a different "angle" or point of view;
  - Mentoring of others in the concepts embedded in the life-cycle work product.
- 

ANSWER What is a buddy check?

Circulation reviews take on attributes of both buddy checks and walkthroughs. Circulation reviews can be informal or follow strict rules. The life-cycle work product is circulated to each reviewer who reviews it and either attaches comments, questions, and recommendations directly on the life-cycle work product or places them into a separate document. The objectives of circulation reviews include:

- Improve the life-cycle work product;
  - Consider alternative implementations;
  - Point out problems with clarity and understandability;
  - Point out areas of concern and offer comments and suggestions;
  - Gain consensus from a large population of reviewers;
  - Gain input from valuable contributors who cannot be present for a face-to-face review.
- 

ANSWER What is a circulation review?

# Quality Assurance Study Guide
